INSTITUTION'S CRA RATING

1st source Bank's Overall CRA Rating: Outstanding

Performance Test Rating Table

The following table indicates the performance level of 1st Source Bank with respect to the lending, investment, and service test.

1 st Source Bank			
Performance Levels	Performance Tests		
	Lending Test	Investment Test	Service Test
Outstanding	✓		
High Satisfactory		✓	✓
Low Satisfactory			
Needs to Improve			
Substantial Noncompliance			

** Note: The lending test is weighted more heavily than the investment and service tests when arriving at an overall rating*

Summary of Major Factors that Support the Rating

Lending Test:

- Excellent responsiveness to credit needs in its assessment areas, considering the number and amount of home mortgage and small business loans in its assessment areas;
- A small percentage of its loans are made in the assessment area;
- A good geographic distribution of loans in the assessment areas;
- An adequate distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the bank;
- An excellent record of serving the credit needs of highly economically disadvantaged areas in its assessment areas, low-income individuals, or businesses with gross annual revenues of \$1 million or less;
- Extensive use of innovative or flexible lending practices in a safe and sound manner to address the credit needs of low- or moderate-income individuals or geographies; and
- The bank is a leader in making community development loans.

Investment Test:

- A significant level of qualified investments, particularly those that are not routinely provided by private investors, occasionally in a leadership position;
- Makes significant use of innovative or complex qualified investments; and
- Excellent responsiveness to credit and community development needs.

Service Test:

- The bank's service delivery systems are accessible to geographies and individuals of different income levels in its assessment areas;
- To the extent changes have been made, its record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income individuals;
- Its services do not vary in a way that inconveniences its assessment areas, particularly low- and moderate-income geographies and low- and moderate-income individuals; and
- Provides a relatively high level of community development services.

1st SOURCE BANK

DESCRIPTION OF THE INSTITUTION

1st Source Bank (1st Source), with assets of \$8.4 billion as of June 30, 2023, is headquartered in South Bend, Indiana. It is organized under a one-bank holding company, 1st Source Corporation, which also has assets of \$8.4 billion, as of June 30, 2023. The holding company also owns one active non-bank subsidiary, 1st Source Master Trust. As of June 30, 2023, the bank had approximately \$6.2 billion in loans and \$7.0 billion in deposits. As shown in the table below, the bank is primarily a commercial lender, with commercial loans representing 81.9 percent of the loan portfolio.

Loan Portfolio Composition As of June 30, 2023		
Loan Product	\$(000s)	% of Portfolio
Commercial	5,090,898	81.9
Residential Real Estate	473,277	7.6
Consumer	296,556	4.8
Other	225,320	3.6
Agriculture	131,613	2.1
Total	6,217,664	100.0

Note: Percentages may not total to 100.0 percent due to rounding.

The bank offers savings accounts and time deposits of various types ranging from shorter-term to longer-term certificates of deposit. Credit products include commercial, residential real estate, agricultural, and consumer loans. The bank offers both mortgages placed in its portfolio and mortgages sold on the secondary market. In addition, the bank participates in a number of federally guaranteed loan programs with the Federal Housing Administration (FHA), U.S. Department of Veterans Affairs (VA), U.S. Small Business Administration (SBA), and the U.S. Department of Agriculture (USDA), including its Farm Service Agency (FSA). Moreover, 1st Source's products include innovative and flexible loans, primarily to facilitate homeownership for non-traditional banking customers.

The bank offers a number of alternative retail delivery services, including mobile banking, internet banking, and automated teller machines (ATMs). Under its Side-by-Side Retail Banking, the bank offers a service in which customers and bankers face the same screen to work through transactions together. In addition, the bank employs numerous customer service and bilingual lending staff, including a dedicated Spanish-speaking financial education coordinator.

The bank's website, www.1stsource.com, provides customers with the ability to open a variety of products online: personal loans, home equity lines of credit (HELOCs), home equity loans, home

improvement loans, credit cards, as well as deposit and checking accounts. Further, the bank’s online banking and bill pay features include traditional online and mobile banking applications as well as bank-to-bank transfers; Zelle allowing transfers between individuals or businesses; Mobile Wallet payment allowing tap-and-pay functionality with participating merchants; and Card Valet allowing customers to set controls over their debit card use. The bank has contracted with the Club 720 application, an all-in-one platform for down payment assistance, credit building, and wealth-building education. Marketing is done through a variety of sources including television, radio, outdoor digital signs, yard banners, direct mail, and newspapers.

The bank is a large interstate bank with branches located in the 12 assessment areas presented in the table below:

Assessment Area	Partial or Full MSA	Full Counties Included
South Bend-Mishawaka, IN-MI MSA #43780	Full	St. Joseph (Indiana), Cass (Michigan)
Elkhart-Goshen, IN MSA #21140	Full	Elkhart
Fort Wayne, IN MSA #23060	Full	Allen, Whitley
Gary, IN MD #23844	Partial	Porter
Michigan City-Laporte, IN MSA #33140	Full	Laporte
Lafayette-West Lafayette, IN MSA #29200	Partial	Tippecanoe
Eastern Non-MSA Indiana	Non-MSA	Huntington, Wells
Northeastern Non-MSA Indiana	Non-MSA	DeKalb
Western Non-MSA Indiana	Non-MSA	Fulton, Kosciusko, Marshall, Pulaski, Starke
Niles-Benton Harbor, MI MSA #35660	Full	Berrien
Kalamazoo-Portage, MI MSA #28020	Full	Kalamazoo
North Port-Sarasota-Bradenton, FL MSA #35840	Partial	Sarasota

During the evaluation period, the bank did not open any new branches but did close a branch in the South Bend-Mishawaka, IN-MI MSA. ATM changes include a new cash-only ATM in a moderate-income tract in the Michigan City MSA, two closed ATMs (one full-service and one cash-only) in middle-income census tracts in the South Bend-Mishawaka, IN-MI MSA, and one closed cash-only ATM in an upper-income census tract in the Niles-Benton Harbor MSA. The bank has also opened two loan production offices (LPO) – one in its delineated Fort Wayne MSA and one in Indianapolis, which is not delineated in the combined assessment area. The LPO in Fort Wayne is located in a moderate-income census tract and operates by appointment-only. In total, the bank has 78 branches, two LPOs, and 100 ATMs with additional ATM availability provided through the bank’s agreements with the Cirrus and Accel networks. Approximately one fifth (21.8 percent), or 17 of the bank’s 78 branches are located in a low- or moderate-income census tract.

The following tables show a breakdown of the bank’s branches in each assessment area by census tract income designation.

Distribution of Branches by Assessment Area and Census Tract Income Designation

Total	1	1.3	16	20.5	41	52.6	19	24.4	78	100.0
*One branch in Fort Wayne, IN MSA is located in census tracts designated as unknown-income reflected in the total number.										

There are no known legal, financial, or other factors impeding the bank’s ability to help meet the credit needs in its communities.

At its previous evaluation conducted on June 7, 2021, the bank was rated **Outstanding** under the CRA.

SCOPE OF THE EXAMINATION

1st Source Bank’s CRA performance was evaluated using the Federal Financial Institution Examination Council’s (FFIEC) Large Institution CRA Examination Procedures. The CRA performance evaluation assesses the bank’s responsiveness and effectiveness in meeting the credit and community development needs in its assessment areas. The bank’s performance was evaluated within the context of information about the institution including asset size, financial condition, market presence of other financial institutions, the combined record of aggregate lenders in each assessment area, as well as local economic and demographic characteristics.

Assessment areas chosen for full-scope review evaluations were selected based on the bank’s presence in the assessment area, the needs of communities located in the assessment areas, and consideration of the level of review applied during previous performance evaluations. The following presents the full- and limited-scope review assessment areas selected as part of the current evaluation.

Full-Scope Review:

- South Bend-Mishawaka, IN-MI MSA #43780 (South Bend-Mishawaka, IN-MI MSA)
- Elkhart-Goshen, IN MSA #21140 (Elkhart-Goshen, IN MSA)
- Fort Wayne, IN MSA #23060 (Fort Wayne, IN MSA)
- Western Non-MSA Indiana
- Niles-Benton Harbor, MI MSA #35660 (Niles-Benton Harbor, MI MSA)
- North Port-Sarasota-Bradenton, FL MSA #35840 (North Port-Sarasota-Bradenton, FL MSA)

Limited-Scope Review:

- Gary, IN MD #23844 (Gary, IN MD)
- Michigan City-Laporte, IN MSA #33140 (Michigan City-Laporte, IN MSA)
- Lafayette-West Lafayette, IN MSA #29200 (Lafayette-West Lafayette, IN MSA)
- Eastern Non-MSA Indiana
- Northeastern Non-MSA Indiana
- Kalamazoo-Portage, MI MSA #28020 (Kalamazoo-Portage, MI MSA)

The full-scope review assessment areas are the only assessment areas given consideration when assessing the bank's ratings. Assessment areas under limited-scope review were evaluated for consistency with the bank's overall performance. Performance in the South Bend-Mishawaka, IN-MI MSA #43780 received the greatest weight in the analysis as it is the bank's primary market, the bank is the deposit market leader in the MSA, and a plurality (29.5 percent) of all branches are in this MSA. The Fort Wayne, IN MSA #23060 and the Elkhart – Goshen, IN MSA #21140 also received greater weight in the analysis as in aggregate they comprise of 23.0 percent of the branches and are the largest markets for the bank in the state of Indiana; the bank's primary state of operations.

Lending analysis was based on 2021 and 2022 Home Mortgage Disclosure Act (HMDA)- and CRA-reportable loans, specifically mortgage originations and loans to small businesses. CRA-reportable small business loans received greater weight in the analysis as they serve as the bank's primary loan product. Also, the narrative analysis to evaluate the bank's performance focused on the more recent 2022 figures; 2021 figures were used for comparison purposes. Tables for 2022 lending data are included in each of the assessment area discussions, while 2021 lending data tables are included in Appendix A of this evaluation.

Performance within all assessment areas was evaluated using the following performance standards:

- **Level of Lending Activity:** The bank's HMDA-reportable and CRA-reportable loans, originated from January 1, 2021, through December 31, 2022, were reviewed to determine the responsiveness to credit needs in the assessment areas.

- ***Lending in the Assessment Area:*** HMDA-reportable and CRA-reportable loans, originated from January 1, 2021, through December 31, 2022, were analyzed to determine the percentage of loans originated in the bank's combined assessment area.
- ***Geographic Distribution of Lending in the Assessment Area:*** HMDA-reportable and CRA-reportable small business loans, originated from January 1, 2021, through December 31, 2022, were analyzed to determine the extent to which the bank is lending in census tracts of different income levels, particularly those designated as low- or moderate-income.
- ***Lending to Borrowers of Different Incomes and to Businesses of Different Sizes:*** HMDA-reportable and CRA-reportable loans originated from January 1, 2021, through December 31, 2022, were analyzed to determine the distribution among borrowers of different income levels, particularly low- or moderate-income borrowers, and to businesses of different revenue sizes.
- ***Community Development Lending:*** The number, dollar volume, innovativeness and complexity of community development loans originated from June 8, 2021, through September 25, 2023, were reviewed.
- ***Innovative or Flexible Lending Practices:*** The degree to which the bank uses innovative and flexible lending practices to address the credit needs of low- and moderate-income individuals or geographies and small businesses and farms was assessed.
- ***Investments:*** Qualified investments and grants from June 8, 2021, through September 25, 2023, were reviewed to determine the bank's responsiveness to community development needs. Qualified investments were also evaluated to determine the bank's use of innovative or complex investments.
- ***Services:*** The distribution of the bank's branch offices, banking services, hours of operation, availability of loan and deposit products, and the extent and innovativeness of community development services were reviewed from June 8, 2021, through September 25, 2023.

In addition, 12 community representatives were contacted in connection with this examination to provide information regarding local economic and socio-economic conditions in the assessment area. Refer to individual assessment area summaries for community representative information.

CONCLUSIONS WITH RESPECT TO PERFORMANCE CRITERIA

LENDING TEST

1st Source Bank's performance relative to the lending test is rated Outstanding. Factors

contributing to the rating include: lending activity reflects excellent responsiveness to assessment area credit needs; a small percentage of loans were originated in the bank’s assessment area; loans reflect good geographic distribution throughout the bank’s assessment area, including low- and moderate-income geographies; the bank demonstrates an adequate distribution of loans among individuals of different income levels and businesses of different revenue sizes; the bank has excellent responsiveness to credit and community development needs of low-income individuals and very small businesses; the bank is a leader in making community development loans; and the bank makes extensive use of innovative and/or flexible lending practices to address the credit needs of low- or moderate-income individuals or geographies.

Level of Lending Activity

1st Source Bank’s lending levels reflect excellent responsiveness to credit needs in its assessment area, considering the number and amount of home mortgage, small business, and small farm loans extended in 2021 and 2022.

During 2021 and 2022, the bank originated 48,129 HMDA- and CRA-reportable loans, of which 9.6 percent were HMDA-reportable, 89.2 were CRA-reportable small business loans, and 1.1 percent were CRA-reportable small farm loans. This indicates the bank continues to be a predominately commercial lender. The following table presents the bank’s level of lending activity across the combined assessment area during the review period.

Summary of Lending Activity				
January 1, 2021 – December 31, 2022				
Loan Type	#	%	\$(000s)	%
Home Improvement	951	2.0	53,941	1.4
Home Purchase	1,197	2.5	314,103	8.2
Multi-Family Housing	8	0.0	47,856	1.3
Refinancing	2,395	5.0	372,775	9.7
Loan Purpose NA	82	0.2	2,259	0.1
Total HMDA Reportable	4,633	9.6	790,934	20.7
Total Small Business Reportable	42,943	89.2	2,956,567	77.3
Total Small Farm Reportable	553	1.1	76,326	2.0
Total Loans	48,129	100.0	3,823,827	100.0
<i>Note: Percentages may not total to 100.0 percent due to rounding.</i>				

The 2021 and 2022 CRA Loan Application Register (LAR) represents all of the eligible small business and small farm loans the bank originated. The level of lending activity since the previous evaluation represents a significant increase by both the number of loans and the dollar volume of small business loans, because small business loans were previously being reported as combined originations when originated to the same business. The difference in origination numbers was largely isolated to clients in the bank’s national car rental agency and construction equipment portfolios.

To better compare the bank’s level of lending activity across the combined assessment area during the review period to the previous review period, the following table excludes the bank’s national car rental agency and construction equipment portfolios.

Summary of Lending Activity				
National Car Rental, Construction Equipment, Renewal Loans Excluded				
January 1, 2021 – December 31, 2022				
Loan Type	#	%	\$(000s)	%
Home Improvement	951	6.8	53,941	3.1
Home Purchase	1,197	8.6	314,103	17.8
Multi-Family Housing	8	0.1	47,856	2.7
Refinancing	2,395	17.1	372,775	21.1
Loan Purpose NA	82	0.6	2,259	0.1
Total HMDA Reportable	4,633	33.2	790,934	44.8
Total Small Business Reportable	8,923	63.8	927,091	52.5
Total Small Farm Reportable	419	3.0	47,608	2.7
Total Loans	13,975	100.0	1,765,633	100.0
<i>Note: Percentages may not total to 100.0 percent due to rounding.</i>				

The bank made 13,975 HMDA- and CRA-reportable loans, excluding the national car rental and construction equipment loans, during the review period totaling \$1.8 billion. Rising interest rates in late 2021 and 2022 caused lending overall to decline since the previous evaluation. At the previous evaluation, which considered lending from calendar year 2019 and 2020, the bank made 14,712 HMDA-reportable and CRA-reportable small business loans during the review period totaling \$2.0 billion. HMDA-reportable loans have declined by 15.2 percent by number (from 5,462 to 4,633) while small business reportable loans have declined by a smaller rate, 3.5 percent (from 9,250 to 8,923). Furthermore, dollar volume originations for small business loans declined by 9.8 percent. All categories of HMDA-reportable loans declined in origination numbers except for home improvement loans, which saw an increase of 46.1 percent by volume. Refinances continue to make up the largest portion of the bank’s HMDA-reportable loans at 17.1 percent this evaluation and 22.2 percent at the previous evaluation. Additionally, in 2021, approximately one third of all HMDA loans were refinance loans, due to the low-interest rate environment. Community representatives across assessment areas stated home prices are rising due to inflation, and there are

inventory shortages due to the low rates acquired by many borrowers in the strong refinance market in 2019 and 2020.

Assessment Area Concentration

1st Source Bank made a small percentage of loans in its assessment area. The bank originated 26.5 percent of its loans by number and 43.8 percent by dollar amount inside its assessment area. Small business loan performance was 18.6 percent by number and 31.9 percent by dollar volume, which was significantly below the very high level of HMDA originations at 91.8 percent by number and 83.4 percent by dollar amount. Small farm reportable loans represented a much smaller proportion of total loans, but also had a significantly higher percentage inside the assessment area, at 91.9 percent by number and 92.7 percent by dollar amount.

The following table summarizes the bank’s lending inside and outside its assessment areas for HMDA-reportable and CRA-reportable (small business and small farm) loans from January 1, 2021, through December 31, 2022.

Lending In & Out of the Assessment Area January 1, 2021 – December 31, 2022								
Loan Type	Inside				Outside			
	#	%	\$(000s)	%	#	%	\$(000s)	%
Home Improvement	893	93.9	48,226	89.4	58	6.1	5,715	10.6
Home Purchase – Conventional	964	85.5	236,901	77.9	163	14.5	67,104	22.1
Refinancing	2,242	93.6	338,507	90.8	153	6.4	34,268	9.2
Multi-Family Housing	7	87.5	23,219	50.6	1	12.5	23,637	49.8
Home Purchase – FHA	59	92.2	8,342	92.3	5	7.8	694	7.7
Home Purchase – VA	6	100.0	1,062	100.0	0	0.0	0	0.0
Loan Purpose Not Applicable	82	100.0	2,259	100.0	0	0.0	0	0.0
Total HMDA Reportable	4,253	91.8	659,516	83.4	380	8.2	131,418	16.6
Total Small Business Reportable	7,971	18.6	943,788	31.9	34,972	81.4	2,012,779	68.1
Total Small Farm Reportable	508	91.9	70,771	92.7	45	8.1	5,555	7.3
Total Loans	12,732	26.5	1,674,075	43.8	35,397	73.5	2,149,752	56.2

Note: Percentages may not add up to 100.0 due to rounding.

In prior years, including the years used to analyze lending in and out of the assessment area for the previous CRA performance evaluation, the bank excluded a substantial number of commercial loans, resulting in the under reporting distinct loan renewals made to small businesses as separate originations, as required by Regulation BB – Community Reinvestment. The difference in originations was largely isolated to clients in the bank’s national car rental agency and construction equipment portfolios.

To better compare the bank’s lending in and out of the assessment area across the combined assessment area during the review period to the previous review period, the following table excludes the bank’s national car rental agency and construction equipment portfolio loans.

Lending In & Out of the Assessment Area National Car Rental, Construction Equipment, Renewal Loans Excluded January 1, 2021 – December 31, 2022

Total Small Farm Reportable	386	92.1	43,811	92.0	33	7.9	3,797	8.0
Total Loans	10,281	73.6	1,312,597	74.3	3,694	26.4	453,036	25.7
<i>Note: Percentages may not add up to 100.0 due to rounding.</i>								

With the national car rental agency, construction equipment, and renewal portfolios excluded, the bank originated a high percentage of loans in its assessment area. Specifically, the total amount of loans increases to 73.6 percent by number and 74.3 percent by dollar amount inside its assessment area during the review period of 2021 and 2022. The small business loan performance at 63.2 percent by number and 65.7 percent by dollar volume was still below the very high level of HMDA originations at 91.8 percent by number and 83.4 percent by dollar amount. The bank’s overall performance is comparable with the previous evaluation where 75.9 percent of total loans by number, and 78.3 percent of total loans by dollar were originated in the assessment area.

Because the concentration rate is influenced so greatly by the inclusion of the national car rental agency and construction equipment loans, this component of the lending test received lesser weight than the other lending test components.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects good penetration throughout the combined assessment area. The bank had a high percentage of geographic loan dispersion in each of the assessment areas, including loans originated in 99.0

percent of its census tracts in its primary and most weighted market (South Bend-Mishawaka, IN-MI MSA). Due to the low percentage of agricultural loans in the bank's portfolio, small farm loans were not considered in the geographic distribution rating. Please refer to the state and individual assessment area summaries for further detail.

The distribution of borrowers reflects overall adequate penetration among customers of different income levels and businesses of different sizes in the combined assessment area. The bank's performance was equivalent to aggregate lender performance to low- and moderate-income borrowers and small businesses. Due to the low percentage of agricultural loans in the bank's portfolio, small farm loans were not considered in the borrower distribution rating. Please refer to the state and individual assessment area summaries for further detail.

1st Source Bank exhibits an excellent record of serving the credit needs of highly economically disadvantaged geographies in its assessment areas, low-income individuals, or businesses with gross annual revenues of \$1 million or less, consistent with safe and sound operations.

1st Source Bank makes extensive use of innovative and flexible loan products across all branches, with some specialty programs available in only certain assessment areas. However, the bank had a significant drop, 75.0 percent, in innovative and flexible lending since the last evaluation. At the previous evaluation, the bank originated \$161.6 million dollars in innovative and flexible loan products, excluding 2020 Paycheck Protection Program (PPP) loans, while in 2021 and 2022, the bank originated \$41.2 million in the same programs.

The greatest contributing factor of the decline in these lending programs was the overall decrease in SBA loans and their demand. In 2019 and 2020, the bank originated 519 SBA loans totaling \$121.2 million dollars, while in 2021 and 2022, the bank originated 77 SBA loans totaling \$16.3 million dollars. The demand for SBA loans was high during the pandemic and the rate environment precipitated by it. The average SBA loan amount did decrease from approximately \$234,000 to approximately \$212,000, demonstrating a willingness from the bank to make smaller dollar loans.

Though lending was down in most of the innovative and flexible loan programs, the Community Development Mortgage continues to be an area of growth for the bank, with the program originating 15.1 percent more loans by number and 50.2 percent more loans by dollar this evaluation period compared to the previous evaluation. The bank has invested resources into this program, including dedicating a full-time loan officer to it. The loan officer travels throughout the assessment areas to educate borrowers on the program. The bank has also introduced new innovative and flexible lending programs since the last exam such as the Title IX Loan Program (Fort Wayne only) and Minority Business Program.

Lending volumes for each activity are detailed in the following table accompanied by a short description of each program.

Innovative and Flexible Lending Programs 2021 and 2022		
Loan Program	Number of Loans	Dollar Amount
Small Business Administration Programs	77	\$16,314,729
Farm Service Agency/USDA Guaranteed Farm Loans	5	\$1,747,500
Community Development Mortgage	84	\$9,439,841
Community Homebuyers Corporation (South Bend Only)	18	\$1,763,920
Habitat for Humanity Mortgage Purchase Program	81	\$2,237,807
Habitat for Humanity Mortgage Origination Program	15	\$2,432,600
Credit Builder Program	653	\$789,350
Pathfinder Services Auto Loan Program	11	\$96,374
Federal Home Loan Bank of Indianapolis Program	109	\$898,466
Healthcare Financing Program	62	\$460,035
Unsecured Home Improvement Loans	516	\$2,713,266
Loan Reclamation Program	47	\$1,003,549
Title IX Loan Program (Fort Wayne Only)*	4	\$580,416
USDA Mortgage*	2	\$342,423
2022 Hurricane Relief Loan Program (Sarasota Only)*	2	\$200,000
Minority Business Builder Loan Program*	12	\$110,000
4H Loan Program*	13	\$34,871
Total	1,711	\$41,165,147
2021 Paycheck Protection Program (PPP)	3,236	\$261,313,810
Total with PPP	6,632	\$343,574,362
<i>*Denotes a program that is new since the last evaluation or being evaluated for the first time.</i>		

SBA Loans: 1st Source is a preferred lender with SBA, enabling it to process applications for the 7(a), 504, Express and Small Loan Advantage programs. The bank has been a Gold Star SBA lender for the last ten years and has a dedicated SBA department. The bank's participation in this program allows borrowers who may not otherwise qualify for small business credit to obtain such financing through the bank.

FSA/USDA Loans: The bank offers these federally guaranteed loans to farmers and agricultural borrowers who may not otherwise qualify for credit. The bank started offering the USDA Mortgage to rural consumers in 2021.

Community Development Mortgage: This program provides credit opportunity for first time homebuyers that earn less than 80 percent of median family income who may not be able to demonstrate creditworthiness through traditional means, such as credit reports. The bank is not only willing to accept non-traditional proof of creditworthiness, but it also provides down payment assistance through the Federal Home Loan Bank assistance program.

Community Homebuyers Corporation (CHC): The bank closes Community Development Block Grant loans on behalf of CHC. These provide down payment and closing cost assistance to first time homebuyers in the bank's South Bend-Mishawaka, IN-MI assessment area.

Habitat for Humanity (Habitat) Mortgage Purchase Program: 1st Source purchases mortgage loans from Habitat affiliates, providing the funds needed to build additional affordable homes across the bank's assessment areas.

Habitat for Humanity Mortgage Origination Program: The bank originates and services all such loans originated by Habitat for Humanity to support affordable housing needs. Habitat has fewer resources available to dedicate to mortgage servicing.

Credit Builder Program: The bank provides small dollar loans, secured by certificates of deposit, to banking customers wishing to build traditional credit. This program is of particular responsiveness to non-traditional banking customers who need assistance in entering financial markets.

Pathfinder Services Auto Loan Program: In this partnership, the bank works with Indiana nonprofit, Pathfinder Services, to guarantee loans of up to \$10,000 (as of 2023) to purchase used vehicles.

Federal Home Loan Bank (FHLB) of Indianapolis: 1st Source and FHLB partner on programs to facilitate homeownership and home repair in the combined assessment area.

- Affordable Housing Program (AHP): Provides funding for borrowers purchasing, rehabilitating, or constructing affordable rental housing.
- Homeownership Opportunities Program (HOP): Provides down payment and closing cost assistance to low- and moderate-income (LMI) first time homebuyers.
- Neighborhood Impact Program (NIP): Provides grants of up to \$7,500 for LMI homeowners to make repairs and rehabilitate their homes.
- Accessibility Modifications Program (AMP): Provides grants of up to \$15,000 for LMI homeowners, who are also seniors or disabled, for construction of accessibility features to accommodate homeowners' physical challenges.
- Home Boost: Pilot Special Purpose Credit Program opened September 5, 2023, that provides \$15,000 of down payment assistance for first-time minority homebuyers with household income up to 120 percent Area Median Income (AMI).

Elevate Program: Another FHLB of Indianapolis program but focused on providing up to \$20,000 to a small business with revenues under \$1 million; three small businesses received \$57,495 in 2021 and 2022.

Healthcare Financing Program: This product is to individuals facing challenges with medical expenses. Loans cover the costs of copays and other out-of-pocket medical fees.

Unsecured Home Improvement Loans: This flexible loan product carries an interest rate below that of standard unsecured loans and allows for the use of non-traditional credit for underwriting purposes.

Loan Reclamation Program: The bank offers loan restructuring program discussions for all customers whose loan payments are 15 or more days in arrears.

Paycheck Protection Program (PPP): Made available through the existing U.S. Small Business Administration (SBA) 7(a) lending program to provide forgivable loans to help small businesses maintain payrolls during the COVID-19 pandemic.

Title X Loan Program: Revolving loan fund created by the City of Fort Wayne and is designed to mimic the SBA 504 program. This program is available to most for-profit businesses located in Allen County, Indiana.

Hurricane Relief Program: Program developed to assist Sarasota County, Florida homeowners impacted by 2022 Hurricane Ian.

Minority Business Builder Loan Program: A Special Purpose Loan Program developed to provide loans up to \$10,000, with special terms to help with working capital and fixed asset purchases.

4H Loan Program: A cattle purchase program the bank created for 4H minors and their parents.

Community Development Lending

1st Source Bank is a leader in making community development loans. During the evaluation period the bank originated 197 loans totaling \$510.8 million throughout its combined assessment area. When compared to the previous evaluation of 374 loans totaling \$709.1 million, the bank decreased the number of loans by 47.3 percent and the dollar volume by 28.0 percent; however, a difference in review time periods and the availability of the Paycheck Protection Program (PPP) also needs to be considered. The previous evaluation included loans from the 2020 and 2021 rounds of the PPP in response to the COVID-19 pandemic which totaled 90 loans for \$85.3 million. When excluding

the PPP loans from the comparison and comparing loans from the 36-month time period of the previous evaluation period and the 28-month period of the current evaluation, the dollar volume by monthly average increased slightly by 5.3 percent. The ratio of community development loans to the bank's asset size is approximately 6.1 percent. The bank provided a qualified community development loan in every assessment area except the North Port-Sarasota-Bradenton, FL MSA assessment area, where the bank's presence is limited to one branch and the market is highly competitive.

As mentioned above, the bank makes extensive use of innovative and flexible loan products across all branches. Several of these programs address affordable housing needs in the assessment area, which is particularly responsive as community representatives from all full-scope assessment areas noted it as an area of need. Of note, the bank made 84 community development mortgages totaling \$9.4 million and 81 Habitat for Humanity Mortgage Purchase Program loans totaling \$2.2 million.

The majority of the bank's community development loans in this evaluation period went towards revitalization/stabilization projects. The following table presents the bank's community development loans throughout its combined assessment area during the review period.

INVESTMENT TEST

1st Source Bank's record of performance relative to the Investment Test is High Satisfactory based on a significant level of qualified investments in the assessment area, particularly those that are not routinely provided by private investors, occasionally in a leadership position. These investments demonstrate the significant use of innovative or complex qualified investments and provide excellent responsiveness to the credit and community development needs of the assessment area.

During the evaluation period, the bank originated approximately \$38.0 million in current period investments. The majority of the bank's current period investments were directed towards investing in mortgage-backed securities for affordable home loan financing and community service municipal bonds. Complex and innovative investments include Low-Income Housing Tax Credits (LIHTC) which benefit low-and moderate-income individuals. These investments demonstrate the use of innovative and complex qualified investments and provide excellent

responsiveness to the credit and community development needs of the assessment area, as affordable housing was noted as a need by community representatives from all full-scope assessment areas. In addition to current period investments, the bank maintained \$42.9 million in prior period investments and maintained \$16.2 million in total unfunded investments. Overall, the bank originated and/or maintained a total of \$80.9 million in current and prior period investments across its combined assessment area. The bank had a qualified investment in every individual assessment area.

The following table presents the bank's community development investments throughout its combined assessment area during the review period.

In addition, 1st Source Bank distributed a total of \$3.4 million in qualified grants and donations in the current evaluation period. The donations were made to organizations which serve a variety of purposes including those focused on affordable housing, community service, economic development, and revitalization/stabilization. When compared to the previous evaluation, in which \$3.8 million of grants and donations were disbursed, total giving decreased by 10.0 percent. However, considering the differences between the 36-month period of the previous evaluation and the 28-month period of this evaluation, the monthly averages were \$104,624 and \$121,086, respectively. This equates to the monthly average increasing by 15.7 percent. The bank provided

591 individual donations, and the largest donation provided during the evaluation period was to an economic development organization for \$125,000. The bank provided a grant or donation in every individual assessment area. Please refer to the individual assessment area sections of the performance evaluation for additional detail on community development investments, grants, and donations.

The following table presents the bank’s community development donations throughout its combined assessment area during the review period.

SERVICE TEST

1st Source Bank's performance relative to the Service Test is rated High Satisfactory based on the following major factors in the assessment areas that contributed to the rating: delivery systems are accessible to the bank's geographies and individuals of different income levels in the combined assessment area; the bank's record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and individuals; services do not vary in a way that inconveniences the assessment area, particularly LMI geographies and individuals; and the bank provides a relatively high level of community development services.

Retail Services

The bank's retail delivery services are accessible to geographies and individuals of different income levels in its assessment area. To the extent changes have been made, its record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly in low- or moderate-income geographies or to low- or moderate-income individuals. Its services (including business hours) do not vary in a way that inconveniences its assessment area, particularly low- or moderate-income geographies or low- or moderate-income individuals. In total, the bank has 78 branches, two LPOs, and 100 ATMs with additional ATM availability provided through the bank's agreements with the Cirrus and Accel networks. Approximately one fifth, or 21.8 percent (17) of the bank's 78 branches are located in a low- or moderate-income census tract. The bank offers a number of alternative retail delivery services, including mobile banking, and internet banking through the bank's website, www.1stsource.com. The website provides customers with the ability to open a variety of products online: personal loans, home equity lines of credit (HELOCs), home equity loans, home improvement loans, credit cards, as well as deposit and checking accounts. Further, the bank's online banking and bill pay features include traditional online and mobile banking applications as well as bank-to-bank transfers; Zelle allowing transfers between individuals or businesses; Mobile Wallet payment allowing tap-and-pay functionality with participating merchants; and Card Valet allowing customers to set controls over their debit card use.

Community Development Services

1st Source Bank provides a relatively high level of community development services. During the review period, the bank provided 5,905 hours of community development service hours. This is below its performance at the previous evaluation during which time it provided 7,760 community development service hours. When comparing service hours by the 36-month time period of the previous evaluation period and the 28-month period of the current evaluation, the decrease was only 2.2 percent. The bank provided service hours in every assessment area except the Northeastern Non-MSA Indiana assessment area, where the bank's presence is limited to one

branch, and the assessment area includes one rural county (DeKalb) with few opportunities. The bank’s services were highly responsive to assessment area needs, with a large portion supporting financial education benefiting low- and moderate-income individuals and geographies, as well as small businesses.

The following table presents the bank’s community development service hours throughout its combined assessment area during the review period.

FAIR LENDING OR OTHER ILLEGAL CREDIT PRACTICES REVIEW

No evidence of discriminatory or other illegal credit practices inconsistent with helping to meet community credit needs was identified.

SOUTH BEND-MISHAWAKA, IN-MI MSA – Full Review

CRA RATING FOR South Bend-Mishawaka, IN-MI MSA: OUTSTANDING

The Lending Test is rated: Outstanding

The Investment Test is rated: High Satisfactory

The Service Test is rated: High Satisfactory

1st Source Bank's overall performance in the South Bend-Mishawaka IN-MI MSA #43780 is Outstanding.

The bank's performance relative to the Lending Test is Outstanding. The bank displays a good geographic distribution of loans in its assessment area. The bank demonstrates adequate distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the bank. The bank exhibits an excellent record of serving the credit needs of highly economically disadvantaged areas in the assessment area, as well as low-income individuals consistent with safe and sound operations. The bank demonstrates an extensive use of innovative and flexible practices in a safe and sound manner to address the credit needs of low- and moderate-income individuals or geographies. The bank is a leader in making community development loans.

1st Source Bank's record of performance relative to the Investment Test in the South Bend-Mishawaka, IN-MI MSA is High Satisfactory based on a significant level of qualified community development investments and grants, particularly those that are not routinely provided by private investors, occasionally in a leadership position. These investments demonstrate the extensive use of innovative or complex qualified investments and provide excellent responsiveness to the credit and community development needs of the assessment area.

1st Source Bank's performance relative to the Service Test is High Satisfactory based on the following factors: delivery systems are accessible to the bank's geographies and individuals of different income levels in the assessment area; services do not vary in a way that inconveniences the needs of its assessment area, particularly low- and moderate-income geographies and/or low and moderate-income individuals; record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and low- and moderate-income individuals; and the bank is a leader in providing community development services.

SCOPE OF THE EXAMINATION

1st Source Bank’s operations in the South Bend-Mishawaka, IN-MI MSA received a full-scope review. The scope of examination is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN SOUTH BEND-MISHAWAKA, IN-MI MSA #43780

The South Bend-Mishawaka, IN-MI MSA consists of St. Joseph County in Indiana and Cass County in Michigan, in their entireties, which is unchanged from the previous evaluation. The physical delineation of the assessment area has not changed but the census tract designations have. There are a total of 97 census tracts comprised of nine low-, 23 moderate-, 37 middle-, 27 upper-income census tracts, along with one unknown-income census tract. This represents a change from the previous evaluation due to census tract designation changes where the assessment area contained 86 census tracts comprised of 11 low-, 19 moderate-, 37 middle-, and 19 upper-income census tracts. The unknown census tract is Notre Dame University’s campus.

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau’s American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

Census Tract Designation Changes			
American Community Survey Data (ACS)			
Tract Income Designation	2021 Designations (#)	2022 Designations (#)	Net Change (#)

The South Bend-Mishawaka, IN-MI MSA is 1st Source Bank's primary market. The bank operates its main office, 22 branches, and 36 Automated Teller Machines (ATMs) (25 full-service and 11 cash-only) in this assessment area. There are no branches in low-income census tracts. Approximately 26.1 percent of these branches (6 of 23) and 30.6 percent of ATMS (11 of 36) are in moderate-income census tracts. The main office is now located in a moderate-income census tract wherein the previous evaluation, the main office's census tract designation was low-income. Approximately 47.8 percent of the branches (11 of 23) and 47.2 percent of the ATMs (17 of 36) are in middle-income census tracts. Lastly, 26.1 percent of these branches (6 of 23) and approximately 22.2 percent of these ATMs (8 of 36) are in upper-income census tracts. One branch, located on a college campus, was closed in 2023. Two ATMs (one full-service and one cash-only), both in middle-income census tracts, closed in 2022.

The Federal Deposit Insurance Corporation (FDIC) market share report, as of June 30, 2022, ranked 1st Source first among 16 institutions serving the assessment area. The bank had a majority of deposits in the MSA, with 50.2 percent of the market share. This is substantially higher than the number two and three market shareholders, PNC Bank N.A. and Lake City Bank, which held 8.8 percent and 8.1 percent of the market share, respectively. Deposits in this assessment area represent 45.0 percent of the bank's overall deposit totals.

In 2022, the bank was ranked second in the number of HMDA-reportable originations out of 327 institutions, with 627 originations. The market leader was Notre Dame Credit Union with 921 originations. In 2022, the bank ranked fourth among 93 CRA reporters with 449 originations, while the market leader, American Express, originated 848 loans followed by JP Morgan Chase Bank N.A. with 833 originations.

Information regarding census related and business demographic characteristics of the assessment area is provided in the following table.

Population Characteristics

The following table presents the population trends for the assessment area, counties which make up the assessment area, the state of Indiana, and the state of Michigan. As indicated by the 2020 U.S. Census Bureau, St. Joseph County, Indiana experienced a 2.1 percent population gain since 2015, while Cass County, Michigan experienced a 0.7 percent decline in the same period. The overall assessment area (South Bend-Mishawaka, IN-MI MSA) experienced a modest gain in population of 1.7 percent. The assessment area’s population growth was comparable to the entire state of Michigan, but lower than the state of Indiana. According to a community representative, the metro area’s population has been stable for several years, but there has been some intra-county movement in St. Joseph County, away from the principal city of South Bend, Indiana and into small communities such as New Carlisle, North Liberty, and Lake City, Indiana.

Population Change			
Area	2015 Population	2020 Population	Percent Change (%)
Assessment Area	319,198	324,501	1.7
St. Joseph County, Indiana	267,246	272,912	2.1
Cass County, Michigan	51,952	51,589	-0.7
State of Indiana	6,568,645	6,785,528	3.3
State of Michigan	9,900,571	10,077,331	1.8

Income Characteristics

Based upon 2022 FFIEC Census Data, the South Bend-Mishawaka, IN-MI MSA had 37.9 percent of its families by family income classified as either low- (20.3 percent) or moderate-income (17.6 percent). The percentage of families residing within the assessment area that live below the poverty line is 10.4 percent, which is above the state of Michigan rate of 9.2 percent and the state of Indiana rate of 8.9 percent.

According to 2016-2020 American Community Survey data, the median family income (MFI) for St. Joseph and Cass Counties were \$70,508 and \$69,948, respectively, with both counties experiencing increases from 2015. The overall assessment area rate of increase of 11.7 percent was driven mostly by the increases seen in Cass County (13.9 percent). Cass County’s MFI grew faster than the state of Michigan as a whole (11.0 percent) but remains \$5,552 (in 2020 dollars) or 7.3 percent lower than the state of Michigan as a whole. The assessment area and St. Joseph County, Indiana both grew at a faster rate than the state of Indiana as a whole at 9.7 percent. One community representative noted that income in the area is stable. The majority (81.3 percent) of the 78,366 families residing in the assessment area live in St. Joseph County. It should be further noted that the MFI for low-

income families is defined as 50.0 percent or less of MFI, moderate-income as between 50.0 and 80.0 percent of MFI, middle-income as between 80.0 and 120.0 percent of MFI, and upper-income as greater than 120.0 percent of MFI. Please refer to the Appendix D: Glossary for a definition of the various income definitions used in this evaluation.

The following table compares the median family income (MFI) for the assessment area, the counties that makeup the assessment area, and the states of Indiana and Michigan.

Median Family Income Change			
Area	2015 Median Family Income (\$)	2020 Median Family Income (\$)	Percent Change (%)
Assessment Area	63,033	70,437	11.7
St. Joseph County, Indiana	63,496	70,508	11.0
Cass County, Michigan	61,409	69,948	13.9
State of Indiana	66,777	73,265	9.7
State of Michigan	68,010	75,470	11.0
<i>Source: 2011 - 2015 U.S. Census Bureau American Community Survey 2016 - 2020 U.S. Census Bureau American Community Survey Median Family Incomes have been inflation-adjusted and are expressed in 2020 dollars.</i>			

Housing Characteristics

Based upon 2022 FFIEC Census Data, the assessment area includes 143,456 housing units; the majority are owner-occupied, representing 61.4 percent of the units, followed by 26.1 percent rental units, and 12.4 percent vacant housing units. The median age of housing stock in the assessment area is 59 years, which is older than the average in both the state of Indiana as a whole (46 years) and the state of Michigan as a whole (49 years).

The following table displays the housing cost burden of renters and homeowners in the assessment area, the counties that make up the assessment area, the state of Indiana, and the state of Michigan. The cost burden is a measure of affordability via a comparative analysis of individuals of different income levels that spend 30.0 percent or more of their income on housing costs. Renters across all income levels in the assessment area experience this burden at 40.2 percent. Owners across all income levels in the assessment area experience this burden at a much lower level, at 15.1 percent. Low-income renters are the most cost burdened group in all geographies analyzed, with Cass County, Michigan having the lowest relative rate of cost burdened renters at 66.6 percent. Moderate-income renters in all geographies are relatively less cost burdened than all renters, with Cass County, Michigan again having the lowest relative rate of cost burdened renters at 21.5 percent. Low-income homeowners are the most burdened in the state of Michigan as a whole. The assessment area and the geographies compared are generally comparable in cost-burdened rates.

According to FFIEC HMDA loan and application records, home mortgage trends reflect increases in home mortgage activity in 2021 and 2022 across the assessment area and broader region. These trends suggest a continued increase in demand for home purchases, driving up home values and indicating that housing cost burden will remain elevated. According to the 2020 U.S. Census, the assessment area had a median housing value of \$138,216 and median gross rent of \$817.

A community representative stated that all types of affordable housing are a major need, but there have been government incentives that have increased supply. The community representative also stated residents are supportive of this government intervention, while they have seen opposition to these types of programs in other more rural counties. One initiative to get more single-family homes built that St. Joseph County has worked on is to bring national home builders to the area to bring costs down, as previously the area only had local and smaller regional builders.

Housing Cost Burden						
Area	Cost Burden (%) - Renters			Cost Burden (%) - Owners		
	Low Income	Moderate Income	All Renters	Low Income	Moderate Income	All Owners
Assessment Area	70.4	30.0	40.2	57.1	22.5	15.1
St. Joseph County, Indiana	70.9	31.1	40.7	57.3	20.7	14.7
Cass County, Michigan	66.6	21.5	35.9	56.0	29.5	17.1
State of Indiana	73.3	26.8	41.0	57.2	22.9	15.1
State of Michigan	74.2	31.3	43.2	61.7	26.5	18.2

Cost Burden is housing cost that equals 30 percent or more of household income.

Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy

Employment Characteristics

The following table presents unemployment rates between 2018 and 2022 in the assessment area, the counties that make up the assessment area, the state of Michigan, and the state of Indiana. All geographies have experienced declines in unemployment rates since the COVID-19 pandemic levels in 2020. The unemployment rate in St. Joseph County (3.4 percent) is lower than the unemployment rate in Cass County (4.5 percent), and thus the 3.6 percent unemployment rate in the assessment area is driven more by St. Joseph County’s much larger population. This trend is also seen at the state level, where the state of Indiana has a lower employment rate, 3.0 percent, than the state of Michigan, 4.2 percent. A community representative stated that the state of Michigan had greater COVID-19 pandemic-related restrictions, which may explain the higher unemployment rate in 2020. The representative also stated other state-level employment

differences include Michigan’s large labor union participation and Indiana’s business-friendly policies. Another notable difference in the states is the legalization of marijuana for medical and recreational use in Michigan, causing assessment area businesses to rethink drug policies as stricter drug policies have a harder time recruiting employees.

Unemployment Rates (%)					
Area	2018	2019	2020	2021	2022
Assessment Area	3.6	3.7	8.7	4.7	3.6
St. Joseph County, Indiana	3.5	3.6	8.6	4.6	3.4
Cass County, Michigan	4.1	4.3	9.1	5.1	4.5
State of Indiana	3.4	3.3	7.3	3.9	3.0
State of Michigan	4.2	4.1	10.0	5.8	4.2

Source: Bureau of Labor Statistics (BLS), Local Area Unemployment Statistics

According to the U.S Bureau of Labor Statistics, as of the second quarter of 2022, the largest industries in the assessment area, by number of employees, are healthcare and social services (20,390), manufacturing (15,720), and retail (14,125).

Community Representatives

Two community representatives were contacted, one from an economic development organization and one from an affordable housing organization. Community representatives stated the population of the counties have been stable, although there has been some intra-county movement. Since the COVID-19 pandemic, there has been some movement away from the city and into smaller towns that are doing well, such as Lake City and New Carlisle. Enrollment at the University of Notre Dame is steady, but enrollment at the other secondary institutions is down. Both representatives noted that there is a lack of affordable housing driven by inventory shortage and high construction costs, and that a possible solution would be for a large regional or national builder to come in and start developments. The representatives further added that there is an increasing need for down payment assistance for mortgages to help bridge funding gaps for homeownership. Since the COVID-19 pandemic, the rising interest rates have made homeownership much less affordable. There are some mixed-income housing projects in the City of South Bend. The affordable housing representative stated that mortgage delinquencies were not rising yet, but auto and credit card delinquencies were increasing. The representatives stated small businesses have mostly recovered from the COVID-19 pandemic, especially on the Indiana side of the border.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN SOUTH BEND- MISHAWAKA, IN-MI MSA #43780

LENDING TEST

1st Source Bank's performance relative to the Lending Test in the South Bend-Mishawaka, IN-MI MSA is rated Outstanding based on the following major factors: the geographic distribution of loans reflects good penetration throughout the assessment area; the distribution of borrowers reflects, given the product lines offered, adequate penetration among customers of different income levels and businesses of different sizes; the bank exhibits an excellent record of serving the credit needs of low-income individuals and areas and very small businesses. 1st Source Bank is a leader in making community development loans and the bank makes extensive use of innovative and flexible lending practices in serving assessment area credit needs.

The bank participates in a number of loan programs designed to assist low- and moderate-income borrowers. These include the Community Homebuyers Corporation and Community Development Mortgage loans available to first time home buyers in South Bend which provides eligible participants down payment and closing cost assistance. Portfolio lending on a fixed interest rate loan is available for buyers through the Habitat for Humanity program as well as the use of Federal Home Loan Bank programs, which also provide down payment and closing cost assistance to low- and moderate-income buyers.

Geographic Distribution of Loans

For the purposes of this review, loans made in calendar 2021 and prior were analyzed based on the 2011-2015 American Community Survey income designations data¹. Loans made in calendar years 2022 and after were analyzed based on income designations from the 2016-2020 American Community Survey data.

The bank's lending activities reflect good distribution throughout the assessment area, particularly in low- and moderate-income geographies. In 2022, the bank's rate of home mortgage lending within low-and moderate-income census tracts was deemed good as the bank's performance was comparable to the aggregate lenders and the assessment area demographics, which had changed from 2021 to 2022. Additionally, the bank's performance with respect to small business loans was also good given the bank's performance within low-income census tracts was above aggregate lenders and above the percentage of small businesses but below the aggregate of lenders and the percentage of small business within moderate-income census tracts. The bank's distribution of

¹ The median family income levels (MFI) for census tracts are calculated using income data from the U.S. Census Bureau's American Community Survey and geographic designations from the Office of Management and Budget and are updated approximately every five years. (.12(m) Income Levels)

lending across geographies of different income levels in 2021 within home mortgage and small business loans was mostly consistent with 2022 figures.

For purposes of this analysis, small business loans were used as the primary factor for determining the rating. Additionally, both 2022 and 2021 figures were used to evaluate the bank's performance, though 2022 figures are featured in the narrative and 2021 figures are used to comparison and are detailed in Appendix A. Finally, when determining performance, the comparison to aggregate lender figures was weighted more heavily than the assessment area demographics (percentage of owner-occupied housing units or percentage of small businesses).

A gap analysis was completed as part of the evaluation. In 2022, the bank originated HMDA-reportable loans in 92.8 percent of all census tracts in the assessment area with originations in 55.6 percent of all low-income census tracts and 91.3 percent of all moderate-income census tracts. The bank's performance with respect to small business originations was strong as well, with originations in 89.7 percent of all census tracts in the assessment area, originations in 88.9 percent of low-income census tracts, and originations in 91.3 percent of moderate-income census tracts. Combined, the bank had just one upper-income census tract with no loans and originated loans in 99.0 percent of its census tracts in the assessment area. Based upon this analysis, there were no conspicuous, unexplained lending gaps in the assessment area.

HMDA Reportable Lending

In 2021 and 2022, the bank's rate of HMDA-reportable lending within low- and moderate-income census tracts was good. The bank's 2021 and 2022 HMDA-reportable lending in the assessment area was concentrated in home purchase, refinance, and home improvement loans, which comprised 100.0 percent of the HMDA loans originated. Due to the lack of volume, multi-family loans were not considered within the analysis of HMDA-reportable lending.

Home Purchase Loans

Home purchase loans represented 31.6 percent of the bank's HMDA-reportable loans originated in South Bend-Mishawaka, IN-MI MSA assessment area in 2022. The bank made 1.5 percent of its loans in low-income census tracts, which was comparable to the performance of the aggregate of lenders at 2.8 percent and the demographic of owner-occupied units in low-income census tracts at 3.3 percent. The bank made 17.2 percent of its home purchase loans in moderate-income census tracts which was below the performance of the aggregate of lenders at 21.4 percent and comparable to the 17.6 percent demographic of owner-occupied units in moderate-income census tracts. The bank made 42.4 percent of its home purchase loans, by number, in middle-income census tracts. This was comparable to the aggregate of lenders at 42.8 percent and the 44.2 percent demographic of owner-occupied units in middle-income census tracts. Lastly, in 2022 the bank

made 37.4 percent of its home purchase loans in upper-income census tracts. This was above the aggregate of lenders at 32.6 percent, and the demographic of owner-occupied units in upper-income census tracts at 34.6 percent. The bank's performance in 2021 was consistent with 2022 performance.

Refinance Loans

Refinance loans represented 42.4 percent of the bank's HMDA-reportable loans originated in the South Bend-Mishawaka, IN-MI MSA assessment area in 2022. The bank made 1.5 percent of its loans in low-income census tracts, which was comparable to the performance of the aggregate of lenders at 1.9 percent and comparable to the demographic of owner-occupied units in low-income census tracts at 3.3 percent. The bank made 13.2 percent of its refinance loans in moderate-income census tracts which was comparable to the performance of the aggregate of lenders at 13.9 percent and below the 17.6 percent demographic of owner-occupied units in moderate-income census tracts. The bank made 42.5 percent of its refinance loans, by number, in middle-income census tracts. This was comparable to the aggregate of lenders at 44.8 percent and the 44.2 percent demographic of owner-occupied units in middle-income census tracts. Lastly, in 2022 the bank made 42.5 percent of its refinance loans, by number in upper-income census tracts. This was above the aggregate of lenders at 39.2 percent of such loans by number and the demographic of owner-occupied units in upper-income census tracts at 34.6 percent. The bank's performance in 2021 exceeded 2022 performance. In 2021, the bank made 2.3 percent of its loans in low-income census tracts, which was comparable to the performance of the aggregate of lenders at 2.1 percent and slightly below the demographic of owner-occupied units in low-income census tracts at 4.0 percent. The bank made 8.3 percent of its refinance loans in moderate-income census tracts which was slightly above the performance of the aggregate of lenders at 5.6 percent and below the 12.1 percent demographic of owner-occupied units in moderate-income census tracts.

Home Improvement Loans

Home Improvement loans represented 26.0 percent of the bank's HMDA-reportable loans originated in South Bend-Mishawaka, IN-MI MSA assessment area in 2022. The bank made 1.8 percent of its loans in low-income census tracts, which was comparable to the performance of the aggregate of lenders at 1.7 percent and the demographic of owner-occupied units in low-income census tracts at 3.3 percent. The bank made 18.4 percent of its home improvement loans in moderate-income census tracts which was slightly above the performance of the aggregate of lenders at 15.6 percent and comparable to the 17.6 percent demographic of owner-occupied units in moderate-income census tracts. The bank made 35.0 percent of its home improvement loans, by number, in middle-income census tracts. This was below the aggregate of lenders at 41.8 percent and the 44.2 percent demographic of owner-occupied units in middle-income census tracts. Lastly, in 2022 the bank made 44.8 percent of its home improvement loans, by number, in upper-income

census tracts. This was above the aggregate of lenders at 40.9 percent of such loans by number, and the demographic of owner-occupied units in upper-income census tracts at 34.6 percent. The bank's performance in 2021 was consistent with 2022 performance.

The following table summarizes the bank's 2022 HMDA-reportable lending in the assessment area, while 2021 tables are available in Appendix A.

Small Business Loans

The bank’s performance with respect to the geographic distribution of small business loans was good. In 2022, the bank made 6.5 percent of its small business loans, by number, in low-income census tracts, which was comparable to both the aggregate of lenders at 4.3 percent and the 4.7 percent of total businesses in this assessment area located in such census tracts. The bank made 15.9 percent of its small business loans, by number, in moderate-income census tracts, which was below the aggregate of lenders at 21.3 percent of such loans in these census tracts and below the 23.0 percent of total businesses located in moderate-income census tracts. In 2022, the bank made 36.8 percent of its small business loans, by number, in middle-income census tracts, which was below both the aggregate of lenders which made 40.8 percent, and the 42.1 percent of total businesses located in such census tracts. Lastly, the bank made 39.7 percent its small business loans, by number, in upper-income census tracts. The bank’s performance was above both the aggregate of lenders at 32.5 percent and the 29.7 percent of total businesses that are located in such census tracts. In 2021, the bank’s overall lending was a greater volume than 2022. The bank’s lending in low- and moderate-income census tracts was comparable compared to aggregate peer and thus is considered good.

The following table presents the geographic distribution of small business loans in the assessment area in 2022; 2021 tables are available in Appendix A.

Lending to Borrowers of Different Income Levels and Lending to Businesses of Different Sizes

For the purposes of this review, loans made in calendar year 2021 or prior were analyzed based on 2011-2015 American Community Survey income designations for individuals². Loans made in calendar year 2022 or after were analyzed based on 2016-2020 American Community Survey income designations for individuals.

The distribution of loans in 2022 reflects, given the product lines offered, adequate penetration among individuals of different income levels including low- and moderate-income individuals and businesses of different sizes (which was weighted more heavily). In 2022, the bank's performance relative to home mortgage loans was good, given the bank's performance amongst low-income borrowers was below the aggregate of lenders and assessment area, but with moderate-income borrowers, the bank's performance was comparable to the aggregate of lenders and above the assessment area demographics.

In 2022, with respect to loans to small businesses, the bank's performance was adequate as the bank's lending to businesses reporting annual revenues of \$1 million or less was below the aggregate of lenders and significantly below the percentage of total businesses operating in the assessment area; however, a substantial majority of loans were made to businesses with revenues of less than \$1 million in loan sizes of less than \$100,000. Lastly, the bank's distribution of lending to borrowers of different income levels in 2021 exceeded the distribution of loans in 2022.

HMDA Reportable Lending

In 2021 and 2022, the bank's performance relative to home mortgage loans was good. Due to the lack of volume, multi-family loans were not considered within the analysis of HMDA-reportable lending.

Home Purchase Loans

In 2022, the bank made 13.1 percent of its home purchase loans, by number, to low-income borrowers, which was slightly above the aggregate of lenders which made 10.5 percent of these loans and below the 20.3 percent demographic of low-income families within the assessment area. The bank made 19.7 percent of its home purchase loans, by number, to moderate-income borrowers, which was comparable to both the aggregate of lenders which made 22.0 percent of these loans to moderate-income borrowers and the 17.6 percent demographic of moderate-income families within the assessment area. The bank made 17.2 percent of its home purchase loans, by number, to middle-income borrowers, which was below the aggregate of lenders which made 21.1 percent of these loans and the 21.6 demographic percent of middle-income families within the

² Income levels for individuals are calculated annually by the FFIEC using geographic definitions from the OMB, income data from the ACS and the Consumer Price Index from the Congressional Budget Office (.12(m) Income Levels).

assessment area. Lastly, the bank made 40.9 percent of its home purchase loans, by number, to upper-income borrowers, which was above the aggregate of lenders which made 30.4 percent of these loans and was comparable to the 40.6 percent demographic of upper-income families within the assessment area. Lending performance in 2021 was consistent with 2022 performance.

Refinance Loans

In 2022, the bank made 13.2 percent of its refinance loans, by number, to low-income borrowers, which was below the aggregate of lenders which made 18.9 percent of these loans and below the 20.3 percent demographic of low-income families within the assessment area. The bank made 19.5 percent of its refinance loans, by number, to moderate-income borrowers, which was below the aggregate of lenders which made 22.4 percent of these loans to moderate-income borrowers; however, this was comparable to the 17.6 percent demographic of moderate-income families within the assessment area. The bank made 16.2 percent of its refinance loans, by number, to middle-income borrowers, which was below the aggregate of lenders which made 22.1 percent of these loans and the 21.6 demographic percent of middle-income families within the assessment area. Lastly, the bank made 43.2 percent of its refinance loans, by number, to upper-income borrowers, which was above the aggregate of lenders which made 28.9 percent of these loans and slightly above the 40.6 percent demographic of upper-income families within the assessment area. Lending performance in 2021 was consistent with 2022 performance.

Home Improvement Loans

In 2022, the bank made 12.3 percent of its home improvement loans, by number, to low-income borrowers, which was below the aggregate of lenders which made 21.1 percent of these loans and the 20.3 percent demographic of low-income families within the assessment area. The bank made 17.8 percent of its home improvement loans, by number, to moderate-income borrowers, which was comparable to the aggregate of lenders which made 17.8 percent of these loans to moderate-income borrowers and to the 17.6 percent demographic of moderate-income families within the assessment area. The bank made 22.1 percent of its home improvement loans, by number, to middle-income borrowers, which was comparable the aggregate of lenders which made 21.3 percent of these loans and the 21.6 demographic percent of middle-income families within the assessment area. Lastly, the bank made 41.7 percent of its home improvement loans, by number, to upper-income borrowers, which was above the aggregate of lenders which made 36.8 percent of these loans and was comparable to the 40.6 percent demographic of upper-income families within the assessment area. The bank's lending performance in 2021 exceeded 2022 performance. In 2021, the bank made 9.7 percent of its home improvement loans, by number, to low-income borrowers, which was below the aggregate of lenders which made 27.5 percent of these loans and the 21.5 percent demographic of low-income families within the assessment area. The bank made 25.7 percent of its home improvement loans, by number, to moderate-income borrowers, which was

above the aggregate of lenders which made 17.2 percent of these loans to moderate-income borrowers and above the 17.6 percent demographic of moderate-income families within the assessment area.

Small Business Loans

The bank's performance relative to small business loans was adequate. In 2022, the bank made 478 small business loans, of which 30.1 percent of its small business loans, by number, were to businesses reporting annual revenues of \$1 million or less. The bank's performance was well below the aggregate of lenders, which made 52.2 percent of such loans, by number. The bank's performance was also significantly below the percentage of businesses reporting annual revenues of \$1 million or less at 90.3 percent. However, of the small business loans, nearly half, or 48.5 percent were made in amounts of \$100,000 or less, which are considered most beneficial to small businesses. This was significantly below the aggregate at 90.5 percent. However, to businesses with annual revenues of \$1 million or less, 70.8 percent of the loans made were for \$100,000 or less.

The bank's performance in 2021 exceeded 2022 in that the bank made 1,540 loans, of which 37.6 percent were to businesses with annual revenues of \$1 million or less, 72.9 percent were made in amounts of \$100,000 or less, and 90.8 percent of loans made to businesses with annual revenues of \$1 million or less were for \$100,000 or less.

The following table presents the borrower distribution of small business loans in 2022; 2021 tables are available in Appendix A.

Community Development Lending

1st Source Bank is a leader in making community development loans. During the evaluation period the bank originated 82 loans totaling \$114.0 million in the assessment area. When compared to the previous evaluation of 148 loans totaling \$193.7 million, the bank decreased the number of loans by 44.6 percent and the dollar volume by 41.1 percent. However, it is important to take into consideration that 32 of those loans totaling \$26.4 million were PPP loans, which boosted community development lending. No loans extended in this time period were towards the PPP. The bank increased its lending to affordable housing projects by 68.9 percent by dollar volume and the majority of the bank's community development loans went towards affordable housing projects. As affordable housing was noted as a major need in the community by community representatives, this lending is particularly responsive to the needs of the community. However, the bank did not originate any loans that qualified as economic development. The majority of the bank's dollars went to community services primarily benefiting low- and moderate-income

individuals and/or geographies and revitalization/stabilization projects. As affordable housing was noted as a need by community representatives.

The following table presents the bank’s community development loans in the assessment area during the review period.

Community Development Loans June 8, 2021 - September 25, 2023										
Assessment Area	Affordable Housing		Community Service		Economic Development		Revitalize/ Stabilize		Total

INVESTMENT TEST

1st Source Bank’s record of performance relative to the Investment Test in the South Bend-Mishawaka, IN-MI MSA #43780 is rated High Satisfactory based on a significant level of qualified community development investments and grants, particularly those that are not routinely provided by private investors, occasionally in a leadership position. These investments demonstrate the extensive use of innovative or complex qualified investments and provide excellent responsiveness to the credit and community development needs of the assessment area.

During the evaluation period the bank made \$12.0 million in total community development investments that consisted of \$10.5 million for affordable housing purposes and \$0.5 million for community services and \$1.0 million for economic development. Additionally, there was \$9.2 million in outstanding balances on the date of the performance evaluation from investments the bank had made in prior periods. The bank demonstrated extensive use of innovative or complex investment in a project eligible for Low-Income Housing Tax Credits (LIHTC) which provides affordable housing for low- and moderate-income individuals. This is particularly responsive to assessment area credit needs as community representatives identified affordable housing as a major need.

The following table presents the bank’s qualified community development investments during the review period:

Community Development Investments (Dollars in 000s)						
June 8, 2021 - September 25, 2023						
Assessment Area	Current Period Investments			Current Period Total (\$)	Prior Period Outstanding (\$)	Total Unfunded (\$)
	Affordable Housing (\$)	Community Service (\$)	Economic Development (\$)			
South Bend- Mishawaka, IN-MI MSA	10,459	500	1,000	11,959	9,160	6,556

Additionally, 1st Source Bank distributed a total of \$1.4 million in 181 qualified grants and donations in the current evaluation period. The grants and donations were made to organizations which serve a variety of purposes, but the majority of dollars went to community service organizations. When compared to the previous evaluation of 200 qualified donations totaling \$1.6 million, the bank decreased the number of donations by 9.5 percent. When comparing the dollar amount of grants and donations by the 36-month time period of the previous evaluation and the 28-month period of the current evaluation; the increase by monthly average was 12.5 percent. The following table presents the bank’s qualified community development donations during the review period.

SERVICE TEST

1st Source Bank’s record of performance relative to the Service Test in the South Bend-
Mishawaka, MI-IN, MSA #43780 is rated High Satisfactory. The banks delivery systems are accessible to the bank’s geographies and individuals of different income levels in the assessment area; the bank’s record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals; services do not vary in a way that inconveniences the needs of its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals; and the bank is a leader in providing community development services.

Retail Services

The distribution of the branch offices and ATMs is performed using current data (2022) and any changes in the median family income level of the geographies where the branches are located.

The bank's retail delivery services are accessible to the geographies and individuals of different income levels in the assessment area. To the extent changes have been made, its record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly in low- or moderate-income geographies or to low- and moderate-income individuals. Services do not vary in a way that inconveniences the needs of its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

1st Source Bank maintains its main office and 22 branches in the assessment area, as well as 36 ATMs, 25 of which are full-service and 11 of which are cash-only. During the evaluation period the bank closed one branch, one cash-only, and one-full-service ATM. Six of the branches, or 26.1 percent, are located in a moderate-income census tract.

Bank locations are open Monday through Friday with standard hours from 9:00 a.m. to 5:00 p.m., and open on Saturdays with limited hours, typically until noon. All products and services are consistent among all branches. The bank offers free ATMs through its network, internet and mobile banking, call center (Monday through Saturday), and automated telephone banking service to meet the needs of the bank's assessment area.

Community Development Services

1st Source Bank is a leader in making community development services in the assessment area. Bank employees provided 2,170 hours within this assessment area which is 36.7 percent of the total 5,905 total hours of qualified community development services in all assessment areas. This represents a decrease of 5.7 percent compared to the previous evaluation during which time the bank provided 2,302 hours of community development service hours. However, when comparing service hours by the 36-month time period of the previous evaluation period and the 28-month period of the current evaluation, the bank increased its service hours by 21.3 percent.

The services were performed for a number of organizations primarily those which focused on affordable housing, community service, and economic development. These activities included a large amount of financial literacy, serving on organization boards, and fundraising. The following table presents the bank's qualified community development services during the review period. The services provided to affordable housing organizations are particularly responsive, as community representatives noted a lack of affordable housing in the area.

INDIANA

CRA RATING FOR INDIANA³: SATISFACTORY

The Lending Test is rated: High Satisfactory

The Investment Test is rated: High Satisfactory

The Service Test is rated: High Satisfactory

1st Source Bank's performance relative to the Lending Test in the state of Indiana is rated High Satisfactory based on the following factors as determined by the full-scope assessment areas: the bank demonstrates good geographic distribution, particularly to low- and moderate-income geographies in its assessment area. 1st Source Bank displays an adequate distribution of loans among individuals of different incomes and businesses of different sizes, given the product lines offered by the bank. The bank exhibits a good record of serving the credit needs of low- and moderate-income individuals and small businesses with gross annual revenues of \$1 million or less. The bank makes use of innovative or flexible practices in serving assessment area credit needs. Further, the bank makes a relatively high level of community development loans.

1st Source's performance relative to the Investment Test in the state of Indiana is rated High Satisfactory. The bank provided a significant level of investments, particularly those that are not provided by private investors, occasionally in a leadership position. The bank makes rare use of innovative and/or complex investments to support community initiatives. The bank exhibited good responsiveness to credit and community development needs.

1st Source's performance relative to the Service Test in the state of Indiana is High Satisfactory based on the following factors: delivery systems are accessible to the bank's geographies and individuals of different income levels in the assessment area; record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and/or LMI individuals; services do not vary in a way that inconveniences the needs of its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals; and the bank provides a relatively high level of community development services.

SCOPE OF THE EXAMINATION

The following three full-scope assessment areas contributed to the rating for Indiana: Elkhart-Goshen IN MSA #21140, Fort Wayne, IN MSA #23060, and Western, IN Non-MSA with each given equal weight given the institution's branching, lending, and deposit presence in each of the

³ For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation is adjusted and does not reflect performance in the parts of those states contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

assessment areas. Limited-scope assessment areas included Gary, IN MD #23844, Lafayette-West Lafayette, IN MSA #29200, Michigan City-LaPorte, IN MSA #33140; Eastern, IN Non-MSA; and Northeastern, IN Non-MSA. The scope of examination is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN INDIANA

1st Source Bank maintains eight assessment areas in Indiana, five of which are metropolitan areas and three are non-metropolitan areas. The bank maintains a total of 47 branches and 55 ATMs in these assessment areas. Some of the major cities include Elkhart, Goshen, Fort Wayne, Lafayette, New Haven, Bluffton, and Columbia City. In addition, bank clientele has ATM access through the Cirrus and Accel networks. Please refer to the individual Indiana assessment area summary for demographic and economic conditions. The following table presents the branches located in Indiana.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN INDIANA

LENDING TEST

1st Source Bank’s performance relative to the Lending Test in Indiana is rated High Satisfactory based on the following factors as determined by the full-scope assessment areas: the bank demonstrates good geographic distribution, particularly to low- and moderate-income

geographies in its assessment area. 1st Source Bank displays an adequate distribution of loans among individuals of different incomes and businesses of different sizes, given the product lines offered by the bank. 1st Source exhibits a good record of serving the credit needs of low- and moderate-income individuals and small businesses with gross annual revenues of \$1 million or less. The bank makes use of innovative or flexible practices in serving assessment area credit needs. Further, the bank makes a relatively high level of community development loans.

The bank participates in a number of loan programs designed to assist low- and moderate-income borrowers. These include Loan Reclamation, Flexible Consumer and Mortgage, and SBA Loan Programs. Some of the most notable products that are beneficial to the community area include the Credit Builder Loan Program, Unsecured Home Improvement lending, and Community Development Mortgage program that aids first time homebuyers utilizing non-traditional credit sources and can be combined with down payment assistance.

Geographic Distribution of Loans

For the purposes of this review, loans made in calendar 2021 and prior were analyzed based on the 2011-2015 American Community Survey income designations data⁴. Loans made in calendar years 2022 and after were analyzed based on income designations from the 2016-2020 American Community Survey data.

1st Source Bank's lending activities reflect good distribution throughout the state of Indiana, particularly in low- and moderate-income geographies. In the Elkhart-Goshen, IN MSA, the bank's performance with home mortgage and small business loans was excellent overall given the good performance among home mortgage lending and excellent small business lending given that the bank's performance in key metrics was comparable or above peer performance and demographics. In the Fort Wayne, IN MSA, the bank's performance with home mortgage and small business loans was good overall, given the good performance among small business lending and excellent home mortgage lending given performance in low- and moderate-income census tracts was above the aggregate lenders. The bank's performance was excellent particularly in the Western, IN Non-MSA as it originated loans in all census tracts and was comparable to aggregate lenders and assessment area demographics by percentage in low- and moderate-income census in HMDA-reportable lending and exceeded aggregate lenders in low- and moderate-income census tracts in small business lending.

Lending to Borrowers of Different Income Levels and Lending to Businesses of Different Sizes

For the purposes of this review, loans made in calendar year 2021 or prior were analyzed based on 2011-2015

⁴ The median family income levels (MFI) for census tracts are calculated using income data from the U.S. Census Bureau's American Community Survey and geographic designations from the Office of Management and Budget and are updated approximately every five years. (.12(m) Income Levels)

American Community Survey income designations for individuals⁵. Loans made in calendar year 2022 or after were analyzed based on 2016-2020 American Community Survey income designations for individuals.

1st Source Bank's lending activities reflect adequate distribution, particularly in its assessment areas, of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the bank. In the Elkhart-Goshen, IN MSA, the bank's performance with home mortgage and small business loans was adequate given the performance among low- and moderate-income borrowers and businesses of different sizes was generally comparable to aggregate lenders and assessment area demographics by percentage. In the Fort Wayne, IN MSA, the bank's performance with home mortgage and small business loans was adequate given the performance among low- and moderate-income borrowers and businesses of different sizes. The bank's performance was adequate in the Western, IN Non-MSA, performance in home mortgage lending was excellent, while performance in small business lending was adequate.

Community Development Lending

1st Source Bank makes a relatively high level community development loans in the state of Indiana. Specifically, the bank originated 92 qualified community development loans totaling \$290.7 million. Within the three full-scope review assessment areas, the bank originated 62 qualified community development loans totaling \$155.3 million, which represents 67.4 percent of all community development lending in the state by number and 53.4 percent by dollar. This represents a decrease by number and dollar from the previous evaluation, which had originated 157 loans totaling \$429.9 million. By month, this represents a 41.4 percent decrease by number and 32.4 percent decrease by dollar. The previous evaluation had elevated levels of lending activity due in part to the number of PPP loans during the COVID-19 pandemic. The majority of the bank's community development loans by number and dollar went towards revitalization/stabilization projects. There were three community development loans that were originated within the Broader Statewide or Regional Area (BSRA). In addition to the innovative and flexible lending programs available across all the assessment areas, the bank originated four Title IX Loan Program Loans totaling \$580,416. This is a revolving loan fund created by the City of Fort Wayne and is designed to mimic the SBA 504 program. As this program promotes small businesses growth, it is particularly responsive, as community representatives noted that small businesses in the area are struggling to remain open.

The following table presents the bank's community development loans in the state of Indiana during the review period.

⁵ Income levels for individuals are calculated annually by the FFIEC using geographic definitions from the OMB, income data from the ACS and the Consumer Price Index from the Congressional Budget Office (.12(m) Income Levels).

INVESTMENT TEST

1st Source Bank’s performance relative to the Investment Test in the state of Indiana is rated High Satisfactory. The bank made a significant level of qualified community development investments and donations, particularly those not routinely provided by private investors, rarely in a leadership position. The bank makes rare use of innovative and/or complex investments to support community initiatives.

During the evaluation period the bank made \$16.3 million of qualified community development investments. Additionally, as of the date of the performance evaluation there was \$25.2 million of outstanding balances from prior period investments. Of the combined investment amounts of \$45.1 million there was \$5.7 million that were unfunded. Investments for affordable housing purposes made up 87.0 percent of current period community development investments. The Fort Wayne IN MSA and the Gary IN MSA with \$11.1 million and \$11.0 million, respectively, had the largest concentrations of investment dollars. Investments within the eight assessment areas included both mortgage-backed securities and Low-Income Housing Tax Credits (LIHTC) which are complex investments designed to encourage the development of affordable housing.

The following table presents the bank’s qualified community development investments during the review period.

Community Development Investments (Dollars in 000s) June 8, 2021 - September 25, 2023

Within the three full-scope review assessment areas, the bank had \$964,856 in contributions aiding 235 unique organizations primarily for community service and economic development purposes. This represented 66.3 percent of total Indiana donations, which amounted to \$1,455,786. This is a decrease since the previous evaluation where the bank made \$1.9 million in contributions. When the difference in review periods is considered, this evaluation had a monthly average of \$51,992 while the previous evaluation had a monthly average of \$52,655, which is a decrease of only 1.3 percent. The bank demonstrates good responsiveness to credit and community development needs.

The following table presents the bank's qualified community development donations during the review period.

Community Development Donations June 8, 2021 - September 25, 2023

SERVICE TEST

1st Source Bank’s performance relative to the Service Test in the state of Indiana is rated High Satisfactory based on the following factors: delivery systems are reasonably accessible to the bank’s geographies and individuals of different income levels in the assessment area; the bank’s record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals; services do not vary in a way that inconveniences the needs of its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals; and the bank provides a relatively high level of community development services.

Retail Services

The distribution of the branch offices and ATMs is performed using current data (2022) and any changes in the median family income level of the geographies where the branches are located.

1st Source Bank’s retail delivery services are accessible to geographies and individuals of different income levels in its assessment area. To the extent changes have been made, its record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly in low- or moderate-income geographies or to low- or moderate-income individuals.

There are a total of 27 branches and 34 ATMs between the three assessment areas and services (including, where appropriate, business hours) do not vary in a way that inconveniences its assessment areas, particularly low- or moderate-income geographies or low- or moderate-income individuals. Additional ATM access is available through the Cirrus and Accel network. In Elkhart, Indiana MSA, none of the branches or ATMs are in low- or moderate-income census tracts. In Fort

Wayne, Indiana MSA, the bank has a branch with a full-service ATM in a moderate-income census tract and a new LPO is located in a moderate-income census tract. The new LPO was opened on August 2, 2021. There is another branch in a highly commercialized area in the Indiana University-Purdue University campus whose census tract has been designated as unknown. In Western, Indiana Non-MSA, the bank has three branches in a moderate-income census tract, two of which have a full-service ATM, and one has a cash-only ATM; the bank also has one cash-only ATM in a low-income census tract in Western, Indiana Non-MSA. The bank opened a cash-only ATM in Michigan City, Indiana on June 2, 2023. All product offerings by the bank were available through each of the branches. The bank provides standard hours of operation.

Community Development Services

1st Source Bank provides a relatively high level of community development services. The bank provided 1,966 hours of qualified services in the three full-scope assessment areas, which represented 59.8 percent of the 3,287 cumulative hours of such services in the state by the bank. Services primarily involved financial literacy, serving on the board of an organization, or fundraising. Please refer to the individual Indiana assessment area summary for more details. The total number of hours for the state at the last evaluation was 4,283 in 36 months or an average of 119 hours a month, compared to this evaluation period where total hours were 3,287 or 117 hours a month.

The following table presents the bank’s qualified community development services during the review period.

ELKHART-GOSHEN, IN MSA – Full Review

SCOPE OF THE EXAMINATION

1st Source Bank’s operations in Elkhart-Goshen, Indiana MSA received a full-scope review. The scope for this assessment area is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE ELKHART-GOSHEN, IN MSA #21140

The Elkhart-Goshen, Indiana, MSA consists of Elkhart County in its entirety. This is unchanged since the previous evaluation. The assessment area consists of a total of 45 census tracts comprised of two low-, 10 moderate-, 22 middle-, and 11 upper-income census tracts. This represents a change from the previous evaluation where the assessment area contained one low-, seven moderate-, 23 middle-, and five upper-income census tracts.

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau’s American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

Census Tract Designation Changes American Community Survey Data (ACS)			
Tract Income Designation	2021 Designations (#)	2022 Designations (#)	Net Change (#)
Low	1	2	+1
Moderate	7	10	+3
Middle	23	22	-1
Upper	5	11	+6

Total	36	45	+9
<i>Source: U. S. Census Bureau: Decennial Census: American Community Survey Data: 2011-2015 U.S. Census Bureau: Decennial Census: America Community Survey Data: 2016-2020</i>			

1st Source Bank has nine branches, 10 full-service ATMs, and one cash-only ATM in the assessment area. The bank has seven branches in middle-income census tracts and two branches in upper-income census tracts. Each branch is accompanied by an ATM, with one of them being the cash-only ATM.

The Federal Deposit Insurance Corporation (FDIC) market share report, as of June 30, 2022, ranked the bank third in the market among 16 institutions serving the assessment area, with 18.8 percent of the market share. The two institutions with the largest market share of deposits were JP Morgan Chase Bank N.A. and Lake City Bank with 28.9 percent and 23.1 percent, respectively. Deposits in this assessment area represent 13.3 percent of the bank's overall deposit totals.

1st Source Bank ranked sixth in 2022 with 221 total HMDA originations within the MSA among 219 HMDA reporters, while Interra Credit Union was first with 703 originations. Ranked second was Cardinal Financial Company with 420 originations. The bank was sixth in 2022 among 72 CRA reporters with 189 originations, while the market leader was JP Morgan Chase Bank N.A. with 708 originations. American Express ranked second with 488 total CRA originations.

Information regarding census-related and business demographic characteristics of the assessment area is provided in the following table.

Population Characteristics

The following table presents the population trends for the assessment area and the state of Indiana. The assessment area experienced modest gain in population of 3.2 percent. According to community representatives, the area has sustained a stable growth trend in the population due to no major changes in industry. This growth is consistent with the population growth occurring throughout the state of Indiana at 3.3 percent during the same time.

Area	Population Change		
	2015 Population	2020 Population	Percent Change (%)
Assessment Area	200,685	207,047	3.2
State of Indiana	6,568,645	6,785,528	3.3

*Source: 2011-2015 U.S. Census Bureau American Community Survey
2020 U.S. Census Bureau Decennial Census*

Income Characteristics

Based upon 2022 FFIEC Census Data, the assessment area had 37.7 percent of its families by family income classified as either low- (19.2 percent) or moderate-income (18.5 percent). The percentage of families residing within the assessment area that live below the poverty line is 8.8 percent, which is comparable to the state of Indiana rate of 8.9 percent.

Based on 2016-2020 American Community Survey data, the median family income (MFI) for Elkhart-Goshen, Indiana MSA was \$70,610, increasing 16.3 percent from 2015. The state of Indiana experienced a lower growth rate of 9.7 percent; however, MFI remains higher than that of the assessment area. According to a community representative, salaries in Elkhart County have been increasing, especially for those in the manufacturing industry. Businesses increased their wages to stay competitive and retain skilled workers. Given Elkhart County is one of the largest manufacturing presences in the state, it is outpacing the state of Indiana.

The following table compares the median family income (MFI) for the assessment area and the state of Indiana.

Median Family Income Change			
Area	2015 Median Family Income (\$)	2020 Median Family Income (\$)	Percent Change (%)
Assessment Area	60,694	70,610	16.3
State of Indiana	66,777	73,265	9.7
<i>Source: 2011 – 2015 U.S. Census Bureau American Community Survey 2016 – 2020 U.S. Census Bureau American Community Survey Median Family Incomes have been inflation-adjusted and are expressed in 2020 dollars.</i>			

Housing Characteristics

Based upon 2022 FFIEC Census Data, the assessment area includes 79,389 housing units; the majority are owner-occupied, representing 64.2 percent of the units, followed by 27.0 percent rental units and 8.9 percent vacant housing units. The median age of housing stock in the assessment area is 49 years, which is older than the average in the state of Indiana as a whole (46 years).

The following table presents the recent housing cost burden within the assessment area and the state of Indiana. The cost burden is a measure of affordability via a comparative analysis of individuals of different income levels that spend 30.0 percent or more of their income on housing costs. Across all income levels, 37.9 percent of residents in Elkhart County are experiencing a rental cost burden, which is less than the state of Indiana of 41.0 percent. A greater percentage of low- and moderate-income residents in Elkhart County are experiencing a rental cost burden compared to the state of Indiana, at 74.6 percent and 27.7 percent, respectively. Community representatives have noted there have been no new significant multi-family housing buildings for the past 20 years. Multi-family housing typically are homes that are occupied by low- and moderate-income families. The high cost of building materials and the lack of steady funding to build them results in many low- and moderate-income families renting units that are relatively expensive. This limits the supply of rental units and homes. Across all income levels, 14.3 percent of owners in Elkhart County are experiencing a housing cost burden, which is slightly less than the state of Indiana. A slightly smaller percentage of low- and moderate-income residents in the Elkhart County are experiencing a housing cost burden compared to the state of Indiana at 55.5 percent and 22.6 percent, respectively.

According to the FFIEC HMDA loan and application records, home mortgage trends reflect increases in home mortgage activity in recent years across the assessment area. This trend suggests a continued increase in demand for home purchases, driving home values and indicating that housing cost burdens for low- and moderate-income homeowners will remain elevated. According to the U.S. Census data, the assessment area had a median housing value of \$149,291 and median gross rent of \$821. A community representative noted that due to the difficulties in finding an affordable home, some residents have chosen to move out of the city and into the suburban

neighborhoods.

Housing Cost Burden						
Area	Cost Burden (%) – Renters			Cost Burden (%) – Owners		
	Low Income	Moderate Income	All Renters	Moderate Income	Low Income	All Owners
Assessment Area	74.6	27.7	37.9	55.5	22.6	14.3
State of Indiana	73.3	26.8	41.0	57.2	22.9	15.1
<i>Cost Burden is housing cost that equals 30 percent or more of household income</i>						
<i>Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy</i>						

Employment Characteristics

The following table presents unemployment rates between 2018 and 2022 in the assessment area and the state of Indiana. Overall, both have experienced a decline in unemployment rates. Notable increases were observed in 2020 due to the widespread economic downturn caused by the COVID-19 pandemic. Since then, unemployment rates in both the state and assessment area have declined, even below that of pre-pandemic rates. Although unemployment rates have been decreasing, a community representative has noted there is a need to find qualified employees in healthcare (registered nurses and nursing assistants) and manufacturing (tool and die makers), especially as the older populations are retiring. The community representative stated residents require jobs that cover the cost of living.

Unemployment Rates (%)					
Area	2018	2019	2020	2021	2022
Assessment Area	2.6	3.1	7.7	2.8	2.5
State of Indiana	3.4	3.3	7.3	3.9	3.0
<i>Source: Bureau of Labor Statistics (BLS), Local Area Unemployment Statistics</i>					

According to the U.S. Bureau of Labor Statistics, as of the second quarter of 2022, the assessment area has a large majority of its employees by number in manufacturing (77,114), followed by healthcare (10,242), and retail trade (9,844). A community representative confirmed the work in Elkhart County is primarily manufacturing, specializing in boats and recreational vehicles (RVs).

Community Representatives

Two community representatives with a focus on economic development and affordable housing were contacted to increase understanding of the credit needs and market conditions within the assessment area. The community representatives stated the most common need of the community

is affordable housing. Due to the high costs of raw materials, building high priced homes creates a cost burden for low- and moderate-income individuals. Although the community has a strong presence of manufacturing employment with salaries matching or outpacing the state of Indiana, other industries need to do the same, so low-income families can be relieved of their housing cost burdens. Financial education is a need, especially for first time home buyers. Community organizations have been working to fill this gap with programs focusing on tax credits, financial literacy, and investing in the quality of life.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE ELKHART-GOSHEN, IN MSA #21140

LENDING TEST

The geographic distribution of loans reflects excellent penetration throughout the assessment area. The distribution of borrowers reflects, given the product lines offered, adequate penetration among individuals of different income levels and among businesses of different sizes. 1st Source exhibits a good record of serving the credit needs of low- and moderate-income individuals and small businesses with gross annual revenues of \$1 million or less. The bank is a leader in making community development loans, and the bank makes use of innovative or flexible practices in serving assessment area credit needs.

1st Source Bank makes effective use of several products in its loan programs: Loan Reclamation, Flexible Consumer and Mortgage, and SBA Loan Programs. Some of the most notable products that are beneficial to the community area are the Credit Builder Loan Program, Unsecured Home Improvement lending, and Community Development Mortgage program that aids first time homebuyers utilizing non-traditional credit sources and can be combined with down payment assistance.

The bank participates in several loan programs designed to assist low- and moderate-income borrowers. This includes the use of Flexible Consumer and Mortgage Loan Programs, which provides healthcare, credit building, and mortgage assistance. The Loan Reclamation Program assist loan restructuring when they are past due on their loans. The bank offers its SBA Loan Programs to assists qualified small businesses in obtaining financing when it would not otherwise be available through standard lending channels.

Geographic Distribution of Loans

For the purposes of this review, loans made in calendar 2021 and prior were analyzed based on the 2011-

2015 American Community Survey income designations data⁶. Loans made in calendar years 2022 and after were analyzed based on income designations from the 2016-2020 American Community Survey data.

1st Source Bank's lending activities reflect excellent distribution throughout the assessment area, particularly to low- and moderate-income census tracts. In 2022, the bank's rate of home mortgage lending within low- and moderate-income census tracts was good. Within low-income census tracts, the bank's performance was comparable to the aggregate lenders and the owner-occupied demographics. Within moderate-income census tracts, the bank's performance was above the aggregate lenders and the owner-occupied demographics. Additionally, the bank's performance with respect to small business lending was excellent, given that the bank's performance in key metrics was comparable or above peer performance and demographics. The bank's distribution of lending across geographies of different income levels in 2021 within home mortgage and small business loans was mostly consistent with 2022 figures.

For purposes of this analysis, small business loans were used as the primary factor for determining the rating given the bank is primarily focused on commercial lending. Additionally, both 2021 and 2022 figures were used to evaluate the bank's performance, though 2022 figures are featured in the narrative and 2021 figures are used to comparison and detailed in Appendix A. Finally, when determining performance, the comparison to aggregate lender figures was weighted more heavily than the assessment area demographics (i.e., percentage of owner-occupied housing units or percentage of borrowers by income levels) as it is a better measure of loan demand.

A gap analysis was completed as part of the evaluation. In 2022, the bank originated HMDA and/or CRA small business loans in all low- and moderate-income tracts in the assessment area. Based upon this analysis, there was no conspicuous, unexplained lending gaps in the assessment area.

HMDA Reportable Lending

In 2021 and 2022, the bank's rate of HMDA-reportable lending within low- and moderate-income census tracts was good. The bank's 2021 and 2022 HMDA-reportable lending in the assessment area was concentrated in home purchase, refinance, and home improvement loans, which comprised 100.0 percent of the HMDA loans originated. Due to the lack of volume, multi-family loans were not considered within the analysis of HMDA-reportable lending.

⁶ The median family income levels (MFI) for census tracts are calculated using income data from the U.S. Census Bureau's American Community Survey and geographic designations from the Office of Management and Budget and are updated approximately every five years. (.12(m) Income Levels)

Home Purchase Loans

Home purchase loans represented 26.7 percent of the bank's HMDA-reportable loans originated in the Elkhart-Goshen, IN MSA assessment area in 2022. Within low-income census tracts, the bank originated 3.4 percent of its home purchase loans, which was comparable to the 3.2 percent of the aggregate lenders and the 2.3 percent of owner-occupied housing units located in low-income tracts. Within moderate-income census tracts, the bank originated 20.3 percent of its home purchase loans, which was above the aggregate lenders and owner-occupied demographics at 16.7 percent and 16.9 percent, respectively. Within middle-income census tracts, the bank originated 45.8 percent of its home purchase loans in 2022. This was below the aggregate lenders and owner-occupied demographics at 52.7 percent and 53.5 percent, respectively. The bank originated 30.5 percent of its home purchase loans in upper-income census tracts, which was above the aggregate lenders and owner-occupied demographics at 27.4 percent and 27.3 percent, respectively. The bank's performance in 2021 was below its 2022 performance. In 2021, the bank did not originate home purchase loans within low-income census tracts, which was comparable to the aggregate lenders and owner-occupied demographics at 0.5 percent and 0.4 percent, respectively. Within moderate-income census tracts, the bank originated 7.5 percent of its home purchase loans, which was below the aggregate lenders and owner-occupied demographics at 12.9 percent and 12.3 percent, respectively. Within middle-income census tracts, the bank originated 65.7 percent of its home purchase loans in 2022. This was comparable to the aggregate lenders at 65.9 percent and the owner-occupied demographics at 63.7 percent. The bank originated 26.9 percent of its home purchase loans in upper-income census tracts, which was above the aggregate lenders at 20.7 percent and the owner-occupied demographics at 23.7 percent.

Refinance Loans

Refinance loans represented 43.0 percent of the bank's HMDA-reportable loans originated in the Elkhart-Goshen, IN MSA assessment area in 2022. Within low-income census tracts, the bank did not originate refinance loans, which was comparable to both the 1.3 percent of the aggregate lenders and the 2.3 percent of owner-occupied housing units located in low-income tracts. Within moderate-income census tracts, the bank originated 22.1 percent of its refinance loans, which was above the aggregate lenders and owner-occupied demographics at 14.5 percent and 16.9 percent, respectively. Within middle-income census tracts, the bank originated 46.3 percent of its refinance loans. This was below the aggregate lenders and owner-occupied demographics at 50.2 percent and 53.5 percent, respectively. The bank originated 31.6 percent of its refinance loans in upper-income census tracts, which was comparable to the aggregate lenders at 34.0 percent and above the owner-occupied demographics 27.3 percent.

The bank's performance in 2021 was below its 2022 performance. In 2021, the bank did not originate refinance loans within low-income census tracts, which was comparable to the aggregate

lenders at 0.1 percent and the owner-occupied housing units at 0.4 percent. Within moderate-income census tracts, the bank originated 6.1 percent of its refinance loans, which was slightly below the aggregate lenders at 8.8 percent and below the owner-occupied demographics at 12.3 percent. Within middle-income census tracts, the bank originated 65.7 percent of its refinance loans. This was comparable to the aggregate lenders at 64.3 percent and the owner-occupied demographics at 63.7 percent. The bank originated 28.2 percent of its refinance loans in upper-income census tracts, which was comparable to the aggregate lenders at 26.8 percent and above the owner-occupied demographics at 23.7 percent.

Home Improvement Loans

Home improvement loans represented 30.3 percent of the bank's HMDA-reportable loans originated in the Elkhart-Goshen, IN MSA assessment area in 2022. Within low-income census tracts, the bank did not originate home improvement loans, which was comparable to both the 1.2 percent of the aggregate lenders and the 2.3 percent of owner-occupied housing units located in low-income tracts. Within moderate-income census tracts, the bank originated 14.9 percent of its home improvement loans, which was comparable to the aggregate lenders and owner-occupied demographics at 13.0 percent and 16.9 percent. Within middle-income census tracts, the bank originated 59.7 percent of its home improvement loans in 2022. This was above the aggregate lenders and owner-occupied demographics at 50.5 percent and 53.5 percent, respectively. The bank originated 25.4 percent of its home improvement loans in upper-income census tracts, which was well below the aggregate lenders at 35.3 percent and comparable to owner-occupied demographics at 27.3 percent. The bank's performance in 2021 was consistent with 2022 figures.

The following table presents the bank's 2022 HMDA-reportable lending in the assessment area; 2021 tables are available in Appendix A.

Small Business Loans

The bank’s performance with respect to small business loans was excellent. In 2022, the bank originated 214 small business loans in the Elkhart-Goshen, IN MSA assessment area. The bank originated 1.4 percent of their small business loans within low-income census tracts, which was comparable to the aggregate lenders and percentage of total businesses at 1.5 percent and 2.1 percent, respectively. In moderate-income census tracts, the bank originated 21.5 percent of their small business loans, which was above both the aggregate lenders and percentage of total business at 17.7 percent and 19.1 percent, respectively. In middle-income census tracts, the bank originated 59.8 percent of loans, which was above the aggregate lenders and percentage of total businesses at 53.8 percent and 55.7 percent, respectively. In upper-income census tracts, the bank originated 17.3 percent of their small business loans, which was below the aggregate lenders and percentage of total businesses at 26.1 percent and 23.1 percent, respectively. The bank’s performance in 2021 was consistent with 2022 figures, although lending volume was significantly higher in 2021.

The following table presents the bank’s 2022 small business lending in the assessment area; 2021 tables are available in Appendix A.

Lending to Borrowers of Different Income Levels and Lending to Businesses of Different Sizes

For the purposes of this review, loans made in calendar year 2021 or prior were analyzed based on 2011-2015 American Community Survey income designations for individuals⁷. Loans made in calendar year 2022 or after were analyzed based on 2016-2020 American Community Survey income designations for individuals.

1st Source Bank's lending activities reflect adequate distribution, particularly in its assessment area, of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the bank.

In 2022, the bank's performance relative to HMDA-reportable lending was adequate. Lending to low-income borrowers was comparable to aggregate lenders and below the percentage of low-income families in the assessment area. Lending to moderate-income borrowers was below the aggregate lenders and comparable to the percentage of moderate-income families in the assessment area. For loans to small businesses in 2022, the bank's performance was adequate. The bank's lending to business reporting annual revenue of \$1 million or less was below aggregate lenders and significantly below the percentage of total businesses operating in the assessment area. The bank's lending distribution among individuals of different income levels in 2021 within home mortgage was mostly consistent with 2022 figures, but 2021 small business figures exceeded 2022 performance.

For purposes of this analysis, small business loans received the greater weight when determining the rating given the bank is primarily focused on commercial lending. In addition, when determining performance, the comparison to aggregate lender figures were weighted more heavily than the assessment area demographics (i.e., families by family income or total businesses) as it is a better measure of loan demand.

HMDA Reportable Lending

In 2021 and 2022, the bank's rate of HMDA-reportable lending to low- and moderate-income borrowers was adequate. Due to the lack of volume, multi-family loans were not considered within the analysis of HMDA-reportable lending.

Home Purchase Loans

In 2022, the bank originated 8.5 percent of its home purchase loans to low-income borrowers, which is comparable to aggregate lenders at 10.4 percent and well below the low-income families in the assessment area at 19.2 percent. The bank originated 11.9 percent of its home purchase loans

⁷ Income levels for individuals are calculated annually by the FFIEC using geographic definitions from the OMB, income data from the ACS and the Consumer Price Index from the Congressional Budget Office (.12(m) Income Levels).

to moderate-income borrowers, which was well below the aggregate lenders at 26.7 percent and below the moderate-income families in the assessment area 18.5 percent. The bank originated 16.9 percent of its home purchase loans to middle-income borrowers, which was below the aggregate lenders and middle-income families in the assessment area at 25.5 percent and 22.7 percent, respectively. The bank originated 42.4 percent of its home purchase loans to upper-income borrowers, which was significantly above the aggregate lenders at 20.7 percent and slightly above the upper-income families in the assessment area at 39.7 percent. The bank's performance in 2021 is similar in that originations to low-income families were comparable to peer, while originations to moderate-income families were below peer.

Refinance Loans

In 2022, the bank originated 16 refinance loans, or 16.8 percent, to low-income borrowers, which was comparable to aggregate lenders at 14.5 percent and comparable to the low-income families in the assessment area at 19.2 percent. The bank originated 16.8 percent of its refinance loans to moderate-income borrowers, which was below the aggregate lenders at 25.9 percent and comparable to moderate-income families in the assessment area at 18.5 percent. The bank originated 14.7 percent of its refinance loans to middle-income borrowers, which was well below the aggregate lenders and below middle-income families in the assessment area at 27.3 percent and 22.7 percent, respectively. The bank originated 47.4 percent of its refinance loans to upper-income borrowers, which was significantly above the aggregate lenders at 25.1 percent and above the upper-income families in the assessment area at 39.7 percent.

The bank's performance in 2021 was below its 2022 performance. In 2021, the bank originated 5.2 percent of its refinance loans to low-income borrowers, which was comparable to the aggregate lenders at 7.2 percent and well below the low-income families in the assessment area at 19.0 percent. The bank originated 12.2 percent of its refinance loans to moderate-income borrowers, which was below the aggregate lenders and the moderate-income families in the assessment area at 19.4 percent and 18.1 percent, respectively.

Home Improvement Loans

In 2022, the bank originated 7.5 percent of its home improvement loans to low-income borrowers, which was below aggregate lenders at 10.4 percent and below the low-income families in the assessment area at 19.2 percent. The bank originated 20.9 percent of its home improvement loans to moderate-income borrowers, which was comparable to both the aggregate lenders at 19.8 percent and to moderate-income families in the assessment area at 18.5 percent. The bank originated 20.9 percent of its home improvement loans to middle-income borrowers, which was below the aggregate lenders and comparable to the middle-income families in the assessment area at 31.6 percent and 22.7 percent, respectively. The bank originated 44.8 percent of its home improvement

loans to upper-income borrowers, which was well above the aggregate lenders at 34.7 percent and above the upper-income families in the assessment area at 39.7 percent.

The bank's performance in 2021 was below its 2022 performance. The bank originated 8.6 percent of its home improvement loans to low-income borrowers, which was comparable to the aggregate lenders at 10.6 percent and well below the low-income families in the assessment area at 19.0 percent. The bank also originated 12.1 percent of its home improvement loans to moderate-income borrowers, which was below the aggregate lenders and the moderate-income families in the assessment area at 17.2 percent and 18.1 percent, respectively.

The following table presents the bank's 2022 HMDA-reportable lending in the assessment area; 2021 tables are available in Appendix A.

Small Business Loans

The bank's performance relative to small business lending was adequate. In 2022, the bank originated 29.9 percent of its small business loans to businesses with revenues of \$1 million or less. This rate was below the aggregate of 48.7 percent and significantly below the percentage of total

businesses in the assessment area at 86.6 percent. Of the small business loans, nearly half, 46.3 percent, were made in amounts of \$100,000 or less, which are considered most beneficial to small businesses. Of the loans made to businesses with \$1 million or less, a majority, or 67.2 percent, were made in amounts of \$100,000 or less.

The bank’s 2021 performance exceeded 2022’s performance. The bank made 13.7 percent of its small business loans to businesses with revenues of \$1 million or less. This rate was significantly below the aggregate lenders at 40.8 percent and the percentage of total businesses in the assessment area at 86.7 percent. However, of the small business loans, 84.5 percent were made in amounts of \$100,000 or less, which are considered most beneficial to small businesses. Additionally, of the loans made to businesses with \$1 million or less, a large majority, or 88.0 percent, were made in amounts of \$100,000 or less.

The following table presents the bank’s 2022 small business lending in the assessment area; 2021 tables are available in Appendix A.

Community Development Lending

1st Source Bank is a leader in making community development loans. Overall, the bank originated 31 community development loans totaling \$75.6 million in the assessment area. The loans were primarily to organizations/businesses that are focused on revitalizing and/or stabilizing the community. Overall, the volume of community development loans represents a decrease from the previous evaluation period when the bank originated 53 loans for \$138.3 million. By month, the previous evaluation originated 1.4 loans worth \$3.8 million per month, whereas this evaluation originated 1.1 loans worth \$2.7 million per month. This represents a 21.4 percent decrease by number and 28.9 percent decrease by dollar. However, the previous evaluation had elevated levels of lending activity due in part to the number of PPP loans during the COVID-19 pandemic. In 2021 and 2022, the bank made eight Community Development Mortgages totaling approximately \$1.0 million. This program provides credit opportunity for first time homebuyers that earn less than 80 percent of median family income who may not be able to demonstrate creditworthiness through traditional means, such as credit reports. These loans demonstrate the use of innovative underwriting standards and are particularly responsive to the credit and community development needs of the assessment area, as affordable housing was noted as a need by community representatives.

The following table presents the bank’s community development loans in the assessment area during the review period.

Community Development Loans by June 8, 2021 - September 25, 2023

INVESTMENT TEST

1st Source Bank’s performance relative to the Investment Test in the Elkhart-Goshen, IN MSA is rated Low Satisfactory as it made a significant level of qualified community development investments and grants, particularly those not routinely provided by private investors, rarely in a leadership position. The bank makes no use of innovative and/or complex investments to support community initiatives and demonstrates good responsiveness to credit and community development needs.

During the evaluation period the bank made \$2.2 million dollars in total community development investments that consisted of \$1.9 million for affordable housing purposes and \$0.3 million for community services. Additionally, there were \$2.5 million in outstanding balances on the date of the performance evaluation from investments the bank had made in prior periods. Affordable housing purposes made up the preponderance of the investments at 89.3 percent of the combined total of \$4.7 million.

The following table presents the bank’s qualified community development investments during the review period.

Community Development Investments (Dollars in 000s) June 8, 2021 – September 25, 2023						
Assessment Area	Current Period Investments			Current Period Total (\$)	Prior Period Outstanding (\$)	Total Unfunded (\$)
	Affordable Housing (\$)	Community Service (\$)	Economic Development (\$)			
Elkhart-Goshen, IN MSA	1,940	250	0	2,190	2,490	0

1st Source distributed \$239,880 in 85 qualified donations in the current evaluation period. Most of the donations were distributed amongst organizations providing community service, followed by economic development and affordable housing. This represents a decrease of number and dollar since the previous evaluation period where 132 donations totaling \$569,543 were made. This is a 35.6 percent decrease by number and 57.9 percent decrease by dollar. However, when considering the difference in review periods, the performances demonstrate a 17.2 percent decrease by number and 45.8 percent decrease by dollar in monthly donations.

The following table presents the bank’s qualified community development donations during the review period.

Community Development Donations June 8, 2021 – September 25, 2023

SERVICE TEST

1st Source's performance relative to the Service Test in the Elkhart-Goshen, Indiana MSA is rated Low Satisfactory based on the following factors: delivery systems are accessible to the bank's geographies and individuals of different income levels in the assessment area; services do not vary in a way that inconveniences the needs of its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals; and the bank provides an adequate level of community development services.

Retail Services

The distribution of the branch offices and ATMs is performed using current data (2022) and any changes in the median family income level of the geographies where the branches are located.

1st Source Bank's retail delivery services are accessible to geographies and individuals of different income levels in its assessment area. To the extent changes have been made, its record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly in low- or moderate-income geographies or to low- or moderate-income individuals. Its services (including, where appropriate, business hours) do not vary in a way that inconveniences its assessment area, particularly low- or moderate-income geographies or low- or moderate-income individuals. The bank operates a total of nine branches and ten ATMs. Seven branches are in middle-income census tracts and two branches are in upper-income census tracts. Each branch is accompanied by an ATM, one of which is a cash-only ATM.

Bank locations are open Monday through Friday with standard hours typically from 9:00 a.m. to 5:00 p.m. and limited hours on Saturdays typically until noon. All products and services are consistent among all branches. The bank offers ATMs, internet and mobile banking, telephone banking services, and eBanking products to increase access and provide additional services to customers.

Community Development Services

1st Source Bank provides an adequate level of community development services. Bank employees provided 470 hours, or 8.0 percent of the 5,905 total hours of qualified community development services in the assessment area. This represents a decrease of hours of 40.0 percent compared to the previous evaluation period of 783 hours. By month, the previous evaluation had 21.8 hours per month, whereas this evaluation had 16.8 hours per month. This represents a 22.9 percent decrease by month. The service hours were primarily directed towards providing community service and economic development. Service hours focusing on economic development are particularly responsive, as a community representative noted small businesses struggling, specifically

restaurants, due to a lack of available workforce.

The following table presents the bank’s qualified community development services during the review period.

FORT WAYNE, INDIANA MSA – Full Review

SCOPE OF THE EXAMINATION

1st Source Bank’s operations in Fort Wayne, Indiana MSA received a full-scope review. The scope for this assessment area is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE FORT WAYNE, IN MSA #23060

The Fort Wayne, Indiana MSA consist of Allen and Whitley Counties in their entireties. This is unchanged since the previous evaluation. The assessment area consists of a total of 104 census tracts comprised of eight low-, 26 moderate-, 44 middle-, 23 upper-, and three unknown-income census tracts. This represents a change from the previous evaluation where the assessment area contained 12 low-, 24 moderate-, 42 middle-, 22 upper-, and three unknown-income census tracts totaling 103 census tracts. The unknown census tracts are around Purdue University in Fort Wayne.

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau’s American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

1st Source Bank has nine branches and nine full-service ATMs. The bank has one branch in a census tract with unknown-income (Indiana University-Purdue University campus), one branch in a moderate-income census tract, four branches in middle-income census tracts, and three branches in upper-income census tracts. Each branch is accompanied by an ATM. A new Loan Production Office (LPO) was opened in a moderate-income census tract in 2021.

The Federal Deposit Insurance Corporation (FDIC) market share report, as of June 30, 2022, ranked the bank eighth in the market among 21 institutions serving the assessment area, with 4.9 percent of the market share. The two institutions with the largest market share of deposits were JP Morgan Chase Bank N.A. and Lake City Bank with 21.5 percent and 13.4 percent, respectively. Deposits in the assessment area represent 6.8 percent of the bank's overall deposit totals.

1st Source Bank was 23rd in 2022 total HMDA originations within the MSA among 320 HMDA reporters with 166 originations. The market leader was Three Rivers Federal Credit Union with 1,873 originations followed by Ruoff Mortgage Company with 1,342 originations. The bank was tenth in 2022 among 103 CRA reporters in originations with 174 originations. JP Morgan Chase Bank N.A. ranked first with 1,640 originations followed by American Express with 1,158 total CRA originations.

Information regarding census related and business demographic characteristics of the assessment area is provided in the following table.

Note: Percentages may not total 100.0 percent due to rounding.

Population Characteristics

The following table presents the population trends for the assessment area, counties which make up the assessment area, and the state of Indiana. The assessment area experienced a gain in population of 5.8 percent between 2015 and 2020. According to a community representative, this growth is likely due to the people moving into Fort Wayne, Indiana, which is in Allen County and reflected in the table below. The community representative noted the city is growing as there are colleges, universities, and businesses in or entering the market. The representative anticipated this is the beginning of larger growth, as employers continue to enter the market. This growth is outpacing the population growth occurring throughout the state of Indiana at 3.3 percent during the same time period.

Population Change			
Area	2015 Population	2020 Population	Percent Change (%)
Assessment Area	396,783	419,601	5.8
Allen County, Indiana	363,453	385,410	6.0
Whitley County, Indiana	33,330	34,191	2.6
State of Indiana	6,568,645	6,785,528	3.3
<i>Source: 2011-2015 U.S. Census Bureau American Community Survey 2020 U.S. Census Bureau Decennial Census</i>			

Income Characteristics

Based upon 2022 FFIEC Census Data, the assessment area had 38.1 percent of its families by family income classified as either low- (19.3 percent) or moderate-income (18.8 percent). The percentage of families residing within the assessment area that live below the poverty line is 9.0 percent, which is comparable to the state of Indiana rate of 8.9 percent.

Based on 2016-2020 American Community Survey data, the median family income (MFI) for the assessment area was \$71,896, increasing 8.4 percent from 2015. Of the two counties, Allen County is increasing slightly more than Whitley County, with 8.2 percent and 7.3 percent, respectively. The state of Indiana outpaced the assessment area’s growth at 9.7 percent. According to a community representative, salaries in Fort Wayne have been increasing recently due to growth in small and large businesses. The community representative noted that the city has been slow to match that of the state of Indiana as the community has historically had a lower cost of living.

The following table compares the median family income (MFI) for the assessment area, the counties that makeup the assessment area, and the state of Indiana.

Median Family Income Change			
Area	2015 Median Family Income (\$)	2020 Median Family Income (\$)	Percent Change (%)
Assessment Area	66,299	71,896	8.4
Allen County, Indiana	66,015	71,419	8.2
Whitley County, Indiana	69,657	74,725	7.3
State of Indiana	66,777	73,265	9.7
<i>Source: 2011 – 2015 U.S. Census Bureau American Community Survey 2016 – 2020 U.S. Census Bureau American Community Survey Median Family Incomes have been inflation-adjusted and are expressed in 2020 dollars.</i>			

Housing Characteristics

Based upon 2022 FFIEC Census Data, the assessment area includes 174,335 housing units; the majority are owner-occupied, representing 64.4 percent of the units, followed by 27.9 percent rental units and 7.7 percent vacant housing units. The median age of housing stock in the assessment area is 53 years, which is older than the average in the state of Indiana as a whole (46 years).

The following table presents the recent housing cost burden within the assessment area, the counties which makeup the assessment area, and the state of Indiana. The cost burden is a measure of affordability via a comparative analysis of individuals of different income levels that spend 30.0 percent or more of their income on housing costs. Across all income levels, 39.5 percent of residents in the assessment area are experiencing a rental cost burden, which is slightly less than the state of Indiana at 41.0 percent. Low-income residents in Allen County are experiencing the highest rental cost burden of 76.6 percent compared to Whitley County and the state of Indiana. Moderate-income residents in Whitley County are experiencing the highest rental cost burden at 41.7 percent compared to Allen County and the state of Indiana. Across all income levels, 12.7 percent of owners within the assessment area are experiencing a housing cost burden, which is less than the state of Indiana at 15.1 percent. Low- and moderate-income owners in Whitley County are experiencing the highest housing cost burden at 61.5 percent and 23.7 percent compared to Allen County and the state of Indiana.

According to the FFIEC HMDA loan and application records, home mortgage trends reflect increases in home mortgage activity in recent years across the assessment area. This trend suggests a continued increase in demand for home purchases, driving home values and indicating that housing cost burdens for low- and moderate-income homeowners will remain elevated, though lower than in other parts of the state. According to the 2020 U.S. Census, the assessment area had a median housing value of \$138,149 and median gross rent of \$788.

A community representative, with a specialty in affordable housing, stated that investors are

purchasing properties to offer as rentals, leading to a shortage of houses for purchase. The community has seen investors raise rents while simultaneously allowing the property to remain in or fall into a state of disrepair. However, residents have continued to rent due to low housing inventory, rising interest rates, and a distrust for financial institutions due to its history of larger financial institutions leaving the community. Another community representative noted that it is difficult for developers and banks to create affordable housing as there are not many existing affordable homes in the area. As a result, they run into pricing issues. Affordable housing is especially needed near places of employment and near Purdue University. The university brings hundreds of students who are also in need of rental units while in school. Also, post-graduation, about 75 percent of them become permanent residents, increasing the demand for housing.

Housing Cost Burden						
Area	Cost Burden (%) – Renters			Cost Burden (%) – Owners		
	Low Income	Moderate Income	All Renters	Moderate Income	Low Income	All Owners
Assessment Area	76.1	24.2	39.5	53.5	20.4	12.7
Allen County, Indiana	76.6	23.1	39.8	52.6	20.1	12.5
Whitley County, Indiana	65.1	41.7	33.7	61.5	23.7	14.7
State of Indiana	73.3	26.8	41.0	57.2	22.9	15.1
<i>Cost Burden is housing cost that equals 30 percent or more of household income</i>						
<i>Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy</i>						

Employment Characteristics

The following table presents unemployment rates between 2018 and 2022 in the assessment area, the counties which makeup the assessment area, and the state of Indiana. Overall, all geographies have experienced decreased unemployment rates. Notable increases are observed in 2020 due to the widespread economic downturn caused by the COVID-19 pandemic. Since then, unemployment rates in both areas have declined, even below that of pre-pandemic rates. Although the unemployment rate has been decreasing, a community representative has noted there is a need to find employees to fill positions as the number of employers is constantly growing. Some of the primary industries that need employees are in manufacturing and healthcare, specifically the entry level positions. However, the community representative stated that due to the lack of benefits and career advancement with entry level positions, residents have not been applying to them.

Unemployment Rates (%)					
Area	2018	2019	2020	2021	2022
Assessment Area	3.1	3.1	7.7	3.9	2.8
Allen County, Indiana	3.2	3.1	7.9	4.0	2.9
Whitley County, Indiana	2.9	3.0	6.1	3.0	2.4
State of Indiana	3.4	3.3	7.3	3.9	3.0
<i>Source: Bureau of Labor Statistics (BLS), Local Area Unemployment Statistics</i>					

According to the U.S. Bureau of Labor Statistics, as of the second quarter of 2022, the assessment area has many of its residents employed in manufacturing (35,538), healthcare (35,475), and retail trade (23,024). A community representative stated the biggest employers in the market have been Amazon, hospitals, and Fort Wayne Metals. Automobile manufacturing continues to be a large industry. Due to the supply chain issue with semi-conductors, many vehicles are fully assembled and waiting for parts to become available.

Community Representatives

Two community representatives with a focus on economic development and affordable housing were contacted to increase understanding of the credit needs and market conditions within the assessment area. The community representatives agreed on the most common needs of the community. The incentives for builders to construct high value homes do not align with the incentives of buyers who want affordable options. Overall, the need for affordable housing for low-, moderate-, and middle-income individuals and families is still high. Financial institutions need to continue being active in their communities and partner with community projects, which will help bring back trust in banking. This can be accomplished through community organization initiatives focusing on small business outreach and financial education classes for first time homebuyers.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS FORT WAYNE, IN MSA #23060

LENDING TEST

The geographic distribution of loans reflects good penetration throughout the assessment area. The distribution of borrowers reflects, given the product lines offered, adequate penetration among individuals of different income levels and among businesses of different sizes. 1st Source Bank also exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses. The bank makes a relatively high level of community development loans, and the bank makes use of innovative and flexible lending practices in serving assessment area credit needs.

The bank participates in several loan programs designed to assist low- and moderate-income borrowers. This includes the use of Flexible Consumer and Mortgage Loan Programs, which provides healthcare, credit building, and mortgage assistance. The Loan Reclamation Program assists in loan restructuring when customers are past due on their loans. The bank offers its SBA Loan Programs to assist qualified small businesses in obtaining financing when it would not otherwise be available through standard lending channels. The bank participates in the Title IX program, which is a revolving loan fund created by the City of Fort Wayne and is designed to mimic the SBA 504 program. It provides an incentive for industrial expansion that creates permanent private sector jobs. This program is available to most for-profit businesses located in Allen County, Indiana.

Geographic Distribution of Loans

For the purposes of this review, loans made in calendar 2021 and prior were analyzed based on the 2011-2015 American Community Survey income designations data⁸. Loans made in calendar years 2022 and after were analyzed based on income designations from the 2016-2020 American Community Survey data.

1st Source Bank's lending activities reflect good distribution throughout the assessment area particularly to low- and moderate-income census tracts. In 2022, the bank's rate of home mortgage lending within low- and moderate-income census tracts was excellent, as it was above aggregate lenders and owner-occupied demographics. The bank's performance with respect to small business lending was good due to comparable performance to aggregate lenders and demographics. The bank's distribution of lending across geographies of different income levels in 2021 within home mortgage and small business loans was mostly consistent with 2022 figures.

For purposes of this analysis, small business loans were used as the primary factor for determining the rating given the bank is primarily focused on commercial lending. Additionally, both 2022 and 2021 figures were used to evaluate the bank's performance, though 2022 figures are featured in the narrative and 2021 figures are used for comparison and detailed in Appendix A. Finally, when determining performance, the comparison to aggregate lender figures was weighted more heavily than the assessment area demographics (i.e., percentage of owner-occupied housing units or percentage of borrowers by income levels) as it is a better measure of loan demand.

A gap analysis was completed as part of the evaluation. In 2022, the bank originated HMDA and/or CRA small business loans in six of eight low-income census tracts (75.0 percent) and within 24 of 26 moderate-income census tracts (92.3 percent). Overall, the bank made loans in 92 of 104 (88.5 percent) in the assessment area. Based upon this analysis, there was no conspicuous,

⁸ The median family income levels (MFI) for census tracts are calculated using income data from the U.S. Census Bureau's American Community Survey and geographic designations from the Office of Management and Budget and are updated approximately every five years. (.12(m) Income Levels)

unexplained lending gaps in the assessment area.

HMDA Reportable Lending

In 2021 and 2022, the bank's rate of HMDA-reportable lending within low- and moderate-income census tracts was excellent. The bank's 2021 and 2022 HMDA-reportable lending in the assessment area was concentrated in home purchase, refinance, and home improvement loans. Due to the lack of volume, multi-family loans were not considered within the analysis of HMDA-reportable lending. However, the bank participated in the Habitat for Humanity Mortgage Purchase Program, in which 67 loans were purchased within the assessment area. Given these loans are coded as Loan Purpose Not Applicable, they are not reflected within the following loan tables but were included within the overall analysis.

Home Purchase Loans

Home purchase loans represented 18.9 percent of the bank's HMDA-reportable loans originated in Fort Wayne, IN MSA assessment area in 2022. Within low-income census tracts, the bank originated 4.5 percent of its home purchase loans, which was slightly above the 2.0 percent of the aggregate lenders and comparable to the 3.2 percent of owner-occupied housing units located in low-income tracts. Within moderate-income census tracts, the bank originated 4.5 percent of its home purchase loans, which was well below the aggregate lenders and owner-occupied demographics at 15.1 percent and 17.6 percent, respectively. Within middle-income census tracts, the bank originated 40.9 percent of its home purchase loans in 2022. This was comparable to the aggregate lenders and below the owner-occupied demographics at 41.0 percent and 45.1 percent, respectively. The bank originated 50.0 percent of its home purchase loans in upper-income census tracts, which was above the aggregate lenders and well above the owner-occupied demographics at 41.7 percent and 34.0 percent, respectively.

The bank's performance in 2021 exceeded the performance in 2022. The bank originated 2.0 percent of its home purchase loans within low-income census tracts, which was comparable to the aggregate lenders at 3.2 percent and below the owner-occupied demographics at 6.1 percent. Within moderate-income census tracts, the bank originated 18.4 percent of its home purchase loans, which was above the aggregate lenders and the owner-occupied demographics at 15.1 percent and 13.6 percent, respectively.

Refinance Loans

Refinance loans represented 27.5 percent of the bank's HMDA-reportable loans originated in the assessment area in 2022. Within low-income census tracts, the bank originated 7.8 percent of its refinance loans, which was above the aggregate lenders and the owner-occupied housing units

located in low-income tracts at 1.5 percent and 3.2 percent, respectively. Within moderate-income census tracts, the bank originated 7.8 percent of its refinance loans, which was below the aggregate lenders and owner-occupied demographics at 13.1 percent and 17.6 percent, respectively. Within middle-income census tracts, the bank originated 46.9 percent of its refinance loans. This was comparable to the aggregate lenders and owner-occupied demographics at 45.3 percent and 45.1 percent, respectively. The bank originated 37.5 percent of its refinance loans in upper-income census tracts, which was slightly below the aggregate lenders at 40.0 percent and above the owner-occupied demographics 34.0 percent.

The bank's performance in 2021 exceeded the performance of 2022. The bank originated 2.5 percent of its refinance loans within low-income census tracts, which was comparable to the aggregate lenders at 1.2 percent and below the owner-occupied demographics at 6.1 percent. Within moderate-income census tracts, the bank originated 12.9 percent of its refinance loans, which was above the aggregate lenders at 9.7 percent and comparable to the owner-occupied demographics at 13.6 percent, respectively.

Home Improvement Loans

Home improvement loans represented 24.9 percent of the bank's HMDA-reportable loans originated in the assessment area in 2022. Within low-income census tracts, the bank originated 1.7 percent of its home improvement loans, which was comparable to the 2.1 percent of the aggregate lenders and the 3.2 percent of owner-occupied housing units located in low-income tracts. Within moderate-income census tracts, the bank originated 12.1 percent of its home improvement loans, which was comparable to the aggregate lenders at 12.8 percent and below the owner-occupied demographics at 17.6 percent. Within middle-income census tracts, the bank originated 55.2 percent of its home improvement loans in 2022. This was well above the aggregate lenders and above the owner-occupied demographics at 39.9 percent and 45.1 percent, respectively. The bank originated 31.0 percent of its home improvement loans in upper-income census tracts, which was below the aggregate lenders and the owner-occupied demographics at 45.0 percent and 34.0 percent, respectively.

The bank's performance in 2021 exceeded its performance in 2022. In 2021, the bank originated 6.3 percent of its home improvement loans within low-income census tracts, which was slightly above the 3.8 percent of the aggregate lenders and comparable to the 6.1 percent of owner-occupied housing units. Within moderate-income census tracts, the bank originated 18.8 percent of its home improvement loans, which was above the aggregate lenders at 11.7 percent and the owner-occupied demographics at 13.6 percent.

The following table presents the bank's 2022 HMDA-reportable lending in the assessment area; 2021 tables are available in Appendix A.

Small Business Loans

The bank’s performance with respect to the geographic distribution of small business loans was good. The bank originated five loans, or 2.6 percent, within low-income census tracts, which was comparable to the aggregate lenders and the percentage of total businesses at 3.2 percent and 3.9 percent, respectively. Within moderate-income census tracts, the bank originated 33 loans, or 17.4 percent, which was also comparable to the aggregate lenders and the percentage of total business at 18.1 percent and 19.3 percent, respectively. In middle-income census tracts, the bank originated 77 loans, or 40.5 percent, which was comparable to the aggregate lenders and the percentage of total businesses at 40.4 percent and 41.6 percent, respectively. In upper-income census tracts, the bank originated 69 loans, or 36.3 percent, which was slightly above the aggregate lenders and above the percentage of total businesses at 33.7 percent and 30.9 percent, respectively. In 2021, the bank’s performance was consistent with 2022 figures.

The following table presents the bank’s 2022 small business lending in the assessment area; 2021 tables are available in Appendix A.

Lending to Borrowers of Different Income Levels and Lending to Businesses of Different Sizes

For the purposes of this review, loans made in calendar year 2021 or prior were analyzed based on 2011-2015 American Community Survey income designations for individuals⁹. Loans made in calendar year 2022 or

⁹ Income levels for individuals are calculated annually by the FFIEC using geographic definitions from the OMB, income data from the ACS and the Consumer Price Index from the Congressional Budget Office (.12(m) Income Levels).

after were analyzed based on 2016-2020 American Community Survey income designations for individuals.

1st Source Bank's lending activities reflect adequate distribution, particularly in its assessment area, of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the bank.

In 2022, the bank's performance relative to HMDA-reportable lending was good, as lending to low-income borrowers was comparable to aggregate lenders and below demographics. Lending to moderate-income borrowers was below both aggregate and demographic lenders. The bank's 2021 lending performance exceeded the performance in 2022. For loans to small businesses in 2022, the bank's performance was adequate. The bank's lending to businesses reporting annual revenue of \$1 million or less was below the peer performance and percentage of total businesses operating in the assessment area in 2022. The bank's 2021 performance was slightly better.

For purposes of this analysis, small business loans received the greater weight when determining the rating given the bank is primarily focused on commercial lending. In addition, when determining performance, the comparison to aggregate lender figures were weighted more heavily than the assessment area demographics (i.e., families by family income or total businesses) as it is a better measure of loan demand.

1st Source Bank exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, or businesses with gross annual revenues of \$1 million or less, consistent with safe and sound operations. 1st Source Bank makes use of innovative or flexible lending practices in a safe and sound manner to address the credit needs of low- or moderate-income individuals or geographies. These are exhibited by the bank's effective use of several products in its loan programs: Loan Reclamation, Flexible Consumer and Mortgage, and SBA Loan Programs. Some of the most notable products that are beneficial to the community area include the Credit Builder Loan Program, Unsecured Home Improvement lending, Community Development Mortgage program that aids first time homebuyers utilizing non-traditional credit sources and can be combined with down payment assistance, and the Title IX program, which is a revolving loan fund created by the city of Fort Wayne.

HMDA Reportable Lending

In 2021 and 2022, the bank's rate of HMDA-reportable lending to low- and moderate-income borrowers was good. Due to the lack of volume, multi-family loans were not considered within the analysis of HMDA-reportable lending.

Home Purchase Loans

In 2022, the bank originated 13.6 percent of its home purchase loans to low-income borrowers, which was slightly above the aggregate lenders at 10.9 percent and below the low-income families in the assessment area at 19.3 percent. The bank originated 9.1 percent of its home purchase loans to moderate-income borrowers, which was well below the aggregate lenders and below the moderate-income families in the assessment area at 22.8 percent and 18.8 percent, respectively. The bank originated 25.0 percent of its home purchase loans to middle-income borrowers, which was slightly above the aggregate lenders and middle-income families in the assessment area at 22.5 percent and 22.3 percent, respectively. The bank originated 47.7 percent of its home purchase loans to upper-income borrowers, which was significantly above the aggregate lenders at 28.5 percent and above the upper-income families in the assessment area at 39.6 percent.

The bank's performance in 2021 exceeded its 2022 performance. In 2021, the bank originated 18.4 percent of its home purchase loans to low-income borrowers, which was above the aggregate lenders at 10.0 percent and comparable to the low-income families in the assessment area at 20.0 percent. The bank originated 24.5 percent of its home purchase loans to moderate-income borrowers, which was comparable to the aggregate lenders at 23.9 percent and above the moderate-income families in the assessment area at 18.0 percent.

Refinance Loans

In 2022, the bank originated 18.8 percent of its refinance loans to low-income borrowers, which was above aggregate lenders at 14.3 percent and comparable to the low-income families in the assessment area at 19.3 percent. The bank originated 17.2 percent of its refinance loans to moderate-income borrowers, which was below the aggregate lenders at 26.7 percent and comparable to moderate-income families in the assessment area at 18.8 percent. The bank originated 20.3 percent of its refinance loans to middle-income borrowers, which was comparable to both the aggregate lenders and to the middle-income families in the assessment area at 22.4 percent and 22.3 percent, respectively. The bank originated 40.6 percent of its refinance loans to upper-income borrowers, which was well above the aggregate lenders at 27.4 percent and comparable to the upper-income families in the assessment area at 39.6 percent. The bank's performance in 2021 was largely consistent with 2022 figures.

Home Improvement Loans

In 2022, the bank originated 13.8 percent of its home improvement loans to low-income borrowers, which was comparable to the aggregate lenders at 11.6 percent and below the low-income families in the assessment area at 19.3 percent. The bank originated 19.0 percent of its home improvement loans to moderate-income borrowers, which was comparable to the aggregate lenders at 21.6

percent and comparable to moderate-income families in the assessment area at 18.8 percent. The bank originated 29.3 percent of its home improvement loans to middle-income borrowers, which was above the aggregate lenders and middle-income families in the assessment area at 23.4 percent and 22.3 percent, respectively. The bank originated 32.8 percent of its home improvement loans to upper-income borrowers, which was below the aggregate lenders and the upper-income families in the assessment area at 41.3 percent and 39.6 percent, respectively.

The bank's performance in 2021 slightly exceeded 2022 figures. In 2021, the bank originated 21.9 percent of its home improvement loans to low-income borrowers, which was well above the aggregate lenders at 11.6 percent and comparable to the low-income families in the assessment area at 20.0 percent. The bank originated 21.9 percent of its home improvement loans to moderate-income borrowers, which was comparable to the aggregate lenders at 21.0 percent and above the moderate-income families in the assessment area at 18.0 percent.

The following table presents the bank's 2022 HMDA-reportable lending in the assessment area; 2021 tables are available in Appendix A.

Small Business Loans

The bank's performance relative to small business lending was adequate. In 2022, the bank originated 60 loans, or 31.6 percent, to businesses with revenues of \$1 million or less. This rate was well below the aggregate lenders and significantly below the percentage of total businesses in the assessment area at 52.1 percent and 89.4 percent, respectively. Of the small business loans, 43.2 percent were made in amounts of \$100,000 or less, which are considered most beneficial to small businesses. Of the loans made to businesses with \$1 million or less, a majority, or 65.0 percent, were made in amounts of \$100,000 or less.

In 2021, the bank's performance was slightly better with the bank originating 36.9 percent of its loans to businesses with revenues of \$1 million or less, which was below the aggregate lenders at 46.6 percent and significantly below the percentage of total businesses in the assessment area at 89.3 percent. Of the small business loans, 68.1 percent were made in amounts of \$100,000 or less, which are considered most beneficial to small businesses. Of the loans made to businesses with \$1 million or less, a large majority or 80.7 percent, were made in amounts of \$100,000 or less.

The following table presents the borrower distribution of small business loans in 2022; 2021 tables are available in Appendix A.

Community Development Lending

1st Source Bank makes a relatively high level community development loans. Overall, the bank originated 20 community development loans totaling \$41.8 million in the assessment area. The loans were primarily to organizations/businesses that are focused on affordable housing and revitalization/stabilization by number and dollar. Overall, the volume of community development loans represents a decrease by number and dollar from the previous evaluation period when the bank originated 39 loans for \$48.5 million. By month, this represents a 34.3 percent decrease by number and a 10.9 percent increase by dollar. Of the community development loans originated during the last evaluation period, nine such loans for \$5.1 million were originated as part of the PPP in response to the COVID-19 pandemic in efforts to stabilize the assessment area. Thus, when accounting for PPP loans and the difference in months in evaluation period, the bank's lending increased by 24.0 percent by dollar.

In 2021 and 2022, the bank made nine Community Development Mortgages totaling approximately \$668,900. This program provides credit opportunity for first time homebuyers that earn less than 80 percent of median family income, who may not be able to demonstrate

creditworthiness through traditional means, such as credit reports. These loans demonstrate the use of innovative underwriting standards and provide excellent responsiveness to the credit and community development needs of the assessment area, as affordable housing was noted as a need by a community representative.

The following table presents the bank’s community development loans in the assessment area during the review period.

Community Development Loans June 8, 2021 – September 25, 2023										
Assessment Area	Affordable Housing		Community Service		Economic Development		Revitalize/ Stabilize		Total	
	#	\$ (000s)	#	\$ (000s)	#	\$ (000s)	#	\$ (000s)	#	\$ (000s)

INVESTMENT TEST

1st Source Bank’s performance relative to the Investment Test in the Fort Wayne, IN MSA is rated High Satisfactory as it made a significant level of qualified community development investments and donations, particularly those not routinely provided by private investors, rarely in a leadership position. The bank makes occasional use of innovative and/or complex investments to support community initiatives and demonstrates good responsiveness to credit and community development needs.

During the evaluation period the bank made \$3.4 million dollars in total community development investments that consisted of \$2.9 million for affordable housing purposes and \$0.5 million for economic development. Additionally, there were \$7.7 million in outstanding balances on the date of the performance evaluation from investments the bank had made in prior periods. Of the combined \$11.1 million there was \$1.9 million that was unfunded. At the previous evaluation, the bank largely participated in mortgage-backed securities. In this evaluation period, the bank made investments into Low-Income Housing Tax Credits (LIHTC), showing targeted efforts toward the affordable housing need cited by community representatives.

The following table presents the bank’s qualified community development investments during the review period.

Community Development Investments (Dollars in 000s) June 8, 2021 – September 25, 2023						
Assessment Area	Current Period Investments			Current Period Total (\$)	Prior Period Outstanding (\$)	Total Unfunded (\$)
	Affordable Housing (\$)	Community Service (\$)	Economic Development (\$)			
Fort Wayne, IN MSA	2,926	0	500	3,426	7,663	1,930

1st Source distributed \$458,335 in 47 qualified donations in the current evaluation period. Most of the donations were distributed amongst organizations providing community service, followed by economic development and affordable housing. This represents a decrease of number but an increase in dollar since the previous evaluation period of 75 donations totaling \$386,702. This is a 37.3 percent decrease by number and 18.5 percent increase by dollar. However, when considering the difference in review periods, the performance demonstrates a 19.2 percent decrease by number and 52.4 percent increase by dollar.

The following table presents the bank’s qualified community development donations during the review period.

Community Development Donations June 8, 2021 – September 25, 2023										
Assessment Area	Affordable Housing		Community Service		Economic Development		Revitalize/ Stabilize		Total

SERVICE TEST

1st Source’s performance relative to the Service Test in the Fort Wayne, Indiana MSA is rated Outstanding based on the following factors: delivery systems are accessible to the bank’s geographies and individuals of different income levels in the assessment area; services do not vary in a way that inconveniences the needs of its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals; and the bank is a leader in providing community development services.

Retail Services

The distribution of the branch offices and ATMs is performed using current data (2022) and any changes in the median family income level of the geographies where the branches are located.

1st Source Bank's retail delivery services are accessible to geographies and individuals of different income levels in its assessment area. To the extent changes have been made, its record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly in low- or moderate-income geographies or to low- or moderate-income individuals. Its services (including, where appropriate, business hours) do not vary in a way that inconveniences its assessment area, particularly low- or moderate-income geographies or low- or moderate-income individuals.

The bank operates a total of nine branches and nine ATMs. The bank has one branch in a census tract with unknown-income (Indiana University-Purdue University campus), one branch in a moderate-income census tract, four branches in middle-income census tracts, and three branches in upper-income census tracts. Each branch is accompanied by an ATM. A new LPO was opened in a moderate-income census tract in 2021.

Bank locations are open Monday through Friday with standard hours typically from 9:00 a.m. to 5:00 p.m. and limited hours on Saturdays typically until noon. All products and services are consistent among all branches. The bank offers ATMs, internet and mobile banking, telephone banking services, and eBanking products to increase access and provide additional services to customers.

Community Development Services

1st Source Bank is a leader in providing community development services. Bank employees provided 905 hours, or 15.3 percent of the 5,905 total hours of qualified community development services in the assessment area. This represents an increase of hours of 30.2 percent compared to the previous evaluation period of 695 hours. By month, the previous evaluation had 19.3 hours per month, whereas this evaluation had 32.3 hours per month. This represents a 67.4 percent increase by month. The service hours were primarily directed towards providing community service followed by economic development and affordable housing. While the hours dedicated to affordable housing make up the smallest portion service hours, they were highly impactful. During these hours, bank staff partnered with Habitat for Humanity to provided financial education to low- and moderate-income homebuyers; one community representative noted this a major need is the assessment area, making this activity particularly responsive.

The following table presents the bank's qualified community development services during the review period.

Community Development Services June 8, 2021 – September 25, 2023						
Assessment Area	Affordable Housing	Community Service	Economic Development	Revitalize/ Stabilize	Total Hours	% of Total
	# Hours	# Hours	# Hours	# Hours

WESTERN INDIANA NON-MSA – Full Review

SCOPE OF THE EXAMINATION

1st Source Bank’s operations in Western, Indiana Non-MSA received a full-scope review. The scope for this assessment area is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE WESTERN INDIANA NON-MSA¹⁰

The Western, Indiana Non-MSA consist of Fulton, Kosciusko, Marshall, Pulaski, and Starke Counties in their entirety. This is unchanged since the previous evaluation. The assessment area consists of a total of 50 census tracts comprised of one low-, five moderate-, 35 middle-, and nine upper-income census tracts. This represents a change from the previous evaluation where the assessment area contained zero low-, five moderate-, 36 middle-, and seven upper-income census tracts totaling 48 census tracts. There are no distressed or underserved middle-income tracts in the assessment area.

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau’s American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

¹⁰ Census tract designations are based on American Community Survey income data. For years 2022 and after, the designations are based on 2016-2020 ACS data. For years 2021 and before, the designations are based on 2011-2015 ACS data. For examinations that include performance before and after 2022, both sets of data have been used to perform the analysis of bank activity in the respective timeframes.

1st Source Bank has nine branches and 15 ATMs (eight full service and seven cash-only). The bank has three branches in moderate-income census tracts, five branches in middle-income census tracts, and one branch in an upper-income census tract. Each branch is accompanied by an ATM except for one branch.

The Federal Deposit Insurance Corporation (FDIC) market share report, as of June 30, 2022, ranked the bank second in the market among 20 institutions serving the assessment area, with 18.5 percent of the market share. The institution with the largest market share of deposits was Lake City Bank with 35.4 percent. Deposits in the assessment area represent 11.9 percent of the bank's overall deposit totals.

1st Source Bank was fourth in 2022 total HMDA originations within the assessment area among 264 HMDA reporters with 252 originations. First Federal Savings Bank was the market leader with 518 originations followed by Ruoff Mortgage Company with 473 originations. The bank was fifth in 2022 among 78 CRA reporters in originations with 291 originations. The market leader was U.S. Bank with 580 originations in 2022 followed by American Express with 400 originations.

Information regarding census related and business demographic characteristics of the assessment area is provided in the following table.

Note: Percentages may not total 100.0 percent due to rounding.

Population Characteristics

The following table presents the population trends for the assessment area, its counties, the entire Non-MSA Indiana, and the state of Indiana from 2015 to 2020. Of the five counties comprising the bank’s assessment area, only two of the counties experienced population increases with Kosciusko County leading with 2.9 percent followed by Starke County with 1.1 percent. The other three counties experienced decreases led by Pulaski County with 4.1 percent, Marshall County with 1.8 percent, and Fulton County with 0.2 percent. For comparison purposes, the state of Indiana experienced a 3.3 percent population gain while all non-MSA counties in Indiana experienced an overall decline of 0.3 percent.

Community representatives were concerned the supply of affordable housing was limited for the residents, especially for low- and moderate-income families. Residents’ income could not keep pace with the rising housing costs, which could lead to residents choosing to live further from the community for affordable options and commuting into the counties for employment. Additionally, a community representative noted that once students go to universities outside the community, they typically do not return.

Population Change			
Area	2015 Population	2020 Population	Percent Change (%)
Assessment Area	181,636	182,700	0.6
Fulton County, Indiana	20,527	20,480	-0.2
Kosciusko County, Indiana	77,983	80,240	2.9
Marshall County, Indiana	46,962	46,095	-1.8
Pulaski County, Indiana	13,047	12,514	-4.1
Starke County, Indiana	23,117	23,371	1.1
Non-MSA Indiana	1,475,951	1,471,133	-0.3
State of Indiana	6,568,645	6,785,528	3.3
<i>Source: 2011-2015 U.S. Census Bureau American Community Survey 2020 U.S. Census Bureau Decennial Census</i>			

Income Characteristics

Based upon 2022 FFIEC Census Data, the assessment area had 36.8 percent of its families by family income classified as either low- (17.9 percent) or moderate-income (18.9 percent). The percentage of families residing within the assessment area that live below the poverty line is 8.1 percent, which is below the state of Indiana rate of 8.9 percent.

According to 2016-2020 American Community Survey data, all five counties in the assessment area experienced an increase in median family income (MFI) from 2015 to 2020. Most of the counties had growth over eight percent. Starke County increased by 10.1 percent, Kosciusko and Pulaski counties increased by 9.8 percent, and Fulton County increased by 8.8 percent. Marshall County had the smallest increase at 5.7 percent. Only Starke and Kosciusko Counties outpaced the state of Indiana at 9.7 percent. A community representative stated Marshall County residents may not be receiving as large of an MFI increase due to many of the salaried workers living in the surrounding counties and commuting into the county for work. Another community representative has noted that while Starke County’s MFI has risen over the past several years, it has only marginally kept up with rising cost of living.

The following table compares the median family income (MFI) for the assessment area, the counties that makeup the assessment area, the entire Non-MSA Indiana, and the state of Indiana.

Median Family Income Change			
Area	2015 Median Family Income (\$)	2020 Median Family Income (\$)	Percent Change (%)
Assessment Area	62,894	68,180	8.4
Fulton County, Indiana	59,442	64,657	8.8
Kosciusko County, Indiana	66,786	73,298	9.8
Marshall County, Indiana	65,119	68,813	5.7
Pulaski County, Indiana	56,098	61,569	9.8
Starke County, Indiana	54,707	60,246	10.1
Non-MSA Indiana	60,873	67,032	10.1
State of Indiana	66,777	73,265	9.7
<i>Source: 2011 – 2015 U.S. Census Bureau American Community Survey 2016 – 2020 U.S. Census Bureau American Community Survey Median Family Incomes have been inflation-adjusted and are expressed in 2020 dollars.</i>			

Housing Characteristics

Based upon 2022 FFIEC Census Data, the assessment area includes 86,197 housing units; the majority are owner-occupied, representing 61.8 percent of the units, followed by 19.8 percent rental units and 18.4 percent vacant housing units. The median age of housing stock in the assessment area is 54 years, which is older than the average in the state of Indiana as a whole (46 years).

The following table presents the recent housing cost burdens for the five individual counties within the assessment area, the bank’s assessment area, the Non-MSA Indiana, and the state of Indiana. The cost burden is a measure of affordability via a comparative analysis of individuals of different income levels that spend 30.0 percent or more of their income on housing costs. Renters

across all income levels in the assessment area experience this burden at 35.6 percent. Marshall County had the highest number of all renters experiencing a rental cost burden at 43.1 percent. Consistent with all communities, low-income renters experienced greater rental cost burdens than moderate-income renters. Homeowners across all income levels in the assessment area experience a cost burden at 14.5 percent. Marshall County had the highest number of all homeowners experiencing a housing cost burden at 16.5 percent. Consistent with all communities, low-income homeowners experienced greater rental cost burdens than moderate-income homeowners.

According to FFIEC HMDA loan and application records, home mortgage trends reflect increases in home mortgage activity in recent years across the counties and the broader region. These trends suggest a continued increase in demand for home purchases, driving up home values and indicating that housing cost burdens for low- and moderate-income homeowners will remain elevated. According to the 2022 U.S. Census, the assessment area had a median housing value of \$138,079 and median gross rent of \$757.

Community representatives noted that housing availability is limited, and the cost of building materials is a major factor that limits the development of affordable housing. One community representative stated that using the Indiana Housing and Community Development Authority tax credits would be beneficial to build permanent supportive housing mixed with low-income housing alternatives.

Housing Cost Burden						
Area	Cost Burden (%) – Renters			Cost Burden (%) – Owners		
	Low Income	Moderate Income	All Renters	Low Income	Moderate Income	All Owners
Assessment Area	72.3	23.4	35.6	52.2	21.2	14.5
Fulton County, Indiana	63.1	34.3	34.9	54.8	18.6	15.0
Kosciusko County, Indiana	77.0	21.8	32.9	47.6	21.8	12.8
Marshall County, Indiana	75.4	20.5	43.1	56.0	24.4	16.5

Non-MSA Indiana	66.5	20.4	34.4	53.2	19.9	14.4
State of Indiana	73.3	26.8	41.0	57.2	22.9	15.1
<i>Cost Burden is housing cost that equals 30 percent or more of household income</i>						
<i>Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy</i>						

Employment Characteristics

The following table presents the unemployment rates between 2018 and 2022 for the assessment area, the five individual counties which makeup the assessment area, the Non-MSA Indiana, and the state of Indiana. Overall, all geographies have experienced decreased unemployment rates. Notable increases are observed in 2020 due to the widespread economic downturn caused by the COVID-19 pandemic. Since then, unemployment rates in both areas have declined, even below that of pre-pandemic rates. Although unemployment rates have been decreasing, a community representative noted there is a need to find employees to fill positions as the number of employers is constantly growing. Some of the primary industries that need employees are in manufacturing, healthcare, and retail trade. A community representative stated the decreasing population, seasonal agricultural and tourism jobs, lack of childcare services, and limited transportation have held back the potential growth in employment.

Unemployment Rates (%)					
Area	2018	2019	2020	2021	2022
Assessment Area	3.1	3.1	6.6	3.3	2.7
Fulton County, Indiana	3.3	3.1	6.7	3.6	3.0
Kosciusko County, Indiana	2.6	2.8	6.3	3.0	2.5
Marshall County, Indiana	3.2	3.1	6.6	2.9	2.6
Pulaski County, Indiana	3.1	3.0	6.2	3.2	2.6
Starke County, Indiana	4.3	4.3	8.2	4.7	3.8
Non-MSA Indiana	3.2	3.1	6.7	3.3	2.8
State of Indiana	3.4	3.3	7.3	3.9	3.0

Source: Bureau of Labor Statistics (BLS), Local Area Unemployment Statistics

According to the U.S. Bureau of Labor Statistics, as of the second quarter of 2022, the assessment area has many of its residents employed in manufacturing (24,280), retail trade (7,397), and healthcare (5,265). However, much of the community is agriculturally based as well. A community representative stated the biggest employers in the market have been companies related to industrial solar projects, education, a potato factory, Southwire wire and cable manufacturing, and Hersey’s Salted Snacks. Manufacturing has a focus on furniture, boats, and recreational vehicles.

Community Representatives

Four community representatives with a focus on affordable housing and economic development were contacted to increase the understanding of the credit needs and market conditions within the assessment area. The focus of the community representatives included the lack of available housing in the community, the need to retain the population and fill employment opportunities,

the need for financial education, the lack of healthcare/childcare options, and food insecurity. One community representative noted that housing tax credits to build permanent supportive housing mixed with low-income housing alternatives are essential.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS WESTERN INDIANA NON-MSA

LENDING TEST

The geographic distribution of loans reflects excellent penetration throughout the assessment area. The distribution of borrowers reflects, given the product lines offered, adequate penetration among individuals of different income levels and among businesses of different sizes. 1st Source Bank also exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses. The bank makes a relatively high level of community development loans, and the bank makes use of innovative and flexible lending practices in serving assessment area credit needs.

The bank participates in several loan programs designed to assist low- and moderate-income borrowers and small businesses. These include the use of Federal Home Loan Bank programs which provide down payment and closing cost assistance to low- and moderate-income buyers. The bank also made over 47 Unsecured Home Improvement Loans under a program which utilizes non-traditional credit and has a minimum loan amount of \$1,000.

Geographic Distribution of Loans

For the purposes of this review, loans made in calendar 2021 and prior were analyzed based on the 2011-2015 American Community Survey income designations data¹¹. Loans made in calendar years 2022 and after were analyzed based on income designations from the 2016-2020 American Community Survey data.

1st Source Bank's lending activities reflect excellent distribution throughout the assessment area particularly to low- and moderate-income census tracts. In 2022, the bank's rate of home mortgage lending within low- and moderate-income census tracts was good. Within low-income census tracts, the bank's performance was comparable to the aggregate lenders and the owner-occupied demographics. Within moderate-income census tracts, the bank's performance was comparable to the aggregate lenders and above the owner-occupied demographics. In 2021, the bank's performance was consistent. Additionally, the bank's performance with respect to small business lending was excellent due to performance well above peer and demographics in the low-income

¹¹ The median family income levels (MFI) for census tracts are calculated using income data from the U.S. Census Bureau's American Community Survey and geographic designations from the Office of Management and Budget and are updated approximately every five years. (.12(m) Income Levels)

census tracts, and comparable to peer and below demographics in the moderate-income census tracts. The bank's 2021 small business lending performance was mostly consistent with 2022 figures.

For purposes of this analysis, small business loans were used as the primary factor for determining the rating given the bank is primarily focused on commercial lending. Additionally, both 2022 and 2021 figures were used to evaluate the bank's performance, though 2022 figures are featured in the narrative and 2021 figures are used to comparison and detailed in Appendix A. Finally, when determining performance, the comparison to aggregate lender figures was weighted more heavily than the assessment area demographics (i.e., percentage of owner-occupied housing units or percentage of borrowers by income levels) as it is a better measure of loan demand.

A gap analysis was completed as part of the evaluation. In 2022, the bank originated HMDA and/or CRA small business loans in the sole low-income census tracts and within all five of the moderate-income census tracts. Overall, the bank made loans in 49 of 50 (98.0 percent) in the assessment area. Based upon this analysis, there was no conspicuous, unexplained lending gaps in the assessment area.

HMDA Reportable Lending

In 2021 and 2022, the bank's rate of HMDA-reportable lending within low- and moderate-income census tracts was good. The bank's 2021 and 2022 HMDA-reportable lending in the assessment area was concentrated in home purchase, refinance, and home improvement loans. Due to the lack of volume, multi-family loans were not considered within the analysis of HMDA-reportable lending.

Home Purchase Loans

Home purchase loans represented 29.0 percent of the bank's HMDA-reportable loans originated in Western, IN Non-MSA assessment area in 2022. Within low-income census tracts, the bank originated 1.4 percent of its home purchase loans, which was comparable to the 1.5 percent of the aggregate lenders and the 1.0 percent of owner-occupied housing units located in low-income tracts. Within moderate-income census tracts, the bank originated 11.0 percent of its home purchase loans, which was comparable to the aggregate lenders and above the owner-occupied demographics at 10.9 percent and 7.6 percent, respectively. Within middle-income census tracts, the bank originated 72.6 percent of its home purchase loans in 2022. This was above the aggregate lenders and comparable to the owner-occupied demographics at 66.2 percent and 73.3 percent, respectively. The bank originated 15.1 percent of its home purchase loans in upper-income census tracts, which was below the aggregate lenders and the owner-occupied demographics at 21.5 percent and 18.1 percent, respectively. The bank's performance in 2021 was largely consistent.

Refinance Loans

Refinance loans represented 38.9 percent of the bank's HMDA-reportable loans originated in the assessment area in 2022. Within low-income census tracts, the bank originated 1.0 percent of its refinance loans, which was comparable to the aggregate lenders and owner-occupied demographics at 0.7 percent and 1.0 percent, respectively. Within moderate-income census tracts, the bank originated 14.3 percent of its refinance loans, which was above the aggregate lenders and the owner-occupied demographics at 7.5 percent and 7.6 percent, respectively. Within middle-income census tracts, the bank originated 78.6 percent of its refinance loans. This was above the aggregate lenders and owner-occupied demographics at 72.0 percent and 73.3 percent, respectively. The bank originated 6.1 percent of its refinance loans in upper-income census tracts, which was well below the aggregate lenders and the owner-occupied demographics at 19.9 percent and 18.1 percent, respectively. The bank's performance in 2021 was largely consistent.

Home Improvement Loans

Home improvement loans represented 31.7 percent of the bank's HMDA-reportable loans originated in the assessment area in 2022. Within low-income census tracts, the bank originated 3.8 percent of its home improvement loans, which was comparable to the 1.6 percent of the aggregate lenders and above the 1.0 percent of owner-occupied housing units located in low-income tracts. Within moderate-income census tracts, the bank originated 6.3 percent of its home improvement loans, which was comparable to the aggregate lenders and owner-occupied demographics at 6.8 percent and 7.6 percent, respectively. Within middle-income census tracts, the bank originated 77.5 percent of its home improvement loans in 2022. This was above the aggregate lenders and owner-occupied demographics at 68.8 percent and 73.3 percent, respectively. The bank originated 12.5 percent of its home improvement loans in upper-income census tracts, which was below the aggregate lenders and the owner-occupied demographics at 22.9 percent and 18.1 percent, respectively. The bank's performance in 2021 was largely consistent.

The following table presents the bank's 2022 HMDA-reportable lending in the assessment area; 2021 tables are available in Appendix A.

Small Business Loans

The bank’s performance with respect to the geographic distribution of small business loans was excellent. In 2022, the bank originated 315 small business loans in the assessment area. The bank originated 92 loans, or 29.2 percent, within low-income census tracts, which was well above the aggregate lenders and the percentage of total businesses at 4.1 percent and 4.0 percent, respectively. In moderate-income census tracts, the bank originated 32 loans, or 10.2 percent, which was comparable to the aggregate lenders at 10.1 percent and below the percentage of total business at 14.2 percent. In middle-income census tracts, the bank originated 166 loans, or 52.7 percent, which was below the aggregate lenders and percentage of total businesses at 66.9 percent and 64.7 percent, respectively. Within upper-income census tracts, the bank originated 25 loans, or 7.9 percent, which was below the aggregate lenders and percentage of total businesses at 17.9 percent and 17.1 percent, respectively.

The bank’s 2021 lending performance was mostly consistent with 2022 figures. In 2021, the assessment area had no low-income census tracts. Within moderate-income census tracts, the bank’s performance of 25.2 percent was well above the aggregate lenders at 13.2 percent and above the percentage of total businesses at 18.0 percent, respectively.

The following table presents the bank’s 2022 small business lending in the assessment area; 2021 tables are available in Appendix A.

Lending to Borrowers of Different Income Levels and Lending to Businesses of Different Sizes

For the purposes of this review, loans made in calendar year 2021 or prior were analyzed based on 2011-2015 American Community Survey income designations for individuals¹². Loans made in calendar year 2022 or after were analyzed based on 2016-2020 American Community Survey income designations for individuals.

1st Source Bank's lending activities reflect adequate distribution, particularly in its assessment area, of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the bank.

In 2021 and 2022, the bank's performance relative to HMDA-reportable lending was excellent. In 2022, lending to low-income borrowers was comparable or above aggregate lenders and below the percentage of low-income families in the assessment area. Lending to moderate-income borrowers was also comparable or above the aggregate lenders and the percentage of moderate-income families in the assessment area. The bank's overall HMDA-reportable lending performance in 2021 was comparable. For loans to small businesses in 2022, the bank's performance was adequate. The bank's lending to businesses reporting annual revenue of \$1 million or less was significantly below the percentage of total businesses operating in the assessment area in 2022 and below peer lending. For loans to small businesses in 2021, the bank's performance exceeded its 2022 performance. The bank's lending to businesses reporting annual revenue of \$1 million or less was comparable to peer lending and significantly below the percentage of businesses operating in the assessment area. Due to loan volume, 2021 was weighted more heavily, therefore the bank's performance relative to small business lending is adequate.

For purposes of this analysis, small business loans received the greater weight when determining the rating given the bank is primarily focused on commercial lending. In addition, when determining performance, the comparison to aggregate lender figures were weighted more heavily than the assessment area demographics (i.e., families by family income or total businesses) as it is a better measure of loan demand.

HMDA Reportable Lending

In 2021 and 2022, the bank's rate of HMDA-reportable lending to low- and moderate-income borrowers was excellent. Due to the lack of volume, multi-family loans were not considered within the analysis of HMDA-reportable lending.

¹² Income levels for individuals are calculated annually by the FFIEC using geographic definitions from the OMB, income data from the ACS and the Consumer Price Index from the Congressional Budget Office (.12(m) Income Levels).

Home Purchase Loans

In 2022, the bank originated 12.3 percent of its home purchase loans to low-income borrowers, which was above the aggregate lenders at 9.2 percent and below the low-income families in the assessment area at 17.9 percent. The bank originated 11.0 percent of its home purchase loans to moderate-income borrowers, which was well below the aggregate lenders and below the moderate-income families in the assessment area at 22.4 percent and 18.9 percent, respectively. The bank originated 27.4 percent of its home purchase loans to middle-income borrowers, which was above the aggregate lenders and middle-income families in the assessment area at 23.4 percent and 22.2 percent, respectively. The bank originated 45.2 percent of its home purchase loans to upper-income borrowers, which was significantly above the aggregate lenders at 28.6 percent and above the upper-income families in the assessment area at 41.0 percent.

The bank's performance in 2021 slightly exceeded 2022 figures. In 2021, the bank originated 12.2 percent of its home purchase loans to low-income borrowers, which was above the aggregate lenders at 6.8 percent and below the low-income families in the assessment area at 15.8 percent. The bank originated 21.1 percent of its home purchase loans to moderate-income borrowers, which was comparable to the aggregate lenders at 21.0 percent and slightly above the moderate-income families in the assessment area at 18.7 percent.

Refinance Loans

In 2022, the bank originated 10.2 percent of its refinance loans to low-income borrowers, which was below the aggregate lenders and the low-income families in the assessment area at 13.5 percent and 17.9 percent, respectively. The bank originated 38.8 percent of its refinance loans to moderate-income borrowers, which was well above the aggregate lenders and the moderate-income families in the assessment area at 21.8 percent and 18.9 percent, respectively. The bank originated 26.5 percent of its refinance loans to middle-income borrowers, which was comparable to the aggregate lenders and above the middle-income families in the assessment area at 26.7 percent and 22.2 percent, respectively. The bank originated 24.5 percent of its refinance loans to upper-income borrowers, which was below the aggregate lenders at 31.2 percent and well below the upper-income families in the assessment area at 41.0 percent.

The bank's performance in 2021 was slightly below than 2022 figures. In 2021, the bank originated 9.3 percent of its refinance loans to low-income borrowers, which was above the aggregate lenders at 6.4 percent and below the low-income families in the assessment area at 15.8 percent. The bank originated 16.1 percent of its refinance loans to moderate-income borrowers, which was comparable to the aggregate lenders at 16.8 percent and slightly below the moderate-income families in the assessment area at 18.7 percent.

Home Improvement Loans

In 2022, the bank originated 6.3 percent of its home improvement loans to low-income borrowers, which was comparable to the aggregate lenders at 7.7 percent and well below the low-income families in the assessment area at 17.9 percent. The bank originated 18.8 percent of its home improvement loans to moderate-income borrowers, which was comparable to the aggregate lenders and the moderate-income families in the assessment area at 18.6 percent and 18.9 percent, respectively. The bank originated 32.5 percent of its home improvement loans to middle-income borrowers, which was above the aggregate lenders and well above the middle-income families in the assessment area at 24.9 percent and 22.2 percent, respectively. The bank originated 40.0 percent of its home improvement loans to upper-income borrowers, which was below the aggregate lenders and comparable to the upper-income families in the assessment area at 45.0 percent and 41.0 percent, respectively. The bank's performance in 2021 was consistent with 2022.

The following table presents the bank's 2022 HMDA-reportable lending in the assessment area; 2021 tables are available in Appendix A.

Small Business Loans

The bank's performance relative to small business lending was adequate. In 2022, the bank originated 119 loans, or 37.8 percent, to businesses with revenues of \$1 million or less. This rate was below the aggregate lenders at 54.9 percent and significantly below the percentage of total businesses in the assessment area at 89.9 percent. Of the small business loans, 62.9 percent were made in amounts of \$100,000 or less, which are considered most beneficial to small businesses. Of the loans made to businesses with \$1 million or less, a large majority or 73.9 percent, were made in amounts of \$100,000 or less.

In 2021, the bank's performance exceeded its 2022 performance. The bank originated 47.5 percent, to businesses with revenues of \$1 million or less. This rate was comparable to the aggregate lenders at 48.5 percent and significantly below the percentage of total businesses in the assessment area at 90.0 percent. Of the small business loans, 85.2 percent were made in amounts of \$100,000 or less, which are considered most beneficial to small businesses. Lending was slightly below the aggregate lenders at 89.4 percent. Of the loans made to businesses with \$1 million or less, a substantial majority or 92.8 percent, were made in amounts of \$100,000 or less.

The following table presents the borrower distribution of small business loans in 2022; 2021 tables are available in Appendix A

Community Development Lending

1st Source Bank makes a relatively high level of community development loans. Overall, the bank originated 11 community development loans totaling \$37.9 million in the assessment area. The loans were primarily to organizations/businesses that are focused on economic development by number and dollar. In 2021, the bank made three SBA 504 loans totaling \$2.3 million, demonstrating the use of complex and flexible underwriting requirements. This is particularly responsive to the needs of the assessment area, as community representatives noted lack of available funding for small businesses in the area. Overall, the volume of community development loans represents a decrease from the previous evaluation period when the bank originated 28 loans for \$84.5 million. By month, this represents a 49.5 percent decrease by number and a 42.3 percent decrease by dollar. However, the previous evaluation had elevated levels of lending activity due in part to the number of PPP loans during the COVID-19 pandemic.

The following table presents the bank’s community development loans in the assessment area during the review period.

Community Development Loans June 8, 2021 – September 25, 2023										
Assessment Area	Affordable Housing		Community Service		Economic Development		Revitalize/Stabilize		Total	
	#	\$ (000s)	#	\$ (000s)	#	\$ (000s)	#	\$ (000s)	#	\$ (000s)
Western, IN Non-MSA	1	51	3	213	7	37,655	0	0	11	37,919

INVESTMENT TEST

1st Source Bank’s performance relative to the Investment Test in the assessment area is rated High Satisfactory as it made a significant level of qualified community development investments and donations, particularly those not routinely provided by private investors, rarely in a leadership position. The bank makes rare use of innovative and/or complex investments to support community initiatives and demonstrates good responsiveness to credit and community development needs.

During the evaluation period the bank made \$3.2 million dollars in total community development investments that consisted of \$2.6 million for affordable housing purposes and \$0.6 million for economic development. Additionally, there were \$2.9 million in outstanding balances on the date of the performance evaluation from investments the bank had made in prior periods. Of the combined \$6.1 million there was \$1.8 million that was unfunded. The bank maintained several prior period Low-Income Housing Tax Credits. These investments demonstrate the use of innovative and complex qualified investments and are particularly responsive to the credit and community development needs of the assessment area, as affordable housing was noted as a need by community representatives in the assessment area.

The following table presents the bank’s qualified community development investments during the review period.

Community Development Investments (Dollars in 000s) June 8, 2021 – September 25, 2023						
Assessment Area	Current Period Investment			Current Period Total (\$)	Prior Period Outstanding (\$)	Total Unfunded (\$)
	Affordable Housing (\$)	Community Service (\$)	Economic Development (\$)			
Western, IN Non-MSA	2,631	0	579	3,211	2,855	1,791

1st Source distributed \$266,641 in 82 qualified donations in the current evaluation period. Most of the donations were distributed amongst organizations providing community service, followed by economic development and revitalization/stabilization. This represents a decrease of number and dollar volume since the previous evaluation period of 110 donations totaling \$350,990. This is a 25.5 percent decrease by number and 24.0 percent decrease by dollar. However, when considering the difference in review periods, the performances demonstrate a 4.2 percent decrease by number and 2.3 percent increase by dollar.

The following table presents the bank’s qualified community development donations during the review period.

Community Development Donations June 8, 2021 – September 25, 2023										
Assessment Area	Affordable Housing		Community Service		Economic Development		Revitalize/ Stabilize		Total	
	#	\$	#	\$	#	\$	#	\$	#	\$
Western, IN Non-MSA	0	0	50	80,049	30	185,592	2	1,000	82	266,641

SERVICE TEST

1st Source’s performance relative to the Service Test in the assessment area is rated High Satisfactory based on the following factors: delivery systems are reasonably accessible to the bank’s geographies and individuals of different income levels in the assessment area; services do not vary in a way that inconveniences the needs of its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals; and the bank provides a relatively high level of community development services.

Retail Services

The distribution of the branch offices and ATMs is performed using current data (2022) and any changes in the median family income level of the geographies where the branches are located.

1st Source Bank’s retail delivery services are accessible to geographies and individuals of different income levels in its assessment area. To the extent changes have been made, its record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly in low- or moderate-income geographies or to low- or moderate-income individuals. Its services (including, where appropriate, business hours) do not vary in a way that inconveniences its assessment area, particularly low- or moderate-income geographies or low- or moderate-income individuals. The bank operates a total of nine branches and 15 ATMs. Each

branch is accompanied by an ATM, with the exception of one branch. The bank has three branches in moderate-income census tracts, five branches in middle-income census tracts, and one branch in an upper-income census tract.

Bank locations are open Monday through Friday with standard hours typically from 9:00 a.m. to 5:00 p.m. and limited hours on Saturdays typically until noon. All products and services are consistent among all branches. The bank offers ATMs, internet and mobile banking, telephone banking services, and eBanking products to increase access and provide additional services to customers.

Community Development Services

1st Source Bank provides a relatively high level of community development services. Bank employees provided 591 hours, or 10.0 percent of the 5,905 total hours of qualified community development services in the assessment area. This represents a decrease of hours of 42.9 percent compared to the previous evaluation period of 1,035 hours. By month, the previous evaluation had 28.8 hours per month, whereas this evaluation had 21.1 hours per month. This represents a 26.7 percent decrease by month. The service hours were primarily directed towards providing economic development followed by community service, affordable housing, and revitalization/stabilization. Service hours directed toward economic development are particularly responsive, as the community struggles to maintain residents after high school graduation, resulting in small businesses struggling to find employees.

The following table presents the bank’s qualified community development services during the review period.

Community Development Services June 8, 2021 – September 25, 2023						
Assessment Area	Affordable Housing	Community Service	Economic Development	Revitalize/ Stabilize	Total Hours	% of Total
	# Hours	# Hours	# Hours	# Hours		
Western, IN Non-MSA	34	251	303	3	591	10.0

EASTERN INDIANA NON-MSA – Limited Review

SCOPE OF THE EXAMINATION

1st Source Bank’s operations in the Eastern Indiana Non-MSA received a limited-scope review. The scope for this assessment area is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE EASTERN INDIANA NON-MSA¹³

The Eastern Indiana Non-MSA consists of Huntington and Wells Counties in their entirety. This is unchanged since the previous evaluation. The assessment area consists of a total of 16 census tracts comprised of two moderate-, 10 middle-, and four upper-income census tracts. This represents a change from the previous evaluation where the assessment area contained three moderate-, nine middle-, and four upper-income census tracts. There are no distressed or underserved middle-income tracts in the assessment area.

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau’s American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

¹³ Census tract designations are based on American Community Survey income data. For years 2022 and after, the designations are based on 2016-2020 ACS data. For years 2021 and before, the designations are based on 2011-2015 ACS data. For examinations that include performance before and after 2022, both sets of data have been used to perform the analysis of bank activity in the respective timeframes.

<i>Source: U. S. Census Bureau: Decennial Census: American Community Survey Data: 2011-2015 U.S. Census Bureau: Decennial Census: America Community Survey Data: 2016-2020</i>			

1st Source Bank has two branches and two ATMs (one full-service and one cash-only). The bank has one branch in a moderate-income census tract and one branch in a middle-income census tract. Each branch is accompanied by an ATM.

The Federal Deposit Insurance Corporation (FDIC) market share report, as of June 30, 2022, ranked the bank eighth in the market among 11 institutions serving the assessment area, with 4.3 percent of the market share. The two institutions with the largest market share of deposits were First Federal Savings Bank and PNC Bank N.A. with 17.3 percent and 16.5 percent, respectively. Deposits in this assessment area represent 1.0 percent of the bank’s overall deposit totals.

1st Source Bank was twelfth in 2022 total HMDA originations within the assessment area counties among 153 HMDA Reporters with 45 originations, compared to Ruoff Mortgage Company Inc. which ranked first with 200 originations and Three Rivers Federal Credit Union which ranked second with 161 originations. The bank was thirteenth in 2022 among 55 CRA reporters in originations with 22 originations, compared to American Express which ranked first with 148 originations and JP Morgan Chase Bank N.A. which ranked second with 146 originations.

Information regarding census-related and business demographic characteristics of the assessment area is provided in the following table.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Assessment Area	Lending Test	Investment Test	Service Test
Eastern Indiana Non-MSA	Consistent	Consistent	Consistent

The institution's lending, investment, and service performance in the area is consistent with the institution's performance for the state of Indiana.

Of note, the bank participated in the Habitat for Humanity Mortgage Purchase Program, in which 14 loans were purchased within the assessment area. Given these loans are coded as Loan Purpose Not Applicable, they are not reflected within the following HMDA-lending tables but were included within the overall analysis.

GARY, IN MD – Limited Review

SCOPE OF THE EXAMINATION

1st Source Bank's Operations in the Gary, IN MD received a limited-scope review. The scope for this assessment area is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE GARY, IN MD #23844 ¹⁴

The Gary, IN, MD consists of Porter County in its entirety. This is unchanged since the previous evaluation. Excluded are Jasper, Lake, and Newton Counties which are also part of the MD. The assessment area consists of a total of 43 census tracts comprised of one moderate-, 19 middle-, and 19 upper-income census tracts. There are also four unknown census tracts. This represents a change from the previous evaluation where the assessment area contained one moderate-, 14 middle-, 15 upper-income census tracts and three unknown income census tracts.

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau's American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

¹⁴ Census tract designations are based on American Community Survey income data. For years 2022 and after, the designations are based on 2016-2020 ACS data. For years 2021 and before, the designations are based on 2011-2015 ACS data. For examinations that include performance before and after 2022, both sets of data have been used to perform the analysis of bank activity in the respective timeframes.

<i>Source: U. S. Census Bureau: Decennial Census: American Community Survey Data: 2011-2015 U.S. Census Bureau: Decennial Census: American Community Survey Data: 2016-2020</i>			

1st Source Bank has nine branches and nine full-service ATMs operating within the assessment area. The bank has seven branches in middle-income census tracts and two branches in upper-income census tracts. Each branch is accompanied by an ATM.

The Federal Deposit Insurance Corporation (FDIC) market share report, as of June 30, 2022, ranked the bank third in the market among 11 institutions serving the assessment area, with 18.7 percent of the market share. The two institutions with the largest market share of deposits were JP Morgan Chase Bank N.A. and Centier Bank both with 24.1 percent. Deposits in this assessment area represent 11.8 percent of the bank’s overall deposit totals.

1st Source Bank was eighth in 2022 total HMDA originations within the MD among 302 HMDA Reporters with 133 originations, compared to Centier Bank which ranked first with 589 originations and Horizon Bank which ranked second with 284 originations. The bank was sixth in 2022 among 77 CRA reporters with 111 originations, compared to JP Morgan Chase Bank N.A. which ranked first with 936 originations and American Express which ranked second with 629 originations.

Information regarding census-related and business demographic characteristics of the assessment area is provided in the following table.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Assessment Area	Lending Test	Investment Test	Service Test
Gary, IN MD	Consistent	Below	Below

The institution's lending performance in the area is consistent with the institution's lending performance for the state of Indiana. The investment and service performance in the area is below the institution's performance for the state of Indiana; however, it does not change the rating for the state.

LAFAYETTE-WEST LAFAYETTE, IN MSA – Limited Review

SCOPE OF THE EXAMINATION

1st Source Bank’s operations in the Lafayette-West Lafayette, IN MSA received a limited-scope review. The scope for this assessment area is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE LAFAYETTE-WEST LAFAYETTE, IN MSA #29200 ¹⁵

The Lafayette-West Lafayette, IN MSA consists of Tippecanoe County in its entirety. This is unchanged since the previous evaluation. Excluded are Benton, Carroll, and Warren Counties which are also part of the MSA. The assessment area consists of a total of 43 census tracts comprised of three low-, nine moderate-, 17 middle-, and 10 upper-income census tracts. There are also four unknown census tracts. This represents a change from the previous evaluation where the assessment area contained three low-, nine moderate-, 11 middle-, 11 upper-income census tracts and three unknown income census tracts.

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau’s American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

¹⁵ Census tract designations are based on American Community Survey income data. For years 2022 and after, the designations are based on 2016-2020 ACS data. For years 2021 and before, the designations are based on 2011-2015 ACS data. For examinations that include performance before and after 2022, both sets of data have been used to perform the analysis of bank activity in the respective timeframes.

Census Tract Designation Changes American Community Survey Data (ACS)			
Tract Income Designation	2021 Designations (#)	2022 Designations (#)	Net Change (#)
Low	3	3	0
Moderate	9	9	0

1st Source Bank has three branches and three full-service ATMs operating within the assessment area. The bank has one branch in a low-income census tract, one branch in a moderate-income census tract, and one branch in an upper-income census tract. Each branch is accompanied by an ATM.

The Federal Deposit Insurance Corporation (FDIC) market share report, as of June 30, 2022, ranked the bank ninth in the market among 15 institutions serving the assessment area, with 2.4 percent of the market share. The two institutions with the largest market share of deposits were JP Morgan Chase Bank N.A. and First Merchants Bank with 33.4 percent and 25.0 percent, respectively. Deposits in this assessment area represent 1.4 percent of the bank’s overall deposit totals.

1st Source Bank was 31st in 2022 total HMDA originations within the MSA among 254 HMDA Reporters with 29 originations, compared to Purdue Federal Credit Union which ranked first with 817 originations and Ruoff Mortgage Company Inc which ranked second with 305 originations. The bank was thirteenth in 2022 among 72 CRA reporters with 36 originations, compared to JP Morgan Chase Bank N.A. which ranked first with 592 originations and American Express ranked second with 436 originations.

Information regarding census-related and business demographic characteristics of the assessment area is provided in the following table.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Assessment Area	Lending Test	Investment Test	Service Test
Lafayette-West Lafayette, IN MSA	Consistent	Below	Consistent

The institution's lending and service performance in the area is consistent with the institution's lending and service performance for the state of Indiana. The investment performance in the area is below the institution's performance for the state of Indiana; however, it does not change the rating for the state.

MICHIGAN CITY-LAPORTE, IN MSA– Limited Review

SCOPE OF THE EXAMINATION

1st Source Bank’s operations in the Michigan City-LaPorte, IN MSA received a limited-scope review. The scope for this assessment area is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN MICHIGAN CITY-LAPORTE, IN MSA #33140 ¹⁶

The Michigan City-LaPorte, IN MSA consists of LaPorte County in its entirety. This is unchanged since the previous evaluation. The assessment area consists of a total of 31 census tracts comprised of nine moderate-, 13 middle-, and seven upper-income census tracts. There are also two unknown census tracts, one of which consists of the entirety of Lake Michigan. This represents a change from the previous evaluation where the assessment area contained two low-, eight moderate-, eight middle-, 10 upper-, and one unknown income census tracts.

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau’s American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

¹⁶ Census tract designations are based on American Community Survey income data. For years 2022 and after, the designations are based on 2016-2020 ACS data. For years 2021 and before, the designations are based on 2011-2015 ACS data. For examinations that include performance before and after 2022, both sets of data have been used to perform the analysis of bank activity in the respective timeframes.

<i>Source: U. S. Census Bureau: Decennial Census: American Community Survey Data: 2011-2015 U.S. Census Bureau: Decennial Census: America Community Survey Data: 2016-2020</i>			

1st Source Bank has five branches and six ATMs (four full-service and two cash-only) in the assessment area. The bank has one branch in a moderate-income census tract, three branches in middle-income census tracts, and one branch in an upper-income census tract. Each branch has its own ATM. A new cash-only ATM in a moderate-income tract was opened in 2023.

The Federal Deposit Insurance Corporation (FDIC) market share report, as of June 30, 2022, ranked the bank second in the market among eight institutions serving the assessment area, with 15.3 percent of the market share. Horizon Bank was the dominant bank in the assessment area with 55.3 percent share of deposits. Deposits in this assessment area represent 4.8 percent of the bank's overall deposit totals.

1st Source Bank was fifth in 2022 total HMDA originations within the MSA among 247 HMDA Reporters with 133 originations, compared to Horizon Bank which ranked first with 581 originations and Rocket Mortgage which ranked second with 206 originations. The bank was fifth in 2022 among 63 CRA reporters in originations with 127 originations, compared to JP Morgan Chase Bank N.A. which ranked first with 350 originations and American Express which ranked second with 345 originations.

Information regarding census-related and business demographic characteristics of the assessment area is provided in the following table.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Assessment Area	Lending Test	Investment Test	Service Test
Michigan City-Laporte, IN MSA	Below	Consistent	Consistent

The institution's investment and service performance in the area is consistent with the institution's investment and service performance overall in the state. Due to the performance in small business lending, this assessment area is below the state's High Satisfactory rating for lending; however, it does not change the rating for the state.

NORTHEASTERN INDIANA NON-MSA – Limited Review

SCOPE OF THE EXAMINATION

1st Source Bank’s Northeastern Indiana MSA received a limited-scope review. The scope for this assessment area is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE NORTHEASTERN INDIANA NON-MSA¹⁷

The Northeastern Indiana Non-MSA consists of DeKalb County in its entirety. This is unchanged since the previous evaluation. The assessment area consists of a total of nine census tracts comprised of one moderate-, five middle-, and three upper-income census tracts. This represents a change from the previous evaluation where the assessment area contained eight middle- and one upper-income census tracts. There are no distressed or underserved middle-income tracts in the assessment area.

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau’s American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

¹⁷ Census tract designations are based on American Community Survey income data. For years 2022 and after, the designations are based on 2016-2020 ACS data. For years 2021 and before, the designations are based on 2011-2015 ACS data. For examinations that include performance before and after 2022, both sets of data have been used to perform the analysis of bank activity in the respective timeframes.

<i>Source: U. S. Census Bureau: Decennial Census: American Community Survey Data: 2011-2015 U.S. Census Bureau: Decennial Census: America Community Survey Data: 2016-2020</i>			

1st Source Bank has one branch with one full-service ATM in the assessment area. This branch is in a moderate-income census tract.

The Federal Deposit Insurance Corporation (FDIC) market share report, as of June 30, 2022, ranked the bank 10th in the market among 11 institutions serving the assessment area, with 0.6 percent of the market share. The two institutions with the largest market share of deposits were Lake City Bank and The Garrett State Bank with 25.7 percent and 20.4 percent, respectively. Deposits in this assessment area represent 0.1 percent of the bank’s overall deposit totals.

1st Source Bank was 24th in 2022 total HMDA originations within the MSA among 122 HMDA Reporters with 12 originations compared to Ruoff Mortgage Company which ranked first with 144 originations and Three Rivers Federal Credit Union which ranked second with 130 originations. The bank was 15th in 2022 among 50 CRA reporters in originations with eight originations, compared to U.S. Bank which ranked first with 104 originations, 11 of which are purchased loans. Ranked second in CRA-reporters was Capital One with 93 originations.

Information regarding census-related and business demographic characteristics of the assessment area is provided in the following table.

Assessment Area	Lending Test	Investment Test	Service Test
Northeastern Indiana Non-MSA	Consistent	Consistent	Below

The institution's lending and investment service performance in the area is consistent with the institution's lending and investment performance overall in the state. However, the bank did not have any service hours in this assessment area, so it is below the performance of the overall High Satisfactory performance of the service test for the state of Indiana; however, it does not change the rating for the state.

MICHIGAN

CRA RATING FOR MICHIGAN¹⁸: SATISFACTORY

The Lending Test is rated: High Satisfactory

The Investment Test is rated: High Satisfactory

The Service Test is rated: Low Satisfactory

1st Source Bank's performance relative to the Lending Test in the state of Michigan is rated High Satisfactory based on the following factors as determined by the full-scope assessment areas: the geographic distribution of loans reflects good penetration throughout the assessment area; the distribution of borrowers reflects, given the product lines offered, good penetration among customers of different income levels and businesses of different sizes; the bank exhibits an adequate record of serving the credit needs of low-income individuals and areas and small businesses with gross annual revenues of \$1 million or less; 1st Source Bank makes a relatively high level of community development loans; and the bank makes use of innovative and flexible lending practices in serving assessment area credit needs.

1st Source Bank's performance relative to the Investment Test in the state of Michigan is rated High Satisfactory based on a significant use of qualified investments in the assessment area, particularly those that are not routinely provided by private investors, although rarely in a leadership position. These investments demonstrate the occasional use of innovative or complex qualified investments and provide good responsiveness to the credit and community development needs of the assessment area.

1st Source Bank's performance relative to the Service Test in the state of Michigan is rated Low Satisfactory based on the following factors: delivery systems are accessible to the bank's geographies and individuals of different income levels in the assessment area; record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and/or LMI individuals; and services do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and /or low- and moderate-income individuals. Lastly, the bank provides an adequate level of community development services.

SCOPE OF THE EXAMINATION

The ratings for the state of Michigan were based on a full-scope review of the Niles-Benton Harbor, MI MSA. A limited-scope assessment area review was conducted on the Kalamazoo-Portage, MI

¹⁸ For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation is adjusted and does not reflect performance in the parts of those states contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

MSA. The scope of examination is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN MICHIGAN

1st Source Bank maintains two assessment areas in Michigan: the Kalamazoo-Portage, MI MSA #28020 and the Niles-Benton Harbor, MI MSA #35660. The bank maintains a total of seven branches in Michigan and seven ATMs. Individual assessment area summaries pertaining to the economic and demographic conditions can be found within the evaluation.

The bank delineates the full Niles-Benton Harbor, MI MSA, which consists of Berrien County in its entirety. The Niles-Benton Harbor MSA has five branches and five ATMS (four full-service and one cash-only). The bank has two branches in moderate-income census tracts, one branch in a middle-income census tract, and two branches in upper-income census tracts. One cash-only ATM in an upper-income census tract closed in 2021.

The bank delineates the entire Kalamazoo-Portage, MI MSA, which is made up of the entirety of Kalamazoo County and operates two branches and two full-service ATMs. The branches and their respective ATMs are in a middle- and an upper-income census tract.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MICHIGAN

LENDING TEST

The geographic distribution of loans reflects good penetration throughout the assessment area; the distribution of borrowers reflects, given the product lines offered, good penetration among borrowers of different income levels and businesses of different sizes; the bank exhibits an adequate record of serving the credit needs of low-income individuals and areas and very small businesses; 1st Source Bank makes a relatively high level of community development loans; and the bank makes use of innovative and flexible lending practices in serving assessment area credit needs.

The bank participates in a number of loan programs designed to assist low- and moderate-income borrowers. These include Loan Reclamation, Flexible Consumer and Mortgage, and SBA Loan Programs. Some of the most notable products that are beneficial to the community are the Credit Builder Loan Program, Unsecured Home Improvement lending, and Community Development Mortgage program that aids first time homebuyers utilizing non-traditional credit sources and can be combined with down payment assistance.

Geographic Distribution of Loans

For the purposes of this review, loans made in calendar 2021 and prior were analyzed based on the 2011-2015 American Community Survey income designations data¹⁹. Loans made in calendar years 2022 and after were analyzed based on income designations from the 2016-2020 American Community Survey data.

The geographic distribution of loans reflects good penetration throughout the assessment area. The bank's rate of HMDA-reportable lending within its low- and moderate-income census tracts was good. Additionally, the bank's performance with respect to small business lending was good given the bank's performance within low-and moderate-income census tracts.

Lending to Borrowers of Different Income Levels and Lending to Businesses of Different Sizes

For the purposes of this review, loans made in calendar year 2021 or prior were analyzed based on 2011-2015 American Community Survey income designations for individuals²⁰. Loans made in calendar year 2022 or after were analyzed based on 2016-2020 American Community Survey income designations for individuals.

The bank's lending activities reflect good distribution, particularly in its assessment area, of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the bank. The bank's performance in lending in aggregate numbers by percentage in home purchase, refinances, and home improvement loans was near that of aggregate lenders among both low- and moderate-income borrowers. The bank was below aggregate lenders by percentage in small business lending. The bank makes use of innovative and flexible lending practices in a safe and sound manner serving assessment area credit needs. The bank offers Small Business Administration Programs, Credit Builder Programs, and Unsecured Home Improvement Loans.

Community Development Lending

1st Source Bank makes a relatively high level of community development loans in the state of Michigan. During the evaluation period the bank originated 23 loans totaling \$106.1 million in the assessment areas and broader statewide areas. This is a decrease by number but increase by dollar since the previous evaluation period, where the bank originated 39 loans totaling \$84.7 million. Of the community development loans originated during this evaluation period, the loans in the Broader Statewide or Regional Area (BSRA) were largely in Saginaw County. The majority of the

¹⁹ The median family income levels (MFI) for census tracts are calculated using income data from the U.S. Census Bureau's American Community Survey and geographic designations from the Office of Management and Budget and are updated approximately every five years. (.12(m) Income Levels)

²⁰ Income levels for individuals are calculated annually by the FFIEC using geographic definitions from the OMB, income data from the ACS and the Consumer Price Index from the Congressional Budget Office (.12(m) Income Levels).

bank's community development loans went to fund revitalization/stabilization projects. In 2022, the bank originated 19 Unsecured Home Improvement loans in the Niles-Benton Harbor, MI MSA totaling \$93,898, demonstrating the bank's willingness to utilize innovative and flexible underwriting standards.

The following table presents the bank's community development loans in the state of Michigan during the review period.

INVESTMENT TEST

1st Source Bank's record of performance relative to the Investment Test in the state of Michigan is rated High Satisfactory based on a significant use of qualified investments in the assessment areas, particularly those that are not routinely provided by private investors, although rarely in a leadership position. These investments demonstrate the occasional use of innovative investments, and good responsiveness to the credit needs of the community.

During the evaluation period the bank made \$5.8 million of qualified affordable housing investments. Additionally, as of the date of the performance evaluation there was \$5.3 million of outstanding balances from prior period investments that were also for affordable housing purposes. Of the combined investment amounts of \$11.1 million there was \$7.0 million, or 63.4 percent made in the Kalamazoo-Portage MSA. Of the \$11.1 million, the bank had unfunded commitments \$3.6 million. New investments in the current evaluation period include mortgage-backed securities for affordable home loan financing and investment in a project eligible for Low-Income Housing Tax Credits. These investments provide excellent responsiveness to the credit and community development needs of the assessment area, as affordable housing was noted as a need by a community representative. Additionally, the investment in a project eligible for Low-

Income Housing Tax Credits demonstrates the use of innovative and complex qualified investments

The following table presents the bank’s qualified community development investments during the review period:

Community Development Investments (Dollars in 000s) June 8, 2021 – September 25, 2023						
Assessment Area	Current Period Investments			Current Period Total (\$)	Prior Period Outstanding (\$)	Total Unfunded (\$)
	Affordable Housing (\$)	Community Service (\$)	Economic Development (\$)

Total	5,737	0	0	5,737	5,320	3,608

In addition, during the evaluation period, 1st Source Bank had \$131,779 in qualified donations in the state of Michigan. The majority of donations went to economic development and community service organizations This is a decrease from the previous evaluation where the bank donated \$250,326. When the time period difference of the evaluations is accounted for, this evaluation had a monthly average of \$4,706 while the previous evaluation had a monthly average of \$6,954, a 32.3 percent decrease.

The following table presents the bank’s qualified community development donations during the review period.

Community Development Donations June 8, 2021 – September 25, 2023

Total	2	10,000	14	32,185	14	89,594	0	0	30	131,779

Note: Dollar amounts are rounded and not reflective of exact figures.

SERVICE TEST

1st Source Bank's performance relative to the Service Test in the state of Michigan is Low Satisfactory based on the following factors: delivery systems are accessible to the bank's geographies and individuals of different income levels in the assessment area; services do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and /or low- and moderate-income individuals; and the bank provided an adequate level of community development services.

Retail Services

The distribution of the branch offices and ATMs is performed using current data (2022) and any changes in the median family income level of the geographies where the branches are located.

1st Source Bank's retail delivery services are accessible to geographies and individuals of different income levels in its assessment area. No branches have been closed or opened in this state during this evaluation period. The bank operates a total of seven branches and seven ATMs in the assessment areas. The bank has two branches and two ATM's (one full-service and one cash-only) located in moderate-income census tract. The bank maintains two branches and two ATMs in middle-income census tracts and three branches and three ATMs in upper-income census tracts. There was one ATM closing in an upper-income census tract in the Niles MI MSA. ATM availability to bank clientele is also provided through the Cirrus and Accel networks.

Community Development Services

1st Source Bank provides an adequate level of community development services. Within the state of Michigan, the bank provided 445 hours of eligible community development service, which represented 7.5 percent of the bank's overall total of 5,905 hours. This is a decrease from the previous evaluation where bank employees provided 1,139 hours during the evaluation period. The services were performed for a number of organizations but primarily those who focused on community service and economic development. Service hours provided to economic development organizations are particularly responsive, as a community representative noted that small businesses are struggling due to a lack of available workforce.

The following table presents the bank's qualified community development services during the review period:

Community Development Services June 8, 2021 – September 25, 2023

Total	16	182	247	0	445	7.5

NILES – BENTON HARBOR, MI MSA - Full Review

SCOPE OF THE EXAMINATION

1st Source Bank’s operations in the Niles-Benton Harbor, MI MSA received a full-scope review. The scope of examination is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE NILES – BENTON HARBOR, MI MSA #35660

The Niles-Benton Harbor, MI MSA consists of Berrien County in its entirety, which is unchanged from the previous evaluation. The assessment area consists of a total of 54 census tracts comprised of six low-, seven moderate-, 23 middle-, and 16 upper-income census tracts and two unknown-income census tracts comprised entirely of Lake Michigan. This represents a change from the previous evaluation where the assessment area contained seven low-, seven moderate-, 22 middle-, and 12 upper-income census tracts and one unknown census tract.

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau’s American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

<small>Source: U. S. Census Bureau: Decennial Census: American Community Survey Data: 2011-2015 U.S. Census Bureau: Decennial Census: America Community Survey Data: 2016-2020</small>			

1st Source Bank maintains five branches in the assessment area, four of which contain a full-service ATM and one of which also has a cash-only ATM. The bank has two branches in moderate-income census tracts, one branch in a middle-income census tract, and two branches in upper-income census tracts. One cash-only ATM in an upper-income census tract closed in 2021.

The Federal Deposit Insurance Corporation (FDIC) market share report, as of June 30, 2022, ranked the bank fifth in the market among eight institutions that serve the assessment area, with 8.2 percent of the market share. The two institutions with the largest market share of deposits were Fifth Third Bank N.A. and Huntington National Bank with 33.3 percent and 21.1 percent, respectively. Deposits in this assessment area are approximately 2.8 percent of the bank's overall deposit totals.

1st Source Bank ranked 13th in 2022 total HMDA originations within the MSA among 271 HMDA Reporters with 75 originations. The market leader was United with 770 originations followed by Honor Credit Union with 701 originations. In 2022, the bank ranked eighth among 75 CRA reporters in originations, with 64 originations. The market leader was JP Morgan Chase N.A with 576 originations followed by American Express with 442 originations.

Information regarding census-related and business demographic characteristics of the assessment area is provided in the following table.

2022 Niles, MI MSA 35660 AA Demographics

Note: Percentages may not total 100.0 percent due to rounding.

Population Characteristics

The following table presents the population trends for the assessment area and the state of Michigan. As indicated by the 2020 U.S. Census Bureau, the assessment area experienced a modest decline in population since 2015, around 0.8 percent, while the state of Michigan increased modestly by 1.8 percent. According to a community representative, the county’s population has been stable for many years. As of the 2020 U.S. Census, 21.7 percent of the population is age 17 or younger, 58.2 percent of the population is age 18 – 65, and 19.7 percent of the population in the assessment area is age 65 or older; this is comparable to the state of Michigan.

Population Change			
Area	2015 Population	2020 Population	Percent Change (%)
Assessment Area	155,565	154,316	-0.8
State of Michigan	9,900,571	10,077,331	1.8

*Source: 2011-2015 U.S. Census Bureau American Community Survey
2020 U.S. Census Bureau Decennial Census*

Income Characteristics

Based upon 2022 FFIEC Census Data, the assessment area had 40.5 percent of its families by family income classified as either low- (22.8 percent) or moderate-income (17.7 percent). The percentage of families residing within the assessment area that live below the poverty line is 11.7 percent, which is above the state of Michigan rate of 9.2 percent.

Based on 2016-2020 American Community Survey data, the median family income for the assessment area was \$67,533, which reflected an increase of 7.2 percent from 2015. Both the median family income and the rate of increase were below the state of Michigan’s at \$75,470 (in 2020 dollars) and 11.0 percent. A community representative stated that incomes in the area have been growing at a slower rate than other areas in Michigan, noting that even the near-by Kalamazoo area is outpacing them.

The following table compares the median family income (MFI) for the assessment area and the state of Michigan.

Median Family Income Change			
Area	2015 Median Family Income (\$)	2020 Median Family Income (\$)	Percent Change (%)
Assessment Area	62,976	67,533	7.2
State of Michigan	68,010	75,470	11.0

*Source: 2011 - 2015 U.S. Census Bureau American Community Survey
2016 - 2020 U.S. Census Bureau American Community Survey
Median Family Incomes have been inflation-adjusted and are expressed in 2020 dollars.*

Housing Characteristics

Based upon 2022 FFIEC Census Data, the assessment area includes 77,645 housing units; the majority are owner-occupied, representing 57.9 percent of the units, followed by 23.4 percent rental units and 18.7 percent vacant housing units. The median age of housing stock in the assessment area is 59 years, which is older than the average in the state of Michigan as a whole (49 years).

The following table details the housing cost burden of renters and homeowners in the assessment area and in the state of Michigan. The cost burden is a measure of affordability via a comparative analysis of individuals of different income levels that spend 30.0 percent or more of their income on housing costs. Renters across all income levels in the assessment area experience this burden at 42.5 percent, which is consistent with the state of Michigan overall at 43.2 percent. Additionally, owners across all income levels in the assessment area and the state of Michigan experience this burden at the same rate, 18.2 percent.

According to FFIEC HMDA loan and application records, home mortgage trends reflect increases in home mortgage activity in 2022 and 2021, across the assessment area and broader region. These trends suggest a continued increase in demand for home purchases, driving up home values and indicating that housing cost burden will remain elevated. According to the 2020 U.S. Census, the assessment area had a median housing value of \$157,461 and median gross rent of \$757.

A community representative stated that the development of more multi-family housing units has been the focus for expanding affordable housing in the county; however, there is a need for single-family housing as well. The assessment area and state of Michigan are generally comparable in cost-burdened rates of renters and owners.

Housing Cost Burden						
Area	Cost Burden (%) - Renters			Cost Burden (%) - Owners		
	Low Income	Moderate Income	All Renters	Low Income	Moderate Income	All Owners
Assessment Area	73.1	31.2	42.5	60.8	27.8	18.2
State of Michigan	74.2	31.3	43.2	61.7	26.5	18.2
<i>Cost Burden is housing cost that equals 30 percent or more of household income</i>						
<i>Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy</i>						

Employment Characteristics

The following table presents unemployment rates between 2018 and 2022 in the assessment area and the state of Michigan. Both geographies have experienced decreases in unemployment rates from the COVID-19 pandemic levels in 2020. The assessment area unemployment rate is slightly higher than the state of Michigan at 4.6 percent and 4.2 percent, respectively. A community representative noted that unemployment is low, therefore employers (especially restaurants) are struggling to attract and maintain employees.

Unemployment Rates (%)					
Area	2018	2019	2020	2021	2022
Assessment Area	4.3	4.1	9.0	5.8	4.6
State of Michigan	4.2	4.1	10.0	5.8	4.2

Source: Bureau of Labor Statistics (BLS), Local Area Unemployment Statistics

According to the U.S. Bureau of Labor Statistics, as of the second quarter of 2022, the largest industries in the assessment area, by number of employees are manufacturing (12,417), healthcare and social services (7,491), and accommodation and food services (6,425).

Community Representatives

One community representative from an economic development organization was contacted. The representative described the area as a smaller metropolitan statistical area with long-time stable population and lower wage growth. The representative stated that the COVID-19 pandemic lockdowns in the state of Michigan had a large impact on the business community of the county, which relies on manufacturing, retail, and restaurants, and to a lesser extent – tourism. Furthermore, they stated that most businesses have recovered from the COVID-19 pandemic, but some have struggled to remain open. The representative also stated that local financial institutions are involved and there are non-profit loan programs and state funded initiatives available, and thus access to capital is sufficient. Access to technical business knowledge and quality employees is a need for business owners in the area. Berrien County is in the southwest corner of Michigan and has a large shoreline with Lake Michigan, which makes the area near the lake desirable for retirees and vacation homes. The second home and short-term rental market affect the housing market in general. The representative stated the cities of Niles, which is more inland, needs the most development and rehabilitation. The representative stated more affordable housing is a need, but the county has taken some steps to expand low-income housing and multi-family housing.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE NILES – BENTON HARBOR, MI MSA #35660

LENDING TEST

The geographic distribution of loans reflects good penetration throughout the assessment area. The distribution of borrowers reflects, given the product lines offered, good penetration among borrowers of different income levels and businesses of different sizes. The bank exhibits an adequate record of serving the credit needs of low-income individuals and areas and small businesses with gross annual revenues of \$1 million or less. 1st Source Bank makes a relatively high level of community development loans, and the bank makes use of innovative and flexible lending practices in serving assessment area credit needs.

Geographic Distribution of Loans

For the purposes of this review, loans made in calendar 2021 and prior were analyzed based on the 2011-2015 American Community Survey income designations data²¹. Loans made in calendar years 2022 and after were analyzed based on income designations from the 2016-2020 American Community Survey data.

The bank's lending activities reflect good distribution throughout the assessment area. The bank's rate of home mortgage lending within low-and moderate-income census tracts was deemed good as the bank's performance was largely comparable to aggregate lenders or comparable to the assessment area demographics. The bank's HMDA-Reportable loan performance in 2021 exceeded 2022 figures. Additionally, the bank's performance with respect to small business lending was good given the bank's performance within moderate-income census tracts, which was above the percentage of small businesses.

For purposes of this analysis, small business loans were the primary, but not sole factor for determining the rating. When determining performance, the comparison to aggregate lender figures were weighted more heavily than the assessment area demographics (percentage of owner-occupied housing units and percentages of small businesses).

A gap analysis was completed as part of the evaluation. In 2022, by census tract, the bank originated HMDA reportable loans in 53.7 percent of all census tracts in the assessment area with originations in one of the six low-income census tracts (16.7 percent) and loans in three of the seven moderate-income census tracts (42.9 percent). The bank originated small business loans in 28 of 54 census tracts (51.9 percent), with originations in two of the six low-income census tracts (33.3 percent) and loans in four of the seven moderate-income census tracts (57.1 percent). As only 5.6 of

²¹ The median family income levels (MFI) for census tracts are calculated using income data from the U.S. Census Bureau's American Community Survey and geographic designations from the Office of Management and Budget and are updated approximately every five years. (.12(m) Income Levels)

owner-occupied units and 9.5 percent of business are located in low-income tracts and 13.6 percent of owner-occupied units and 12.5 percent of small businesses are located in moderate-income tracts, there is limited opportunity for lending in low- and moderate-income tracts. Based upon this analysis, there were no conspicuous, unexplained lending gaps in the assessment area.

HMDA Reportable Lending

In 2021 and 2022, the bank's rate of HMDA-reportable lending within low- and moderate-income census tracts was good. The bank's 2021 and 2022 HMDA-reportable lending in the assessment area was concentrated in home purchase, refinance, and home improvement loans, which comprised 100.0 percent of the HMDA loans originated. Due to the lack of volume, multi-family loans were not considered within the analysis of HMDA-reportable lending.

Home Purchase Loans

In 2022, home purchase loans represented 29.3 percent of all home mortgage loans made in the assessment area. The bank originated 4.5 percent of its home purchase loans in its low-income census tracts. This was comparable to both the aggregate lender's distribution of 3.0 percent and the owner-occupied unit distribution of 5.6 percent. The bank originated 13.6 percent of its home purchase loans in moderate-income census tracts which was below the performance of the aggregate of lenders at 17.1 percent and comparable to the 13.6 percent demographic of owner-occupied units in moderate-income census tracts. The bank originated 59.1 percent of its home purchase loans in middle-income census tracts. This was well above the aggregate of lenders at 40.9 percent and the 44.0 percent demographic of owner-occupied units in middle-income census tracts. Lastly, the bank originated 22.7 percent of its home purchase loans in upper-income census tracts. This was well below the aggregate of lenders at 38.7 percent of such loans by number and the demographic of owner-occupied units in upper-income census tracts at 36.3 percent.

The performance in 2021 exceeded the performance in 2022. The bank originated 4.8 percent of its home purchase loans in its low-income census tracts. This is slightly above the aggregate at 2.3 percent and comparable to the 5.7 percent demographic of owner-occupied units in low-income census tracts. The bank originated 19.0 percent of its home purchase loans in moderate-income census tracts, which is above both the aggregate and percentage of owner-occupied units in moderate-income census tracts, at 15.3 percent and 13.7 percent, respectively.

Refinance Loans

In 2022, refinance loans represented 49.3 percent of all home mortgage loans made in the assessment area. The bank originated no refinance loans in its low-income census tracts. This is comparable to the aggregate lender's distribution of 1.6 percent and below the owner-occupied

unit distribution of 5.6 percent. The bank originated 10.8 percent of its refinance loans in moderate-income census tracts which was slightly below the performance of the aggregate of lenders at 13.2 percent and below the 13.6 percent demographic of owner-occupied units in moderate-income census tracts. The bank originated 40.5 percent of its refinance loans in middle-income census tracts. This was below the aggregate of lenders at 48.2 percent and the 44.0 percent demographic of owner-occupied units in middle-income census tracts. Lastly, the bank originated 48.6 percent of its refinance loans, by number in upper-income census tracts. This was above the aggregate of lenders at 36.8 percent and the demographic of owner-occupied units in upper-income census tracts at 36.3 percent.

The bank's performance in 2021 exceeded their performance in 2022. The bank did not originate any refinance loans in its low-income census tracts. This was comparable to the aggregate at 1.1 percent and below the 5.7 percent demographic of owner-occupied units in low-income census tracts. The bank originated 20.4 percent of its refinance loans in its moderate-income census tracts, which was above both the aggregate and percentage of owner-occupied units in moderate-income census tracts, at 11.0 percent and 13.7 percent, respectively.

Home Improvement Loans

In 2022, home improvement loans represented 21.3 percent of all home mortgage loans made in the assessment area. The bank originated no home improvement loans in its low-income census tracts. This was slightly below the aggregate lenders' distribution of 2.5 percent and below the owner-occupied unit distribution of 5.6 percent. The bank originated 12.5 percent of its home improvement loans in moderate-income census tracts, which was comparable to both the performance of the aggregate of lenders at 11.7 percent and to the 13.6 percent demographic of owner-occupied units in moderate-income census tracts. The bank originated 43.8 percent of its home improvement loans, by number, in middle-income census tracts. This was comparable to the aggregate of lenders at 44.3 percent and the 44.0 percent demographic of owner-occupied units in middle-income census tracts. Lastly, the bank originated 43.8 percent of its home improvement loans in upper-income census tracts. This was slightly above the aggregate of lenders at 41.1 percent and above the demographic of owner-occupied units in upper-income census tracts at 36.3 percent.

The performance in 2021 exceeded the performance in 2022. The bank originated 4.5 percent of its home improvement loans in its low-income census tracts. This was slightly above the aggregate at 2.0 percent and comparable to the 5.7 percent demographic of owner-occupied units in low-income census tracts. The bank originated 13.6 percent of its home improvement loans in its moderate-income census tracts, which was slightly above the aggregate and comparable to the percentage of owner-occupied units in moderate-income census tracts, at 11.1 percent and 13.7 percent, respectively.

The following table presents the bank's 2022 HMDA-reportable lending in the assessment area; 2021 tables are available in Appendix A.

Small Business Loans

The bank’s performance with respect to the geographic distribution of small business loans was good. In 2022, the bank originated 4.8 percent of its small business loans, by number, in low-income census tracts, which was slightly below the aggregate of lenders at 7.3 percent and below the 9.5 percentage total businesses in this assessment area located in such census tracts. The bank originated 14.5 percent of its small business loans in moderate-income census tracts, which was comparable to the aggregate of lenders at 12.6 percent of such loans in these census tracts and the 12.5 percent of total businesses that are located in such census tracts. The bank originated 41.0 percent its small business loans in middle-income census tracts, which was identical to the aggregate lender rate of 41.0 percent and comparable to the 40.1 percent of total businesses that are located in such census tracts. Lastly, the bank originated 39.8 percent of its small business loans in upper-income census tracts. The bank’s performance was comparable to both the aggregate of lender rate at 38.1 percent and to the 37.4 percent of total businesses that are located in such census tracts. The bank’s performance in 2021 was consistent with 2022 performance.

The following table presents the geographic distribution of small business loans in the assessment area in 2022; 2021 tables are available in Appendix A.

Lending to Borrowers of Different Income Levels and Lending to Businesses of Different Sizes

For the purposes of this review, loans made in calendar year 2021 or prior were analyzed based on 2011-2015 American Community Survey income designations for individuals²². Loans made in calendar year 2022 or after were analyzed based on 2016-2020 American Community Survey income designations for individuals.

1st Source Bank's lending activities reflects good distribution among individuals of different income levels including low- and moderate-income individuals and businesses of different sizes.

In 2022, the bank's performance relative to HMDA-reportable lending was excellent given the bank's performance amongst low- and moderate-income borrowers was generally above the aggregate of lenders and below the assessment area demographics. The bank's 2021 performance slightly exceeded 2022 performance. The bank's small business lending performance was good as the bank's lending to businesses reporting annual revenues of \$1 million or less was below the percentage of total businesses operating in the assessment area; however, a substantial majority of loans were made to businesses with revenues of less than \$1 million in loan sizes of less than \$100,000.

For purposes of this analysis, small business loans received the greater weight when determining the rating given the bank is primarily focused on commercial lending. In addition, when determining performance, the comparison to aggregate lender figures were weighted more heavily than the assessment area demographics (i.e., families by family income or total businesses) as it is a better measure of loan demand.

HMDA Reportable Lending

In 2021 and 2022, the bank's performance relative to home mortgage loans was excellent. Due to the lack of volume, multi-family loans were not considered within the analysis of HMDA-reportable lending.

Home Purchase Loans

In 2022, the bank originated 31.8 percent of its home purchase loans to low-income borrowers, which was significantly above the aggregate of lenders 7.1 percent and above the 22.8 percent demographic of low-income families within the assessment area. The bank originated 22.7 percent of its home purchase loans to moderate-income borrowers, which was above the aggregate of lenders 18.0 percent and the 17.7 percent demographic of moderate-income families within the assessment area. The bank originated 22.7 percent of its home purchase loans to middle-income

²² Income levels for individuals are calculated annually by the FFIEC using geographic definitions from the OMB, income data from the ACS and the Consumer Price Index from the Congressional Budget Office (.12(m) Income Levels).

borrowers, which was above the aggregate of lenders of 19.3 percent and the 17.8 demographic percent of middle-income families within the assessment area. Lastly, the bank originated 22.7 percent of its home purchase loans to upper-income borrowers, which was significantly below the aggregate of lenders of 43.3 percent and the 41.7 percent demographic of upper-income families within the assessment area. The bank's performance in 2021 was consistent with its 2022 performance.

Refinance Loans

In 2022, the bank originated 10.8 percent of its refinance loans to low-income borrowers, which was comparable to the aggregate of lenders of 11.9 percent and well below the 22.8 percent demographic of low-income families within the assessment area. The bank originated 10.8 percent of its refinance loans to moderate-income borrowers, which was below the aggregate of lenders which made 19.5 percent of these loans and the 17.7 percent demographic of moderate-income families within the assessment area. The bank originated 27.0 percent of its refinance loans to middle-income borrowers, which was above the aggregate of lenders of 24.5 percent of and the 17.8 demographic percent of middle-income families within the assessment area. Lastly, the bank originated 45.9 percent of its refinance loans to upper-income borrowers, which was above the aggregate of lenders which made 36.3 percent of these loans and above the 41.7 percent demographic of upper-income families within the assessment area.

The bank's performance in 2021 exceeded its 2022's performance. The bank originated 11.1 percent of its refinance loans to low-income borrowers. This was above the aggregate at 7.5 percent and well below the 22.6 percent demographic of low-income families. The bank originated 24.1 percent of its refinance loans to moderate-income borrowers, which was above both the aggregate and percentage of moderate-income families, at 16.5 percent and 17.0 percent, respectively.

Home Improvement Loans

In 2022, the bank originated 6.3 percent of its home improvement loans to low-income borrowers, which was below the aggregate of lenders of 11.7 percent and well below the 22.8 percent demographic of low-income families. The bank originated 12.5 percent of its home improvement loans to moderate-income borrowers, which was below the aggregate of lenders which made 16.2 percent of these loans and the 17.7 percent demographic of moderate-income families. The bank originated 18.8 percent of its home improvement loans to middle-income borrowers, which was below the aggregate of lenders which made 24.0 percent of these loans and the comparable to the 17.8 demographic percent of middle-income families within the assessment area. Lastly, the bank originated 50.0 percent of its home improvement loans to upper-income borrowers, which was above the aggregate of lenders which made 46.3 percent of these loans and the 41.7 percent demographic of upper-income families.

The bank's performance in 2021 slightly exceeded its 2022's performance. The bank originated 13.6 percent of its home improvement loans to low-income borrowers. This was above the aggregate at 10.8 percent and below the 22.6 percent demographic of low-income families. The bank originated 22.7 percent of its home improvement loans to moderate-income borrowers, which was above both the aggregate and percentage of moderate-income families, at 17.7 percent and 17.0 percent, respectively.

Small Business Loans

In 2022, the bank’s performance relative to small business was good. The bank originated 42.2 percent of its small business loans to businesses with gross annual revenues of \$1 million or less, which was below the 90.8 percent of businesses in the assessment area of that size and below the

aggregate percentage of 52.0. A significant portion, 49.4 percent, of the bank’s small business loans were for \$100,000 or less, which is the most beneficial for the smallest businesses. This was well below aggregate at 93.2 percent. To small businesses with revenues under \$1 million, a substantial majority (80.0 percent) of loans were for \$100,000 or less. In 2021, the performance was comparable.

The following table presents the borrower distribution of small business loans in the assessment area in 2022; 2021 tables are available in Appendix A.

Community Development Lending

1st Source Bank makes a relatively high level of community development loans in the Niles-Benton Harbor, MI MSA. During the evaluation period the bank originated two loans totaling \$15.6 million in the assessment area. When compared to the previous evaluation of 11 loans totaling \$11.7 million, the bank decreased the number of loans by 81.8 percent but increased the size of the loans with a total dollar amount increase of 34.0 percent. Both loans went to organizations that

helped revitalize and stabilization low- and moderate-income geographies. The previous evaluation included 2020 and 2021 rounds of PPP loans, while this evaluation did not include any.

In 2021 and 2022, the bank made 11 Community Development Mortgages totaling approximately \$1.3 million. This program provides credit opportunity for first time homebuyers that earn less than 80 percent of median family income who may not be able to demonstrate creditworthiness through traditional means, such as credit reports. These loans demonstrate the use of innovative underwriting standards and provide excellent responsiveness to the credit and community development needs of the assessment area, as affordable housing was noted as a need by a community representative.

The following table presents the bank’s community development loans in the assessment area during the review period.

Community Development Loans June 8, 2021 – September 25, 2023										
Assessment Area	Affordable Housing		Community Service		Economic Development		Revitalize/ Stabilize		Total	
	#	\$ (000s)	#	\$ (000s)	#	\$ (000s)	#	\$ (000s)	#	\$(000)

<i>Note: Dollar amounts are rounded and not reflective of exact figures.</i>										

INVESTMENT TEST

1st Source Bank makes a significant level of qualified investments, particularly those that are not routinely provided by private investors, rarely in a leadership position. These investments also demonstrated the occasional use of innovative or complex qualified investments and provide good responsiveness to the credit and community development needs of the assessment area through low-income housing projects.

During the evaluation period the bank made \$2.6 million of qualified affordable housing investments. Additionally, as of the date of the performance evaluation there was \$1.5 million of outstanding balances from prior period investments that were also for affordable housing purposes. These combined investment amounts of \$4.1 million are particularly responsive to the credit and community development needs of the assessment area, as affordable housing was noted as a major need in the assessment area by a community representative. One of the bank’s investments was in a project eligible for Low-Income Housing Tax Credit demonstrating the use of innovative and complex qualified investments.

The following table presents the bank’s qualified community development investments during the review period.

Community Development Investments (Dollars in 000s) June 8, 2021 – September 25, 2023						
Assessment Area	Current Period Investments			Current Period Total (\$)	Prior Period Outstanding (\$)	Total Unfunded (\$)
	Affordable Housing (\$)	Community Service (\$)	Economic Development (\$)			
Niles-Benton Harbor, MI	2,565	0	0	2,565	1,475	1,630

Additionally, the bank donated \$69,914 to community service and economic development organizations. This represents a decrease of 59.5 percent from the previous exam when the bank donated \$172,628. When taking into consideration the difference in evaluation period lengths, this is a decrease of 47.9 percent by month.

The following table presents the bank’s qualified community development donations during the review period.

Qualified Community Development Donations June 8, 2021 – September 25, 2023

SERVICE TEST

1st Source Bank’s record of performance relative to the Service Test in the Niles – Benton Harbor, MI MSA is rated Low Satisfactory. The bank’s delivery systems are accessible to the bank’s geographies and individuals of different income levels in the assessment area; the bank’s record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals; services do not vary in a way that inconveniences the needs of its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals; and the bank provides an adequate level of community development services.

Retail Services

The distribution of the branch offices and ATMs is performed using current data (2022) and any changes in the median family income level of the geographies where the branches are located.

First Source Bank's retail delivery services are accessible to geographies and individuals of different income levels in its assessment area. To the extent changes have been made, its record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly in low- or moderate-income geographies or to low- or moderate-income individuals. Its services (including where appropriate, business hours) do not vary in a way that inconveniences its assessment area, particularly low- or moderate-income geographies or low- or moderate-income individuals. The bank operates five branches in the assessment area, four of which contain a full-service ATM. Two branches are in a moderate-income census tract (one of which does not have an ATM), one branch is in a middle-income census tract, and two are in upper-income census tracts. During the evaluation period the bank closed one stand-alone cash only ATM in an upper-income census tract.

Branch locations are open Monday through Friday with standard hours typically from 9:00 a.m. to 5:00 p.m. and limited hours on Saturdays typically until noon, with the exception of one branch located in an upper income census tract that closes daily at 3:00 p.m. and both branches in upper-income census tracts that do not offer Saturday hours. All products and services are consistent among branches. The bank offers ATMs, internet and mobile banking, telephone banking services, and eBanking products to increase access and provide additional services to customers.

Community Development Services

1st Source Bank provides an adequate level of community development services in the assessment area. Bank employees provided 287 hours within this assessment area which is 4.9 percent of the total 5,905 total hours of qualified community development services. When comparing service hours from the previous evaluation (888 hours) by the 36-month time period of the previous evaluation period and the 28-month period of the current evaluation, the bank decreased its service hours by 58.3 percent in the assessment area. The bank cites recent retirements and less of a demand for community development services as contributing factors. Service hours provided to economic development organizations are particularly responsive, as a community representative noted that small businesses are struggling due to a lack of available workforce.

The following table presents the bank's qualified community development services during the review period.

Community Development Services June 8, 2021 – September 25, 2023

KALAMAZOO-PORTAGE, MI MSA - Limited Review

SCOPE OF THE EXAMINATION

1st Source Bank’s operations in the Kalamazoo-Portage, MI MSA received a limited-scope review. The scope of examination is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE KALAMAZOO-PORTAGE, MI MSA #28020

The Kalamazoo-Portage MSA consists of Kalamazoo County in its entirety, which is unchanged from the previous evaluation. The assessment area consists of a total of 68 census tracts comprised of six low-, 17 moderate-, 23 middle-, 21 upper-income census tracts and one unknown-income census tract. This represents a change from the previous evaluation where the assessment area contained seven low-income census tracts, 11 moderate-income census tracts, 24 middle-income census tracts 14 upper-income census tracts, and one unknown-income census tract.

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau’s American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

Census Tract Designation Changes American Community Survey Data (ACS)

FLORIDA

CRA RATING FOR FLORIDA: SATISFACTORY

The Lending Test is rated: Low Satisfactory

The Investment Test is rated: High Satisfactory

The Service Test is rated: Low Satisfactory

1st Source Bank's performance relative to the Lending Test is rated Low Satisfactory based on the following factors as determined by the full-scope assessment area: the bank demonstrates an adequate geographic distribution of loans, particularly to low- or moderate-income geographies, in its assessment area, and adequate penetration of loans to borrowers of different incomes and businesses of different sizes, given the product lines offered by the bank. The bank exhibits an adequate record of serving the credit needs of low-and moderate-income individuals, or small businesses with gross annual revenues of \$1 million or less. The bank makes limited use of innovative and flexible lending practices in serving assessment area credit needs, and few, if any CD loans.

1st Source Bank's performance relative to the Investment Test is rated High Satisfactory. The bank made a significant level of qualified CD investments and grants, particularly those not routinely provided by private investors, rarely in a leadership position. The bank makes rare use of innovative and/or complex investments to support CD initiatives and exhibits excellent responsiveness to credit and community development needs.

1st Source Bank's performance relative to the Service Test is rated Low Satisfactory. The bank's retail delivery services are accessible to geographies and individuals of different income levels in its assessment areas. The bank's services do not vary in a way that inconveniences its assessment area, particularly low-or moderate-income geographies or low-or moderate-income individuals. No branches were opened or closed during the evaluation period. The bank provides few, if any community development services.

SCOPE OF THE EXAMINATION

The ratings for the state of Florida were based on the bank's performance on a full-scope review of the North Port-Sarasota-Bradenton, FL MSA #35840. The scope of examination is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN FLORIDA

1st Source maintains one assessment area in Florida in the North Port-Sarasota-Bradenton, FL MSA #35840. The bank operates one branch without an ATM in Sarasota. The branch location is now designated as a middle-income census tract but was previously designated as a moderate-income census tract. The branch located in Sarasota was opened on April 10, 2017, and thus the bank has only been operating in the market for about seven years.

Due to the limited operations in the state of Florida, this state rating received the least amount of weight in the consideration for the overall rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN FLORIDA

Conclusions regarding the bank's performance in Florida with respect to the lending, investments, and service tests are based solely on the performance in the North Port-Sarasota-Bradenton FL MSA #35840, its sole assessment area in the state, and is evaluated through the following summary.

NORTH PORT - SARASOTA - BRADENTON, FL MSA - Full Review

SCOPE OF THE EXAMINATION

1st Source's operations in the North Port-Sarasota-Bradenton MSA received a full-scope review. The scope of examination is consistent with that which was defined for the whole review; see the more detailed description of the scope contained in the introduction section.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE NORTH PORT - SARASOTA - BRADENTON, FL MSA #35840

The bank delineates Sarasota County, in its entirety, as its assessment area in the North Port-Sarasota-Bradenton, FL MSA. Manatee County, which is part of the MSA, is excluded as the bank does not have any branch locations or deposit taking ATMs in the county. The physical geography of the assessment area has not changed since the previous evaluation on June 7, 2021; however, there have been changes to the assessment area census tract income designations. The assessment area consists of a total of 123 census tracts comprised of one low-, 20 moderate-, 63 middle-, 37 upper-income census tracts and two unknown-income census tracts. This represents a change from the previous evaluation where the assessment area contained 95 census tracts comprised of one low-, 20 moderate-, 48 middle-, 25 upper-, and one unknown-income census tract(s).

Tract Designation Change Data

The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau's American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level). The income data used to calculate geographic income designations changed between 2021 and 2022. Accordingly, lending activity that took place in calendar years up to and including 2021 are evaluated based on ACS income level definitions from the five-year survey data set 2011-2015. Lending activity performed in 2022 and beyond are evaluated based on ACS income level definitions from the five-year survey data set 2016-2020.

Source: U. S. Census Bureau: Decennial Census: American Community Survey Data: 2011-2015 and 2016-2020

1st Source maintains one branch in the assessment area, located in a middle-income census tract. There are no ATMs in the assessment area. There were no opening or closings of either branches or ATMs during the evaluation period. The bank opened the branch in April 2017 and has slightly gained market share since the previous evaluation.

According to the FDIC market share report, as of June 30, 2022, the bank ranked 35th in the market among 37 institutions serving the assessment area, with a 0.1 percent of the market share. This is an increase from the market share reported on the June 30, 2020, FDIC report of 0.02 percent. The two institutions with the largest market share of deposits are Bank of America N.A. and Truist Bank, with 16.5 percent and 14.5 percent, respectively. Deposits in this assessment area represent 0.2 percent of the bank’s overall deposit totals.

In 2022, 1st Source Bank ranked 101st in total HMDA originations within the MSA among 784 HMDA reporters. The bank originated six HMDA loans and by comparison, the first and second ranking organizations by HMDA-reportable loans are Rocket Mortgage, LLC and United Shore Financial Service with 977 and 904 originations, respectively. In 2019, 699 HMDA reporters originated loans in the area, signifying increased market competition. 1st Source had one reportable CRA origination in 2022, ranking 53rd, along with 44 other institutions, out of a total of 136 CRA data reporters. By comparison, first ranked, American Express originated 4,433 CRA loans followed by JP Morgan Chase Bank N.A. with 3,528 originations.

Information regarding census-related and business demographic characteristics of the assessment area is provided in the following table.

2016-2020 U.S. Census Bureau: American Community Survey

Note: Percentages may not total 100.0 percent due to rounding.

Population Characteristics

The following table presents the population trends for the assessment area, the North Port-Sarasota-Bradenton, FL MSA, and the state of Florida. According to 2020 U.S. Census Bureau data, Sarasota County, the North Port-Sarasota-Bradenton, FL MSA, and the state of Florida as a whole all experienced population growth. The assessment area and the MSA both grew at a higher rate (10.7 percent and 13.3 percent, respectively) than the state of Florida (9.6 percent). Additionally, the rate of growth in Sarasota County is below that experienced within the MSA, indicating that Manatee County is growing at a greater rate. A community representative stated that while both counties are on the Gulf of Mexico, Manatee County has more growth eastward. A community representative also stated that Sarasota County has been a destination for retirees for many years, but there is now increased migration of younger workers from states such as California and Arizona. As of the 2020 census, 36.2 percent of the population in the assessment area is age 65 or older, which is significantly more than the 20.2 percent of the population in Florida that is age 65 or older.

Population Change			
Area	2015 Population	2020 Population	Percent Change (%)
Assessment Area	392,038	434,006	10.7
North Port-Sarasota-Bradenton, FL MSA	735,767	833,716	13.3
State of Florida	19,645,772	21,538,187	9.6
<i>Source: 2011-2015 U.S. Census Bureau American Community Survey 2020 U.S. Census Bureau Decennial Census</i>			

Income Characteristics

Based upon 2022 FFIEC Census Data, Sarasota County had 36.2 percent of its families by family income classified as either low- or moderate-income. Only 5.3 percent of families residing within the assessment area live below the poverty line, which is slightly below the MSA rate of 6.1 percent and well below the state of Florida poverty rate of 9.5 percent.

Based on 2016-2020 American Community Survey data, the median family income for Sarasota County was \$80,438 which reflected a significant increase of 14.2 percent from 2015. Both the median family income and the rate of increase were above that of the MSA (12.4 percent) and of state of Florida (10.9 percent). A community representative stated that there is a lot of wealth moving into the area. Though incomes have risen, so has the cost of living. The community representative stated, as an example, Florida has one of the highest costs of food in the country, and thus the income increases did not necessarily equate to a higher quality of life.

The following table compares the median family income (MFI) for the assessment area, the entire North Port-Sarasota-Bradenton, FL MSA, and the state of Florida.

Median Family Income Change			
Area	2015 Median Family Income (\$)	2020 Median Family Income (\$)	Percent Change (%)
Assessment Area	70,415	80,438	14.2
North Port-Sarasota-Bradenton, FL MSA	68,629	77,172	12.4
State of Florida	62,828	69,670	10.9
<i>Source: 2011 - 2015 U.S. Census Bureau American Community Survey 2016 - 2020 U.S. Census Bureau American Community Survey Median Family Incomes have been inflation-adjusted and are expressed in 2020 dollars.</i>			

Housing Characteristics

Based upon 2022 FFIEC Census Data, the assessment area includes 244,910 housing units; the majority are owner-occupied, representing 58.9 percent of the units, followed by 18.4 percent rental units and 22.7 percent vacant housing units. The median age of housing stock in the assessment area is 35 years, which is comparable to the average in the state of Florida as a whole (34 years).

The following table details the housing cost burden of renters and homeowners in the assessment area and in the state of Florida. The cost burden is a measure of affordability via a comparative analysis of individuals of different income levels that spend 30.0 percent or more of their income on housing costs. Renters across all income levels in the assessment area experience this burden at 47.4 percent. Owners across all income levels in the assessment area experience this burden at a much lower level, at 23.7 percent. Assessment area renters are slightly less cost burdened than renters in the state of Florida, but low-income renters in the assessment area are more cost burdened than renters in the state of Florida at 83.1 percent and 80.5 percent, respectively. Homeowners and low-income homeowners in the assessment area are cost burdened at comparable rates, but moderate-income homeowners are slightly less burdened in the assessment area than in the state of Florida at 34.3 percent and 36.3 percent, respectively.

According to FFIEC HMDA loan and application records, home mortgage trends reflect increases in home mortgage activity in 2020 and 2021, across the assessment area and broader region. These trends suggest a continued increase in demand for home purchases, driving up home values and indicating that housing cost burden will remain elevated. According to the 2020 U.S. Census, the assessment area had a median housing value of \$269,263 and median gross rent of \$1,342.

A community representative stated that housing zoning and building codes are challenges to getting affordable housing built, which is a critical need. Being in a hurricane risk area, Sarasota County has adopted strict building codes. The population growth from out of the area is causing home prices to rise and locals to move out of the area because of affordability.

Housing Cost Burden						
Area	Cost Burden (%) - Renters			Cost Burden (%) - Owners		
	Low Income	Moderate Income	All Renters	Low Income	Moderate Income	All Owners
Assessment Area	83.1	58.5	47.4	61.5	34.3	23.7
North Port-Sarasota-Bradenton, FL MSA	81.4	55.4	48.3	58.7	31.7	22.8
State of Florida	80.5	60.2	50.5	61.8	36.3	24.1
<i>Cost Burden is housing cost that equals 30 percent or more of household income Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy</i>						

Employment Characteristics

The following table presents unemployment rates between 2018 and 2022 in the assessment area, the entire North Port-Sarasota-Bradenton, FL MSA, and the state of Florida. All geographies have experienced decreases in unemployment rates from COVID-19 pandemic levels in 2020. In 2022, all geographies had unemployment rates of 2.9 percent.

Unemployment Rates (%)					
Area	2018	2019	2020	2021	2022
Assessment Area	3.5	3.2	7.2	4.0	2.9
North Port-Sarasota-Bradenton, FL MSA	3.5	3.2	7.2	4.0	2.9
State of Florida	3.6	3.3	8.1	4.6	2.9
<i>Source: Bureau of Labor Statistics (BLS), Local Area Unemployment Statistics</i>					

According to the U.S. Bureau of Labor Statistics, as of the second quarter of 2022, the largest industries in the assessment area, by number of employees are healthcare and social services (32,854), retail, (23,449), and accommodation and food services (21,887). A community representative stated that the low unemployment rate is affecting jobs of all skill levels, with worker shortages impacting industries from food services to healthcare.

Community Representatives

One community representative from an affordable housing organization was contacted. The representative stated that the population has continued growing, even since 2020, with people from different parts of the country moving to the area. Population in Manatee County, which is east of the interstate, is where the population growth can physically expand. Driving the growth are remote workers and retirees from the Midwest, New York, California, Texas, and Arizona, with the latter three being relatively new locations to relocate from. The population increase is causing a housing shortage, which is also exacerbated by strict local zoning laws, and strict local building laws, due to hurricane safety measures. There are also many vacation rentals and cash sales. The housing situation is causing locals to be priced out. The representative listed finding available workers as a major need as there is a shortage of service industry workers. The representative stated another critical issue since the pandemic is the rate of consumer good inflation, citing Florida as one of the most expensive states for food and stating income increases did not necessarily equate to a higher quality of life. The representative stated affordable housing is the most critical need and government subsidies will be required to alleviate the situation. The representative stated that there are not many small businesses being started or resources for entrepreneurs.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE NORTH PORT - SARASOTA - BRADENTON, FL MSA #35840

LENDING TEST

The geographic distribution of loans reflects adequate penetration throughout the assessment area. The distribution of borrowers reflects, given the product lines offered, adequate penetration among individuals of different income levels and businesses of different sizes. 1st Source Bank exhibits an adequate record of serving the credit needs of low-and moderate-income individuals, or small businesses with gross annual revenues of \$1 million or less. The bank makes limited use of innovative and flexible lending practices in serving assessment area credit needs; and few, if any, CD loans.

The bank originated a nominal number of home mortgage, small business, and community development loans in the assessment area during the evaluation period.

Geographic Distribution of Loans

For the purposes of this review, loans made in calendar 2021 and prior were analyzed based on the 2011-

2015 American Community Survey income designations data²³. Loans made in calendar years 2022 and after were analyzed based on income designations from the 2016-2020 American Community Survey data.

The geographic distribution of loans reflects adequate penetration throughout the assessment area. In 2022, the bank's rate of home mortgage lending within low- and moderate-income census tracts was deemed adequate as the bank's performance was comparable aggregate in low-income census tracts and above aggregate in moderate-income census tracts. HMDA performance in 2021 was below its 2022 performance, though volume remained very low. The assessment area has only one low-income census tract which contains less than one percent of owner-occupied units and less than one percent of small businesses. However, there are 20 moderate-income census tracts that contain about 12.0 percent of small businesses. The bank originated all six of its small business loans in LMI census tracts in 2021, but in 2022, made none of its seven small business loans in those tracts, therefore performance is adequate.

For purposes of this analysis, small business loans were used as the primary factor for determining the rating given the bank is primarily focused on commercial lending. Additionally, both 2022 and 2021 figures were used to evaluate the bank's performance, though 2022 figures are featured in the narrative and 2021 figures are used to comparison and detailed in Appendix A. Finally, when determining performance, the comparison to aggregate lender figures was weighted more heavily than the assessment area demographics (i.e., percentage of owner-occupied housing units or percentage of borrowers by income levels) as it is a better measure of loan demand.

A gap analysis was completed as part of the evaluation. In 2022, by census tract, the bank originated HMDA reportable loans in 4.9 percent of all census tracts in the assessment area with no originations in the low-income census tracts and originations in two of 20 moderate-income census tracts (10.0 percent). The bank did not originate any small business loans in 121 of 123 census tracts. Based upon this analysis, there were no conspicuous, unexplained lending gaps in the assessment area.

HMDA Reportable Lending

In 2021 and 2022, the bank's rate of HMDA-reportable lending within low- and moderate-income census tracts was adequate. The bank's 2021 and 2022 HMDA-reportable lending in the assessment area was concentrated in home purchase loans, which comprised the vast majority of the HMDA loans originated. While there were no loans in 92.6 percent of tracts in the assessment area, this can be attributed to the bank's limited branch presence and elevated competition in the assessment area. Due to the lack of volume, home improvement and multi-family loans were not considered

²³ The median family income levels (MFI) for census tracts are calculated using income data from the U.S. Census Bureau's American Community Survey and geographic designations from the Office of Management and Budget and are updated approximately every five years. (.12(m) Income Levels)

within the analysis of HMDA-reportable lending.

Home Purchase Loans

Home purchase loans represented 50.0 percent of all home mortgage loans made in the assessment area. The bank did not originate any home purchase loans in its sole low-income census tract. This is comparable to the aggregate lender's distribution of 0.3 percent and the owner-occupied unit distribution of 0.3 percent. In 2022, the bank made one home purchase loans in a moderate-income census tract, representing 33.3 percent of total home purchase loans made, which exceeded the 13.3 percent of the aggregate lenders, and the 14.5 percent of the owner-occupied housing units located in moderate-income tracts. Within middle-income census tracts, the bank did not make any home purchase loans, which was below the aggregate of lenders at 43.7 percent and the 50.3 percent demographic of owner-occupied units in middle-income census tracts. Lastly, the bank made 66.7 percent of its home purchase loans in upper-income census tracts. This was significantly above the aggregate of lenders which made 40.7 percent of such loans by number in these census tracts and the 34.6 percent demographic of owner-occupied units in upper-income census tracts.

In 2021, the bank made three total home purchase loans with no loans in the low- and moderate-income census tracts. This was consistent, given lending volumes, to 2022 lending performance.

Refinance Loans

In 2022, the bank did not originate refinance loans in low-income census tracts. The bank's performance was comparable to the aggregate of lenders at 0.4 percent and the owner-occupied units at 0.3 percent. Within moderate-income census tracts, the bank's performance (100.0 percent of loans made) was well above the aggregate of lenders at 17.3 percentage and the assessment area demographics at 14.5 percent. The bank did not originate any refinance loans in middle-income census tracts which was below the aggregate of lenders at 49.4 percent and the 50.3 percent demographic of owner-occupied units in middle-income census tracts. Lastly, the bank originated no refinance loans in upper-income census tracts. This was below the aggregate of lenders which made 32.5 percent of such loans by number, and the 34.6 percent demographic of owner-occupied units in upper-income census tracts.

In 2021, the bank made three total refinance loans, with no loans in the low- and moderate-income census tracts. This was consistent with 2022 lending performance.

The following table presents the bank's 2022 HMDA-reportable lending in the assessment area; 2021 tables are available in Appendix A.

Small Business Loans

The bank’s performance with respect to the geographic distribution of small business lending was adequate. In 2022, the bank originated seven small business loans, of which none were in a low- or moderate-income census tract. The aggregate lenders made 0.4 percent and 12.1 percent of their loans in such tracts, and the percentage of total business in such tracts were 0.6 percent and 12.0 percent, respectively. In 2021, the bank originated all six of its small business loans in low- and moderate-income census tracts. The bank’s lending in low-income census tracts (16.7 percent) was well above peer lending at 0.5 percent and demographics at 0.6 percent. The bank’s lending in moderate-income census tracts (83.3 percent) was well above peer lending at 18.1 percent and demographics at 19.4 percent.

The following table presents the geographic distribution of small business loans in the assessment area in 2022; 2021 tables are available in Appendix A.

Lending to Borrowers of Different Income Levels and Lending to Businesses of Different Sizes

For the purposes of this review, loans made in calendar year 2021 or prior were analyzed based on 2011-2015 American Community Survey income designations for individuals²⁴. Loans made in calendar year 2022 or after were analyzed based on 2016-2020 American Community Survey income designations for individuals.

²⁴ Income levels for individuals are calculated annually by the FFIEC using geographic definitions from the OMB, income data from the ACS and the Consumer Price Index from the Congressional Budget Office (.12(m) Income Levels).

The bank's lending activities reflect adequate distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the bank. In 2022, the bank's performance relative to HMDA-reportable loans was adequate as lending to low-income borrowers was well below the aggregate lenders and below the percentage of families-by-family income. However, for moderate-income borrowers, the bank's performance was significantly above the aggregate lenders and the percentage of families-by-family income. The bank did not originate loans to businesses with revenues under \$1 million in 2022 or 2021, therefore the performance is adequate. The performance for small businesses loans was weighted more heavily given the bank's status as a primarily commercial lender.

HMDA Reportable Lending

In 2021 and 2022, the bank's performance relative to HMDA-reportable loans was adequate. Due to the lack of volume, home improvement and multi-family loans were not considered within the analysis of HMDA-reportable lending.

Home Purchase Loans

In 2022, the bank did not originate home purchase loans to low-income borrowers which was below the aggregate of lenders at 2.9 percent of these loans and well below the 16.8 percent demographic of low-income families within the assessment area. The bank originated 66.7 percent of its home purchase loans to moderate-income borrowers, which was well above the aggregate of lenders at 12.5 percent and well above the 19.4 percent demographic of moderate-income families within the assessment area. Amongst middle-income borrowers, the bank originated one home purchase loan, accounting for 33.3 percent of the distribution, which was above the aggregate of lenders at 19.2 percent and above the 20.8 percent demographic of middle-income families in the assessment area. Lastly, the bank originated none of its home purchase loans to upper-income borrowers, which was below the aggregate of lenders which made 50.4 percent of these loans and the 43.0 percent of demographic upper-income families within the assessment area.

The bank's 2021 performance was below its 2022 performance. In 2021, the bank originated no loans in low- or moderate-income tracts. This was below aggregate lenders at 3.5 and 13.5 percent, respectively. This was also below low- and moderate-income families located in the assessment area at 17.5 and 19.2 percent.

Refinance Loans

In 2022, the bank did not originate any refinance loans to low-, middle- or upper-income borrowers. The bank's performance was below that of the aggregate of lenders to low-, middle-,

and upper-income borrowers which made 13.2 percent, 22.0 percent, and 29.7 percent respectively to such borrowers and below the demographics of low-, middle-, and upper-income families of 16.8 percent, 20.8 percent, and 43.0 percent, respectively. The bank originated 100.0 percent of its loan originations to moderate-income borrowers, which was significantly above aggregate lenders at 23.5 percent and the 19.4 percent demographic of moderate-income families within the assessment area. In 2021, the bank's performance was comparable to that of its 2022 performance.

The following table presents the borrower distribution of HMDA-reportable loans in the assessment area; 2021 tables can be found in Appendix A.

Multifamily loans are not included in the borrower distribution analysis.							

Small Business Loans

The bank’s performance relative to small business loans was adequate, as the bank’s rate of lending to businesses reporting annual revenues of \$1 million or less was well below the rate of the aggregate of lenders and the percentage of businesses with \$1 million or less in annual revenues operating in the assessment area. In 2022, the bank originated no loans to businesses with revenues of \$1 million or less. This rate was significantly below the aggregate lender rate of 54.1 percent and the percentage of total businesses in the assessment area at 94.3 percent. Of the small business loan originated, 57.1 percent were made to businesses of all sizes for \$100,000 or less, which is the most beneficial to smaller businesses. This was well below the aggregate average at 95.7 percent. Overall, the bank’s performance in 2021 was comparable to its 2022 performance, which also showed no loans to businesses with \$1 million or less in annual revenue.

The following table presents the borrower distribution of small business loans in 2022; 2021 tables are available in Appendix A.

Community Development Lending

The bank made no community development loans in the assessment area. This is a decline from the previous evaluation where the bank made two PPP loans to a non-profit affordable housing entity for \$734,500.

The following table presents the bank’s community development loans in the assessment area during the review period.

Community Development Loans June 8, 2021 – September 25, 2023

INVESTMENT TEST

1st Source Bank makes a significant level of qualified investments, particularly those that are not routinely provided by private investors, rarely in a leadership position. These investments also demonstrated the rare use of innovative or complex qualified investments and provide excellent responsiveness to the credit and community development needs of the assessment area through low-income housing projects.

During the evaluation period the bank made \$3.7 million of qualified affordable housing investments. Additionally, as of the date of the performance evaluation there was \$1.6 million of outstanding balances from prior period investments that were also for affordable housing purposes. These combined investment amounts of \$5.3 million are particularly responsive to the credit and community development needs of the assessment area, as affordable housing was noted as a major need in the assessment area by a community representative.

The following table presents the bank’s qualified community development investments during the review period.

Community Development Investment (Dollars in 000s) June 8, 2021 – September 25, 2023						
Assessment Area	Current Period Investments			Current Period Total (\$)	Prior Period Outstanding (\$)	Total Unfunded (\$)
	Affordable Housing (\$)	Community Service (\$)	Economic Development (\$)			
North Port-Sarasota-	3,657	0	0	3,657	1,633	0

Additionally, the bank donated \$22,300 to affordable housing, community service, and economic development organizations. This represents an increase of approximately 306.9 percent in qualified donations from the previous evaluation period where the bank made \$5,480 in donations.

The following table presents the bank’s qualified community development donations during the review period.

SERVICE TEST

1st Source Bank’s record of performance relative to the Service Test in the North Port-Sarasota-Bradenton, FL MSA is rated Low Satisfactory. The banks delivery systems are accessible to the bank’s geographies and individuals of different income levels in the assessment area; the bank’s record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals; services do not vary in a way that inconveniences the needs of its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals; and the bank provides few community development services.

Retail Services

The distribution of the branch offices and ATMs is performed using current data (2022) and any changes in the median family income level of the geographies where the branches are located.

1st Source Bank retail delivery services are accessible to geographies and individuals of different income levels in its assessment area. To the extent changes have been made, its record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly in low- or moderate-income geographies or to low- or moderate-income individuals. Its services (including, where appropriate, business hours) do not vary in a way that inconveniences its assessment area, particularly low- or moderate-income geographies or low- or moderate-income individuals.

The bank operates one branch and no ATMs in the assessment area. The branch is located in a middle-income census tract. The branch is open Monday through Friday from 10:00 a.m. to 2:00 p.m. The bank offers internet and mobile banking, telephone banking services, and eBanking products to increase access and provide additional services to customers.

Community Development Services

1st Source Bank provides few community development services. Bank employees provided three hours of qualified community development services within the North Port-Sarasota-Bradenton, FL MSA. The service hours were directed towards organizations providing affordable housing. The bank did not provide any community development services in the assessment area at the previous evaluation.

The following table presents the bank’s qualified community development services during the review period.

APPENDIX D – Glossary

Affiliate: Any company that controls, is controlled by, or is under common control with another company. A company is under common control with another company if the same company directly or indirectly controls both companies. A bank subsidiary is controlled by the bank and is, therefore, an affiliate.

Affordability ratio: To determine housing affordability, the affordability ratio is calculated by dividing median household income by median housing value. This ratio allows the comparison of housing affordability across assessment areas and/or communities. An area with a high ratio generally has more affordable housing than an area with a low ratio.

Aggregate lending: The number of loans originated and purchased by all lenders subject to reporting requirements as a percentage of the aggregate number of loans originated and purchased by all lenders in the MSA/assessment area.

American Community Survey Data (ACS): The American Community Survey (ACS) data is based on a nationwide survey designed to provide local communities with reliable and timely demographic, social, economic, and housing data each year. The Census Bureau first released data for geographies of all sizes in 2010. This data is known as the “five-year estimate data.” The five-year estimate data is used by the FFIEC as the base file for data used in conjunction with consumer

compliance and CRA examinations.²⁵

Area Median Income (AMI): AMI means –

1. The median family income for the MSA, if a person or geography is located in an MSA, or for the metropolitan division, if a person or geography is located in an MSA that has been subdivided into metropolitan divisions; or
2. The statewide nonmetropolitan median family income, if a person or geography is located outside an MSA.

Assessment area: Assessment area means a geographic area delineated in accordance with section 228.41

Automated teller machine (ATM): An automated teller machine means an automated, unstaffed banking facility owned or operated by, or operated exclusively for, the bank at which deposits are received, cash dispersed or money lent.

Bank: Bank means a state member as that term is defined in section 3(d)(2) of the Federal Deposit Insurance Act (12 USC 1813(d)(2)), except as provided in section 228.11(c)(3), and includes an uninsured state branch (other than a limited branch) of a foreign bank described in section 228.11(c)(2).

Branch: Branch refers to a staffed banking facility approved as a branch, whether shared or unshared, including, for example, a mini-branch in a grocery store or a branch operated in conjunction with any other local business or nonprofit organization.

Census tract: Small subdivisions of metropolitan and other densely populated counties. Census tract boundaries do not cross county lines; however, they may cross the boundaries of metropolitan statistical areas. They usually have between 2,500 and 8,000 persons, and their physical size varies widely depending upon population density. Census tracts are designed to be homogeneous with respect to population characteristics, economic status, and living conditions to allow for statistical comparisons.

Combined Statistical Area (CSAs): Adjacent metropolitan statistical areas/metropolitan divisions (MSA/MDs) and micropolitan statistical areas may be combined into larger Combined Statistical Areas based on social and economic ties as well as commuting patterns. The ties used as the basis for CSAs are not as strong as the ties used to support MSA/MD and micropolitan statistical area designations; however, they do bind the larger area together and may be particularly useful for

²⁵ Source: FFIEC press release dated October 19, 2011.

regional planning authorities and the private sector. Under Regulation BB, assessment areas may be presented under a Combined Statistical Area heading; however, all analysis is conducted on the basis of median income figures for MSA/MDs and the applicable state-wide non metropolitan median income figure.

Community Development: The financial supervisory agencies have adopted the following definition for community development:

1. Affordable housing, including for multi-family housing, for low- and moderate-income households;
2. Community services tailored to meet the needs of low- and moderate-income individuals;
3. Activities that promote economic development by financing businesses or farms that meet the size eligibility standards of the Small Business Administration's Development Company or Small Business Investment Company programs (13 CFR 121.301) or have gross annual revenues of \$1 million or less; or
4. Activities that revitalize or stabilize low- or moderate-income geographies.

Effective September 1, 2005, the Board of Governors of the Federal Reserve System, Office of the Comptroller of the Currency and the Federal Deposit Insurance Corporation have adopted the following additional language as part of the revitalize or stabilize definitions of community development. Activities that revitalize or stabilize:

- 1) Low- or moderate-income geographies;
- 2) Designated disaster areas; or
- 3) Distressed or underserved nonmetropolitan middle-income geographies designated by the Board, Federal Deposit Insurance Corporation and Office of the Comptroller of the Currency based on:
 - a. Rates of poverty, unemployment or population loss; or
 - b. Population size, density and dispersion. Activities that revitalize and stabilize geographies designated based on population size, density and dispersion if they help to meet essential community services including the needs of low- and moderate-income individuals.

Community Development Loan: A community development loan means a loan that:

- 1) Has as its primary purpose community development; and
- 2) Except in the case of a wholesale or limited purpose bank –
 - a. Has not been reported or collected by the bank or an affiliate for consideration in the bank's assessment as a home mortgage, small business, small farm, or consumer loan, unless it is a multi-family housing loan (as described in the regulation implementing the Home Mortgage Disclosure Act); and
 - b. Benefits the bank's assessment area(s) or a broader statewide or regional area

that includes the bank's assessment area(s).

Community Development Service: A community development service means a service that:

- 1) Has as its primary purpose community development; and
- 2) Is related to the provision of financial services.

Consumer loan: A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories of loans: motor vehicle, credit card, other consumer secured loan, includes loans for home improvement purposes not secured by a dwelling, and other consumer unsecured loan, includes loans for home improvement purposes not secured.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married couple family or other family, which is further classified into "male householder" (a family with a male household and no wife present) or "female householder" (a family with a female householder and no husband present).

Fair market rent: Fair market rents (FMRs) are gross rent estimates. They include the shelter rent plus the cost of all tenant-paid utilities, except telephones, cable or satellite television service, and internet service. HUD sets FMRs to assure that a sufficient supply of rental housing is available to their program participants. To accomplish this objective, FMRs must be both high enough to permit a selection of units and neighborhoods and low enough to serve as many low-income families as possible. The level at which FMRs are set is expressed as a percentile point within the rent distribution of standard-quality rental housing units. The current definition used is the 40th percentile rent, the dollar amount below which 40 percent of the standard-quality rental housing units are rented. The 40th percentile rent is drawn from the distribution of rents of all units occupied by recent movers (renter households who moved to their present residence within the past 15 months). HUD is required to ensure that FMRs exclude non-market rental housing in their computation. Therefore, HUD excludes all units falling below a specified rent level determined from public housing rents in HUD's program databases as likely to be either assisted housing or otherwise at a below-market rent, and units less than two years old.

Full review: Performance under the Lending, Investment, and Service Tests is analyzed considering performance context, quantitative factors (for example, geographic distribution, borrower distribution, and amount of qualified investments) and qualitative factors (for example, innovativeness, complexity and responsiveness).

Geography: A census tract delineated by the U.S. Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act: The statute that requires certain mortgage lenders that do business or have banking offices in metropolitan statistical areas to file annual summary reports of their mortgage lending activity. The reports include data such as the race, gender and income of the applicant(s) and the disposition of the application(s) (for example, approved, denied, and withdrawn).

Home mortgage loans: Are defined in conformance with the definitions of home mortgage activity under the Home Mortgage Disclosure Act and include closed end mortgage loans secured by a dwelling and open-end lines of credit secured by a dwelling. This includes loans for home purchase, refinancing and loans for multi-family housing. It does not include loans for home improvement purposes that are not secured by a dwelling.

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Income Level: Income level means:

- 1) Low-income – an individual income that is less than 50 percent of the area median income, or a median family income that is less than 50 percent in the case of a census tract;
- 2) Moderate-income – an individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent in the case of a census tract;
- 3) Middle-income – an individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent in the case of a census tract; and
- 4) Upper-income – an individual income that is at least 120 percent of the area median income, or a median family income that is at least 120 percent in the case of a census tract.

Additional Guidance: .12(m) Income Level: The median family income levels (MFI) for census tracts are calculated using the income data from the United States Census Bureau's American Community Survey and geographic definitions from the Office of Management and Budget (OMB) and are updated approximately every five years (.12(m) Income Level).

Limited-purpose bank: This term refers to a bank that offers only a narrow product line such as credit card or motor vehicle loans to a regional or broader market and for which a designation as a limited-purpose bank is in effect, in accordance with section 228.25(b).

Limited review: Performance under the Lending, Investment and Services test is analyzed using only quantitative factors (for example, geographic distribution, borrower distribution, amount of investments and branch office distribution).

Loan location: Under this definition, a loan is located as follows:

- 1) Consumer loan is located in the census tract where the borrower resides;
- 2) Home mortgage loan is located in the census tract where the property to which the loan relates is located;
- 3) Small business and small farm loan is located in the census tract where the main business facility or farm is located or where the loan proceeds have been applied as indicated by the borrower.

Loan production office (LPO): This term refers to a staffed facility, other than a branch, that is open to the public and that provides lending-related services, such as loan information and applications.

Market share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the MA/assessment area.

Median Family Income (MFI): The median income determined by the U.S. Census Bureau every ten years and used to determine the income level category of geographies. Also, the median income determined by the Department of Housing and Urban Development (HUD) annually that is used to determine the income level category of individuals. For any given area, the median is the point at which half of the families have income above it and half below it.

Metropolitan Area: A metropolitan statistical area (**MSA**) or a metropolitan division (**MD**) as defined by the Office of Management and Budget. A MSA is a core area containing at least one urbanized area of 50,000 or more inhabitants, together with adjacent communities having a high degree of economic and social integration with that core. A MD is a division of a MSA based on specific criteria including commuting patterns. Only a MSA that has a single core population of at least 2.5 million may be divided into MDs. A metropolitan statistical area that crosses into two or more bordering states is called a multistate metropolitan statistical area.

Multifamily: Refers to a residential structure that contains five or more units.

Nonmetropolitan area: This term refers to any area that is not located in a metropolitan statistical area or metropolitan division. Micropolitan statistical areas are included in the definition of a

nonmetropolitan area; a micropolitan statistical area has an urban core population of at least 10,000 but less than 50,000.

Owner-occupied units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified Investment: This term refers to any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rated area: This term refers to a state or multistate metropolitan area. For institutions with domestic branch offices in one state only, the institution's CRA rating is the state's rating. If the institution maintains domestic branch offices in more than one state, the institution will receive a rating for each state in which those branch offices are located. If the institution maintains domestic branch offices in at least two states in a multistate metropolitan statistical area, the institution will receive a rating for the multistate metropolitan area.

Small Bank: This term refers to a bank that as of December 31 of either of the prior two calendar years, had assets of less than \$1.252 billion. Intermediate small bank means a small bank with assets of at least \$313 million as of December 31 of both of the prior two calendar years and less than \$1.252 billion as of December 31 of either of the prior two calendar years.

Annual Adjustment: The dollar figures in paragraph (u)(1) of this section shall be adjusted annually and published by the Board, based on the year-to-year change in the average of the Consumer Price Index for Urban Wage Earners and Clerical Workers, not seasonally adjusted, for each 12-month period ending in November, with rounding to the nearest million.

Small Business Loan: This term refers to a loan that is included in "loans to small businesses" as defined in the instructions for preparation of the Consolidated Report of Condition and Income. The loans have original amounts of \$1 million or less and are either secured nonfarm, nonresidential properties or are classified as commercial and industrial loans.

Small Farm Loan: This term refers to a loan that is included in "loans to small farms" as defined in the instructions for preparation of the Consolidated Report of Condition and Income. These loans have original amounts of \$500 thousand or less and are either secured by farmland, including farm residential and other improvements, or are classified as loans to finance agricultural production and other loans to farmers.

Wholesale Bank: This term refers to a bank that is not in the business of extending home mortgage, small business, small farm or consumer loans to retail customers, and for which a designation as a wholesale bank is in effect, in accordance with section 228.25(b).
